Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Soil and Water Conservation Engineering
Course Code	AENG-121[T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Science at Secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Describe the importance of soil and water conservation in natural resource management**(BL1-Remember)** **CO2-** Understand the mechanism of various processes of soil erosion**(BL2-Understand)** **CO3-** Apply appropriate soil & water conservation techniques in a various field conditions**(BL3-Apply)** **CO4-** Examine the effect of erosion problem in the soil**(BL4-Analyze)** **CO5-** Evaluate the soil loss by different empirical equations and RS & GIS technique**(BL5-Evaluate)** **CO6-** Design various soil & water conservation structures in order to control soil erosion and subsequent safe disposal of water**(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG13(Climate action)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Unit-I: Surveying: Survey components, Chain survey, Cross staff survey, Calculation of area of regular and irregular fields. Levelling equipments.	Guided Learning, Filed work (Outdoor Learning) Problem based learning, Brain storming	3
Unit 2	Unit-II: Introduction to Soil and Water Conservation causes of soil erosion. Definition and agents of soil erosion, water erosion: Forms of water erosion. Gully classification and control measures.	Guided Learning, Filed work (Outdoor Learning) Problem based learning, Brain storming	3
Unit 3	Unit-III: Soil loss estimation by universal Loss Soil Equation. Soil loss measurement techniques. Principles of erosion control: Introduction to contouring, strip cropping. Contour bund. Graded bund and bench terracing.	Guided Learning, Filed work (Outdoor Learning) Problem based learning, Brain storming	3
Unit 4	Unit-IV: Grassed water ways and their design. Water harvesting and its techniques. Wind erosion: mechanics of wind erosion, types of soil movement. Principles of wind erosion control and its control measures.	Guided Learning, Filed work (Outdoor Learning) Problem based learning, Brain storming	3
Unit 5	Unit-V: Introduction to irrigation. Irrigation water measurement methods and instruments-,Weirs Orifice Flumes. Rainfall erosivity - estimation as EI30 index and kinetic energy, methods of measurement and prediction of runoff, land capability classification.	Guided Learning, Filed work (Outdoor Learning) Problem based learning, Brain storming	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	General status of soil conservation in India	Experiments	BL2-Understand	2
Practical 2	Calculation of erosion index.	Experiments	BL2-Understand	2
Practical 3	Estimation of soil loss.	Experiments	BL3-Apply	2
Practical 4	Preparation of contour maps.	Experiments	BL3-Apply	2
Practical 5	Design of grass waterways	Experiments	BL4-Analyze	2
Practical 6	Visits to watershed	Field work	BL4-Analyze	2
Practical 7	Design of contour bunds	Experiments	BL5-Evaluate	2
Practical 8	Design of graded bunds.	Experiments	BL5-Evaluate	2

Part D(Marks Distribution)

Theory					
Total Marks	**Minimum Passing Marks**	**External Evaluation**	**Min. External Evaluation**	**Internal Evaluation**	**Min. Internal Evaluation**
80	31	50		30	
Practical					
Total Marks	**Minimum Passing Marks**	**External Evaluation**	**Min. External Evaluation**	**Internal Evaluation**	**Min. Internal Evaluation**
20	10

Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Farm Machinery and Power
Course Code	AENG-211[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Science and Maths at secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Define the farm power sources and describe the different operations in farm machinery **(BL1-Remember)** **CO2-** Understand the principles of farm machinery management for different soil, crops and operations **(BL2-Understand)** **CO3-** Calculate the performance of farm machinery under actual field conditions **(BL3-Apply)** **CO4-** Examine the working principle of different system of tractor & parts of internal combustion engines **(BL4-Analyze)** **CO5-** Evaluate the performance of harvesting, threshing and special equipment for various farm operations**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG4(Quality education) SDG8(Decent work and economic growth)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Farm Power in India: Sources (Renewable, Mechanical, Electrical, Animal, Human Power). Engine terminology. Engines- working principles of two stroke and four stroke engines. Air cleaning- cooling and lubrications	Problem-based learning: Fieldwork and outdoor learning Guided Questioning Group discussions	4
Unit 2	Tractors- Different systems of Tractor, Types and Selection of Tractors, operating cost of Tractor.	Problem-based learning: Fieldwork and outdoor learning Guided Questioning Group discussions	3
Unit 3	Tillage implements, primary and secondary tillage implements.	Problem-based learning: Fieldwork and outdoor learning Guided Questioning Group discussions	3
Unit 4	Implements for inter-cultural operations.	Problem-based learning: Fieldwork and outdoor learning Guided Questioning Group discussions	3
Unit 5	Seed drills, Calibration of seed drill, Paddy transplanters, Plant protection equipment, harvesting and threshing equipment.	Problem-based learning: Fieldwork and outdoor learning Guided Questioning Group discussions	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Study of different components of engines	Field work	BL2-Understand	2
Practical 2	Study of working of four stroke engines	Field work	BL2-Understand	2
Practical 3	Study of working of two stroke engines	Field work	BL2-Understand	2
Practical 4	Study of M.B. Plough, measurement of Plough size, different adjustments- horizontal and vertical suction.	Field work	BL2-Understand	2
Practical 5	Study of disc plough and also adjustments of disc plough.	Field work	BL2-Understand	2
Practical 6	Study of seed-cum-fertilizer drills: furrow opener, metering mechanism and calibration.	Field work	BL3-Apply	2
Practical 7	Study, maintenance and operation of tractor. Learning of tractor driving	Field work	BL3-Apply	2
Practical 8	Study of different inter-culture equipments in terms of efficiency. 9.	PBL	BL5-Evaluate	2

Part D(Marks Distribution)

BSc_HonsAgriculture

Title of the Course	Protected Cultivation And Secondary Agriculture
Course Code	AENG-321[T]

Part A

Year	3rd	**Semester**	6th	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** List out the importance of Protected cultivation and its scope in India. **(BL1-Remember)** **CO2-** Discuss various types of greenhouse structures **(BL2-Understand)** **CO3-** Apply the concept of protected cultivation in major crops of India. **(BL3-Apply)** **CO4-** Examine the basics of nursery management under protected structures. **(BL4-Analyze)** **CO5-** Evaluate the utility of different growing media and growing conditions under protected structures. **(BL5-Evaluate)** **CO6-** Create the budget and design for protected cultivation and structures. **(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction to Protected cultivation and Secondary Agriculture Importance and scope of protected cultivation Greenhouse effects and types of greenhouses	ABL, PBL, Guided learning and Field & outdoor Learning	3
Unit 2	Planning and design of greenhouses Components of greenhouse Orientations of Greenhouse Design and size of Greenhouse Load distribution Green house materials of construction for traditional and low- cost green houses.	ABL, PBL, Guided learning and Field & outdoor Learning	3
Unit 3	Irrigation under Protected Structures . Types of irrigation . Installation of Irrigation . Fertigation	ABL, PBL, Guided learning and Field & outdoor Learning	3
Unit 4	Cooling and Heating System Active heating and components Active Cooling system and Components Cost estimation and economic analysis of Greenhouse Important Engineering properties such as physical, thermal and aero & hydrodynamic properties of cereals, pulses and oilseed, their application in PHT equipment design and operation.	ABL, PBL, Guided learning and Field & outdoor Learning	3
Unit 5	Drying and dehydration: Moisture measurement, EMC, drying theory, various drying method, commercial grain dryer (deep bed dryer, flat bed dryer, tray dryer, fluidized bed dryer, recirculatory dryer and solar dryer), Material handling equipment; conveyer and elevators, their principle, working and selection	ABL, PBL, Guided learning and Field & outdoor Learning	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Greenhouse effects and types of greenhouses	Experiments	BL2-Understand	2
Practical 2	Greenhouse design and Concept of greenhouse orientation	Experiments	BL2-Understand	2
Practical 3	Load distribution under greenhouse design	Experiments	BL2-Understand	2
Practical 4	Greenhouse components and structures	Experiments	BL3-Apply	2
Practical 5	Visit to various Post Harvest Laboratories	Experiments	BL3-Apply	2
Practical 6	Determination of Moisture content of various grains by oven drying & infrared moisture methods.	Experiments	BL4-Analyze	2
Practical 7	Determination of Moisture content of various grains by moisture meter.	Experiments	BL4-Analyze	2
Practical 8	Field visit to seed processing plant or Storage structure	Field work	BL5-Evaluate	2

Part D(Marks Distribution)

BSc_HonsAgriculture

Title of the Course	Communication Skills and Personality Development
Course Code	AEXT-122[T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	AEXT111			**Co-Requisite/s**	AEXT112			
Course Outcomes & Bloom's Level	**CO1-** Remember various communication skills. **(BL1-Remember)** **CO2-** Understand the reading writing techniques of general and technical articles. **(BL2-Understand)** **CO3-** Apply the knowledge of domains and components in understanding the human behaviour. **(BL3-Apply)** **CO4-** Analyse the psychology of social interactions for ego and behaviour of communicator. **(BL4-Analyze)** **CO5-** Evaluate the role of writing skills in the overall personality development **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Communication skills; meaning and process of communication, verbal and nonverbal communication	Story telling, Critical reading and writing and talk & Presentations	3
Unit 2	: Listening and note taking, writing skills, oral presentation skills; field diary and lab record.	Story telling, Critical reading and writing and talk & Presentations	3
Unit 3	Structural and functional grammar, indexing, footnote and bibliographic procedures.	Story telling, Critical reading and writing and talk & Presentations	3
Unit 4	Reading and comprehension of general and technical articles, individual and group presentations, impromptu presentations, public speaking; group discussion,	Story telling, Critical reading and writing and talk & Presentations	3
Unit 5	Precise writing, summarizing, abstracting; organising seminars and conferences	Story telling, Critical reading and writing and talk & Presentations	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Verbal and nonverbal communication	Experiments	BL2-Understand	2
Practical 2	Bibliographic procedures	Experiments	BL3-Apply	2
Practical 3	Comprehension of general and technical articles	Experiments	BL3-Apply	2
Practical 4	Individual and group presentations, impromptu presentations	Experiments	BL4-Analyze	2
Practical 5	Public speaking; group discussion	Field work	BL4-Analyze	2
Practical 6	Precise writing	PBL	BL5-Evaluate	2
Practical 7	Organizing seminars and conferences	PBL	BL5-Evaluate	2
Practical 8	Organizing farm visits	PBL	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Entrepreneurship Development and Business Communication
Course Code	AEXT-311[T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of Agricultural Economics			**Co-Requisite/s**	Communication skills and Personality Development			
Course Outcomes & Bloom's Level	**CO1-** Remember the entrepreneurial and managerial attributes.**(BL1-Remember)** **CO2-** Describe the agri-preneurship, startups and commercialization**(BL2-Understand)** **CO3-** Apply the knowledge of entrepreneurial and managerial attributes for operating and managing an enterprise**(BL3-Apply)** **CO4-** Analyze the emerging domestic and international issues related to agriculture entrepreneurship**(BL4-Analyze)** **CO5-** Prepare their own project for establishing enterprises as trained entrepreneurs they would not seek the job, but give the job to others.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✓ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Concept of Entrepreneur, Entrepreneurship, Distinction between an Entrepreneur and a Manager ; Management – Levels & Functions of Management - planning-Organizing - Directing – motivation – ordering – leading – supervision-Communication and control. Characteristics of Entrepreneurs; Opportunities for entrepreneurship and rural entrepreneurship. Types of Entrepreneurs, Functions of Entrepreneurship	Content based instruction, Jigsaws, Cognitive learning, Group discussion	3
Unit 2	Agri –Entrepreneurship - Concept, Need and Scope. Assessing overall business environment in Indian economy; Globalization and the emerging business entrepreneurial Environment.	Content based instruction, Jigsaws, Cognitive learning, Group discussion	3
Unit 3	Entrepreneurship Development Programmes (EDPs) – Objectives, Phases, Problems of EDPs, Entrepreneurial behavior and Role of Achievement Motivation, Factors Affecting Entrepreneurship Development; Generation, Incubation and Commercialization of Business Ideas. Environment scanning and opportunity identification, Researching / Managing Competition - Ways to define possible Competitors.	Content based instruction, Jigsaws, Cognitive learning, Group discussion	3
Unit 4	Globalization and the emerging business entrepreneurial environment; Role of ED in economic development of a country- Overview of Indian social, political systems and their implications for decision making by individual entrepreneurs SWOT Analysis - Concept, Meaning and Advantages. Government Policies, Incentives, Programmes and Schemes for Entrepreneurship Development; Export and Import Policies relevant to Indian Agriculture Sector. Institutional Support - Financial Institutions and other agencies in entrepreneurship development. Venture capital (VC), contract farming (CF) and joint ventures (JV), Public-private partnerships (PPP); Overview of agricultural Input industry – Seed, Fertilizer, Pesticides, Farm Machinery, Agricultural Food Processing Industry.	Content based instruction, Jigsaws, Cognitive learning, Group discussion	3
Unit 5	Definition of business; Stakeholders in business; Stages of Indian business; Importance of agribusiness in Indian economy; Business Communication for Public Relation , Advertisement and crisis communication. Social responsibility of business. Morals and ethics in enterprise management Assessment of Entrepreneurship skills, Business Leadership Skills. Communication Skills for entrepreneurship development, Developing organizational skill, Managerial skills, Problem solving skill and Time management skills	Content based instruction, Jigsaws, Cognitive learning, Group discussion	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Field Visits to study any one Agri - based industries / business – Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis	Industrial Visit	BL2-Understand	2
Practical 2	Constraints in setting up of agro based industries.	Field work	BL3-Apply	2
Practical 3	Formulation of project feasibility reports; industrial and agribusiness Houses	PBL	BL4-Analyze	2
Practical 4	Characteristics of Successful Agripreneurs, any one of the Local Financial Institutions to study the MSME Policies.	PBL	BL4-Analyze	2
Practical 5	Visit to Entrepreneurial Development Institute to study the Process of Entrepreneurship Development	Industrial Visit	BL3-Apply	2
Practical 6	Carrying out the SWOT Analysis of nearby Successful Enterprises.	Experiments	BL5-Evaluate	3
Practical 7	Visit to nearest Agri - Clinic and Agri - Business Centre if any.	Industrial Visit	BL2-Understand	3

BSc_HonsAgriculture

Title of the Course	Crop Production Technology-I (Kharif crops)
Course Code	AGRON- 211[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of Agronomy			**Co-Requisite/s**	Introductory Agro-meteorology & Climate Change			
Course Outcomes & Bloom's Level	**CO1-** Describe the nutraceuticals values and economic importance of various Kharif agricultural crops**(BL1-Remember)** **CO2-** Understand the soil and climatic requirements of different Kharif crops**(BL2-Understand)** **CO3-** Demonstrate the nursery preparation and transplanting in rice**(BL3-Apply)** **CO4-** Examine the impact of various biotic and abiotic stress on the productivity of different crops**(BL4-Analyze)** **CO5-** Determine the cost of cultivation of different crops**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif Cereals crops, viz., rice, maize, sorghum, pearl millet and finger millet, pulses-pigeonpea, mungbean and urdbean; oilseeds-groundnut, and soybean; fibre crops- cotton & jute; forage crops-sorghum, cowpea, cluster bean and napier	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	6
Unit 2	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif pulses crops, viz., pigeonpea, mungbean and urdbean	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	6
Unit 3	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif oilseeds crops, viz., groundnut, and soybean	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	6
Unit 4	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif fibre crops, viz., cotton & jute	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	6
Unit 5	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif forage crops, viz., sorghum, cowpea, cluster bean and napier grass	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Sowing and transplanting methods of rice	Field work	BL2-Understand	2
Practical 2	Sowing methods of different Kharif crops	Field work	BL2-Understand	2
Practical 3	Identification of weeds in kharif season crops	Field work	BL3-Apply	2
Practical 4	Study of morphological characteristics of kharif crops	Field work	BL3-Apply	2
Practical 5	Study of yield contributing characters of kharif season crops	Field work	BL4-Analyze	2
Practical 6	Yield and protein percent analysis of green gram and black gram	Field work	BL4-Analyze	2
Practical 7	Study of important agronomic experiments of kharif crops at experimental farms.	Field work	BL5-Evaluate	2
Practical 8	Visit to research stations of related crops	PBL	BL5-Evaluate	2

Part D(Marks Distribution)

Theory

Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Crop Production Technology - II (Rabi crops)
Course Code	AGRON- 221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of Agronomy			**Co-Requisite/s**	Crop Production Technology - I (Kharif crops)			
Course Outcomes & Bloom's Level	**CO1-** Describe the basic concepts of cultivation practices and post-harvest technologies of different Rabi crops**(BL1-Remember)** **CO2-** Explain steps involved in preparation of field outline, crop production and management **(BL2-Understand)** **CO3-** Apply the principles and concepts of agronomy on the field to improve the crop productivity and resource use efficiency **(BL3-Apply)** **CO4-** Investigate the role of different agricultural inputs on yield the quality of different Rabi crops **(BL4-Analyze)** **CO5-** Assess the economic viability of different methods and technologies in different cropping system **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG12(Responsible consuption and production) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Rabi cereals crops, viz., Wheat and Barley	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	3
Unit 2	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Rabi pulses crops, viz., chickpea, Lentil, Peas	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	3
Unit 3	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of rabi oilseeds crops, viz., Rapeseed, Mustard and Sunflower	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	3
Unit 4	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of rabi sugar crop viz., Sugarcane	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	3
Unit 5	Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of rabi forage crops viz., Berseem, Lucerne and Oat	Problem-based learning: Fieldwork and outdoor learning Guided Questioning	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Sowing methods of wheat and sugarcane	Field work	BL2-Understand	2
Practical 2	Identification of weeds in rabi season crops	Field work	BL2-Understand	2
Practical 3	Study of morphological characteristics of rabi crops	Field work	BL3-Apply	2
Practical 4	Study of yield contributing characters of rabi season crops	Field work	BL3-Apply	2
Practical 5	Yield and juice quality analysis of sugarcane	Field work	BL4-Analyze	2
Practical 6	Study of important agronomic experiments of rabi crops at experimental farms	Field work	BL4-Analyze	2
Practical 7	Study of oil extraction of medicinal crops	Field work	BL5-Evaluate	2
Practical 8	Visit to research stations of related crops	Field work	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Fundamental of Agronomy
Course Code	AGRON-111 [T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Science and Biology at secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Define the importance and scope of agronomy in relation to agricultural crop production **(BL1-Remember)** **CO2-** Explain various types of agricultural inputs, which required for crop cultivation **(BL2-Understand)** **CO3-** Calculate the required amount/number of various crop production factors (i.e., seed rate, fertilizers, agrochemicals, plant population) for specific land area **(BL3-Apply)** **CO4-** Analyse the role of various intercultural operations with reference to crop yield and its contributing traits **(BL4-Analyze)** **CO5-** Evaluate the effect of various production factors on overall crop production **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Agronomy and its scope, seeds and sowing, tillage and tilth, crop density and geometry, Crop nutrition, manures and fertilizers, nutrient use efficiency.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	9
Unit 2	water resources, soil plant water relationship, crop water requirement, water use efficiency, irrigation-scheduling criteria and methods, quality of irrigation water, water logging.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	9
Unit 3	Weeds- importance, classification, crop weed competition, concepts of weed management principles and methods. herbicides- classification, selectivity and resistance, allelopathy.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	10
Unit 4	Growth and development of crops, factors affecting growth and development, plant ideotypes, crop rotation and its principles.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	10
Unit 5	Adaptation and distribution of crops, crop management technologies in problematic areas, harvesting and threshing of crops.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Identification of crops and seeds,	Experiments	BL2-Understand	2
Practical 2	Identification of fertilizers, pesticides and tillage implements,	Experiments	BL2-Understand	2
Practical 3	Methods of herbicide and fertilizer application	Experiments	BL2-Understand	2
Practical 4	Study of yield contributing characters and yield estimation,	Experiments	BL3-Apply	2
Practical 5	Seed germination and viability test,	Experiments	BL3-Apply	2
Practical 6	Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement,	Experiments	BL4-Analyze	2
Practical 7	Study of soil moisture measuring devices,	Field work	BL4-Analyze	2
Practical 8	Measurement of field capacity, bulk density and infiltration rate,	Field work	BL5-Evaluate	2

Part D(Marks Distribution)

Modules	Contents	Pedagogy	Hours

<4d style="border: 1px solid black;">Field work

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	To study about the field preparation, seed rate and sowing	Field work	BL2-Understand	4
Practical 2	To calculate fertilizer requirement for different kharif crops	Field work	BL2-Understand	4
Practical 3	To study about the time and methods of fertilizer application in kharif Crops	Field work	BL2-Understand	4
Practical 4	To study about the water management in different kharif crops	Field work	BL2-Understand	4
Practical 5	To study about the Weed management in kharif crops	Field work	BL3-Apply	4
Practical 6	To study about the methods of weed control and calculate the weed control efficiency for different kharif crops	Field work	BL3-Apply	4
Practical 7	To study about the Harvesting threshing and storage	Field work	BL4-Analyze	4
Practical 8	Preparation of Balance Sheet Including Cost of Cultivation, Net Returns per Student as well as per Team of a Group of Students	BL5-Evaluate	4	

Part D(Marks Distribution)

BSc_HonsAgriculture

Title of the Course	Rainfed Agriculture and Watershed Management
Course Code	AGRON-321[T]

Part A

Year	3rd	**Semester**	6th	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** Study the concepts of watershed management and its effect on land, water and ecosystem resources **(BL1-Remember)** **CO2-** Understand public policies and practices of watershed planning **(BL2-Understand)** **CO3-** Apply the principles and concepts in the field to conserve water resources and improve the crop productivity in Rainfed ecosystems **(BL3-Apply)** **CO4-** Analyse the impact of watershed planning through case studies **(BL4-Analyze)** **CO5-** Assess control and mitigation techniques for watershed problem **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Rainfed agriculture: Introduction, types, History of rainfed agriculture & watershed in India. Problems and prospects of rainfed agriculture in India . Soil and climatic conditions prevalent in rainfed areas.	Cooperative Learning Strategies, Case studies, outdoor learning and project management	3
Unit 2	Drought: types, effect of water deficit on physio- morphological characteristics of the plants, Mechanism of crop adaptation under moisture deficit condition.	Cooperative Learning Strategies, Case studies, outdoor learning and project management	3
Unit 3	Water harvesting: importance, its techniques. Efficient utilization of water through soil and crop management practices, Management of crops in rainfed areas.	Cooperative Learning Strategies, Case studies, outdoor learning and project management	3
Unit 4	Contingent crop planning for aberrant weather conditions, Concept, objective, principles and components of watershed management, factors affecting watershed management.	Cooperative Learning Strategies, Case studies, outdoor learning and project management	3
Unit 5	Crop adaptation and mitigation to drought; Mulching and its importance, Evapo-transpiration and method of reduction it	Cooperative Learning Strategies, Case studies, outdoor learning and project management	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Studies on climate classification, studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons.	Experiments	BL2-Understand	2
Practical 2	Studies on cropping pattern of different dry land areas in the country	Experiments	BL2-Understand	2
Practical 3	Demarcation of dry land area on map of India.	Experiments	BL3-Apply	2
Practical 4	Interpretation of meteorological data	Experiments	BL3-Apply	2
Practical 5	Scheduling of supplemental irrigation on the basis of evapo-transpiration demand of crops.	Experiments	BL3-Apply	2
Practical 6	Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation.	Experiments	BL4-Analyze	2
Practical 7	Studies on cultural practices viz. mulching, plant density, depth of sowing, thinning and leaf removal for mitigating moisture stress.	Experiments	BL4-Analyze	2
Practical 8	Characterization and delineation of model watershed.	Experiments	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Principal Of Organic Farming
Course Code	AGRON-322[T]

Part A

Year	3rd	**Semester**	6th	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** Describe the principles and scopes of organic farming. **(BL1-Remember)** **CO2-** Explain the concept of organic ecosystem; and organic nutrient resources and its fortification **(BL2-Understand)** **CO3-** Demonstrate the restrictions to nutrient use in organic farming. **(BL3-Apply)** **CO4-** Analyse the certification process and standards of organic farming. **(BL4-Analyze)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Organic farming, principles and its scope in India; Initiatives taken by Government (central/state), NGOs and other organizations for promotion of organic agriculture.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	3
Unit 2	Organic ecosystem and their concepts; Organic nutrient resources and its fortification.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	3
Unit 3	Restrictions to nutrient use in organic farming; Choice of crops and varieties in organic farming.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	3
Unit 4	Fundamentals of insect, pest, disease and weed management under organic mode of production; Operational structure of NPOP	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	3
Unit 5	Certification process and standards of organic farming; Processing, leveling, economic considerations and viability, marketing and export potential of organic products.	Cooperative Learning Strategies (CLS), Stimulus activities, Guided Questioning and Field trials	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Preparation of enrich compost and their quality analysis.	Experiments	BL2-Understand	2
Practical 2	Preparation of vermi-compost and their quality analysis.	Experiments	BL2-Understand	2
Practical 3	Preparation of bio-fertilizers and their quality analysis.	Experiments	BL2-Understand	2
Practical 4	Preparation of bio-inoculants and their quality analysis.	Experiments	BL2-Understand	2
Practical 5	Indigenous technical knowledge (ITK) for nutrient, insect, pest disease and weed management.	Experiments	BL3-Apply	2
Practical 6	Cost of organic production system.	Field work	BL3-Apply	2
Practical 7	Post harvest management. Quality aspect, grading, packaging and handling.	Field work	BL4-Analyze	2
Practical 8	Visit of organic farms to study the various components and their utilization.	Field work	BL5-Evaluate	2

Part D(Marks Distribution)

BSc_HonsAgriculture

Title of the Course	Live-stock and Poultry Management
Course Code	AHS- 211[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Biology at secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Describe the principles of Livestock production and management **(BL1-Remember)** **CO2-** Understand the various concepts and procedures of livestock and poultry management **(BL2-Understand)** **CO3-** Organize the livestock and poultry farms in sustainable and efficient manner **(BL3-Apply)** **CO4-** Analyze the various challenges/problems of livestock and poultry management and suggest the appropriate solution for them **(BL4-Analyze)** **CO5-** Evaluate the impact of livestock and poultry on sustainable integrated farming systems **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG6(Clean water and sanitation) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Role of live-stock in the national economy. Important Indian and exotic breeds of cattle, buffalo, sheep, goat, swine and poultry.	Fieldwork and outdoor learning, Problem-based learning, Brainstorming and Group discussion	9
Unit 2	Management of calves, growing heifers and milch animals. Digestion in livestock. Classification of feedstuffs. Proximate principles of feed. Nutrients and their functions. Feed ingredients for ration for livestock. Feed supplements and feed additives. Feeding of live-stock.	Fieldwork and outdoor learning, Problem-based learning, Brainstorming and Group discussion	9
Unit 3	Incubation, hatching and brooding. Management of growers and layers. Digestion in poultry. Classification of feedstuffs. Proximate principles of feed. Nutrients and their functions. Feed ingredients for ration for poultry. Feed supplements and feed additives. Feeding of poultry.	Fieldwork and outdoor learning, Problem-based learning, Brainstorming and Group discussion	10
Unit 4	Housing principles, space requirements for different species of livestock and poultry.	Fieldwork and outdoor learning, Problem-based learning, Brainstorming and Group discussion	10
Unit 5	Introduction of live-stock and poultry diseases. Prevention (including vaccination schedule) and control of important diseases of livestock and poultry.	Fieldwork and outdoor learning, Problem-based learning, Brainstorming and Group discussion	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Familiarizing with body points/parts of different domesticated animals and poultry	Field work	BL2-Understand	2
Practical 2	Approaching, handling methods of restraining	Field work	BL2-Understand	2
Practical 3	Identification methods of farm animals and poultry (branding, tattooing, notching & tagging).	Field work	BL4-Analyze	2
Practical 4	A visit to the live-stock and poultry farms	Field work	BL2-Understand	2
Practical 5	Identification of various breeds and familiarizing with various farm routines and farm records	Field work	BL3-Apply	2
Practical 6	Judging of cattle, buffalo and poultry	Field work	BL3-Apply	2
Practical 7	Culling of live-stock and poultry	Field work	BL4-Analyze	2
Practical 8	Layout plans for different live-stock and Poultry houses	Field work	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Fundamental of Plant Biochemistry and Biotechnology
Course Code	BIOCHEM-BT-111 [T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Science and biology in secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Describe the role and importance of various biomolecules in sustaining the life **()** **CO2-** Explain the metabolic processes involving different bio-molecules **(BL2-Understand)** **CO3-** Apply the various concepts biotechnology in crop plant improvement **(BL3-Apply)** **CO4-** Analyse the different biomolecules in agricultural samples using different biochemical techniques **(BL4-Analyze)** **CO5-** Evaluate the role of biomolecules in affecting the nutritional quality and productivity of agricultural crops **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Importance of Biochemistry. Properties of Water, pH and Buffer. Carbohydrate: Importance and classification. Structures of Monosaccharides, Reducing and oxidizing properties of Monosaccharides, Mutarotation; Structure of Disaccharides and Poly saccharides. Metabolism of carbohydrates: Glycolysis, TCA cycle, Glyoxylate cycle, Electron transport chain.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	6
Unit 2	Lipid: Importance and classification; Structures and properties of fatty acids; storage lipids and membrane lipids. Metabolism of lipids: Beta oxidation, Biosynthesis of fatty acids. Proteins: Importance of proteins and classification; Structures, titration and zwitterions nature of amino acids; Structural organization of proteins	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and BrainstormingGuided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstormingignment, Classroom teaching, PPT Presentation, Quiz, Seminar, debate, Assignment, Extempore, Group discussions	6
Unit 3	Enzymes: General properties; Classification; Mechanism of action; Michaelis & Menten and Line Weaver Burk equation & plots; Introduction to allosteric enzymes. Nucleic acids: Importance and classification; Structure of Nucleotides, A, B & Z DNA; RNA: Types and Secondary & Tertiary structure.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	6
Unit 4	Concepts and applications of plant biotechnology: Scope, organ culture, embryo culture, cell suspension culture, callus culture, anther culture, pollen culture and ovule culture and their applications Micropropagation methods; organogenesis and embryogenesis, Synthetic seeds and their significance; Embryo rescue and its significance; somatic hybridization and cybrids; Somaclonal variation and its use in crop improvement; cryo-preservation.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	6
Unit 5	Introduction to recombinant DNA methods: physical (Gene gun method), chemical (PEG mediated) and Agrobacterium mediated gene transfer methods; Transgenics and its importance in crop improvement; PCR techniques and its applications; RFLP, RAPD, SSR; Marker Assisted Breeding in crop improvement; Biotechnology regulations.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Study of safety measures and Laboratory Instruments	Experiments	BL2-Understand	2
Practical 2	Preparation of Solution	Experiments	BL2-Understand	2
Practical 3	Qualitative Analysis of Carbohydrates	Experiments	BL3-Apply	2
Practical 4	Qualitative analysis of Protein	Experiments	BL4-Analyze	2
Practical 5	Qualitative Analysis of Lipids	Experiments	BL5-Evaluate	2
Practical 6	Study of Sterilization Techniques	Experiments	BL3-Apply	2
Practical 7	Study of composition of various tissue culture media	Experiments	BL4-Analyze	2
Practical 8	Demonstration on isolation of DNA.	Experiments	BL6-Create	2

BSc_HonsAgriculture

Title of the Course	Introductory Biology
Course Code	CP-111 [T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					1	0	1	2
Course Type	Embedded theory and lab							
Course Category	Basic Sciences and Mathematics							
Pre-Requisite/s	Biology at secondary level			**Co-Requisite/s**	Agriculture at secondary level			
Course Outcomes & Bloom's Level	**CO1-** Describe basic biological concepts of living organism **(BL1-Remember)** **CO2-** Explain the origin and diversity of life on Earth and the evolutionary progression **(BL2-Understand)** **CO3-** Demonstrate species richness in various plant families **(BL3-Apply)** **CO4-** Analyse levels of organization and related functions in plants and animals**(BL4-Analyze)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction to the living world. Diversity and characteristics of life, Origin of life, Evolution and Eugenics.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	3
Unit 2	Binomial nomenclature and classification, Cell and cell division.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	3
Unit 3	Morphology of flowering plants. Seed and seed germination.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	3
Unit 4	Plant systematic-viz. Brassicaceae, Fabaceae and Poaceae.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	3
Unit 5	Role of animals in agriculture.	Guided Questioning, Fieldwork and outdoor learning, Problem-based learning and Brainstorming	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Morphology of lowering plants - root, and their modifications	Experiments	BL2-Understand	2
Practical 2	Morphology of lowering plants - Stem and their modifications	Experiments	BL2-Understand	2
Practical 3	Morphology of lowering plants - leaf and their modifications	Experiments	BL2-Understand	2
Practical 4	Morphology of lowering plants - Inflorescence, flower and fruits.	Experiments	BL2-Understand	2
Practical 5	Cell. Tissues & cell division	Experiments	BL3-Apply	2
Practical 6	Internal structure of root, stem and leaf.	Experiments	BL3-Apply	2
Practical 7	Study of specimens and slides.	Experiments	BL4-Analyze	2
Practical 8	Description of plants- Brassicaceae, Fabaceae and Poaceae	Experiments	BL4-Analyze	2

BSc_HonsAgriculture

Title of the Course	Agribusiness Management
Course Code	ELCT-AE-221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Agriculture Economics business management			**Co-Requisite/s**	Agriculture Economics business management			
Course Outcomes & Bloom's Level	**CO1-** Remember various functions of management**(BL1-Remember)** **CO2-** Describe agribusiness, its concepts and value addition chain**(BL2-Understand)** **CO3-** Apply the knowledge of management functions in establishing and running agribusiness profitably. **(BL3-Apply)** **CO4-** Analyse agri-business situations, implement plans and manage strategic change**(BL4-Analyze)** **CO5-** Appraise the projects for their economic feasibility and profitability**(BL5-Evaluate)** **CO6-** Prepare profitable agribusiness projects with capital and market management**(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG4(Quality education) SDG8(Decent work and economic growth)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Management: Functions, roles & activities, Organization culture. Planning, meaning, definition, types of plans. Purpose or mission, goals or objectives, Strategies, polices procedures, rules, programs and budget. Components of a business plan, Steps in planning and implementation. Organization staffing, directing and motivation. Ordering, leading, supervision, communications, control.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Report writing Economic model.	6
Unit 2	Agribusiness: Transformation of agriculture into agribusiness, various stakeholders and components of agribusiness systems. Importance of agribusiness in the Indian economy and New Agricultural Policy. Distinctive features of Agribusiness Management: Importance and needs of agro-based industries, Classification of industries and types of agro based industries. Institutional arrangement, procedures to set up agro based industries. Constraints in establishing agro-based industries.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Report writing Economic model.	6
Unit 3	Agri-value chain: Understanding primary and support activities and their linkages. Business environment: PEST & SWOT analysis.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Report writing Economic model.	6
Unit 4	Capital Management and Financial management of Agribusiness: Financial statements and their importance. Marketing Management: Segmentation, targeting & positioning. Marketing mix and marketing strategies. Consumer behaviour analysis, Product Life Cycle (PLC):. Sales & Distribution Management. Pricing policy, various pricing methods.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Report writing Economic model.	7
Unit 5	Project Management: definition, project cycle, identification, formulation, appraisal, implementation, monitoring and evaluation. Project Appraisal and evaluation techniques. Undiscounted measures and decision rules. PBP ROR, and discounted measures and decision rules NPW, BCR, IRR, N/K ratio, Sensitivity analysis.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Report writing Economic model.	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Practical Study of agri-input markets: Seed, fertilizers, pesticides.	Field work	BL2-Understand	2
Practical 2	Study of output markets: grains, fruits, vegetables, flowers	Field work	BL2-Understand	2
Practical 3	Study of product markets, retails trade commodity trading, and value added products.	Field work	BL2-Understand	2
Practical 4	Study of financing institutions- Cooperative, Commercial banks, RRBs,	Field work	BL2-Understand	2
Practical 5	Agribusiness Finance Limited, NABARD	Field work	BL3-Apply	2
Practical 6	Preparations of projects and Feasibility reports for agribusiness entrepreneur	Field work	BL4-Analyze	2
Practical 7	Appraisal/evaluation techniques of identifying viable project- Non-discounting techniques	Field work	BL4-Analyze	2
Practical 8	Case study of agro-based industries	Field work	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Artificial Intelligence
Course Code	ELCT-AENG-311[T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					2	0	0	2
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	Agriculture Engineering			**Co-Requisite/s**	Agriculture Engineering			
Course Outcomes & Bloom's Level	**CO1-** Remember the LIPS and PROLOG. **(BL1-Remember)** **CO2-** Describe A and AO logarithm**(BL2-Understand)** **CO3-** Apply the knowledge of LIPS and PROLOG in constructing symbolic grammars for natural language that would be used to construct logical representations of sentences. **(BL3-Apply)** **CO4-** Analyse the uncertainty on the basis of probabilistic interferences. **(BL4-Analyze)** **CO5-** Prepare the robot with artificial intelligence. **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✓ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG4(Quality education) SDG8(Decent work and economic growth) SDG12(Responsible consuption and production) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Foundation and history of artificial intelligent, problems and techniques AI programming languages, introduction to LISP and PROLOG- problem spaces and searches, blind search strategies, Breadth first- Depth first- heuristic search techniques	Class room teaching (chalk-board), Power Point Presentations, ABL activities, Assignments, Quiz.	6
Unit 2	Hill climbing: best first-A* algorithm AO* algorithm- game tree, Min max algorithms, game playing- alpha beta pruning. Knowledge representation issues, predicate logic- logic programming, semantic nets- frames and inheritance, constraint propagation, representing knowledge using rules, rules based deduction systems.	Class room teaching (chalk-board), Power Point Presentations, ABL activities, Assignments, Quiz.	6
Unit 3	Reasoning under uncertainity, review of probability, Bay;s probabilistic interferences and Dempster shafer theory, Heuristic methods, symbolic reasoning under uncertainty, Statistical reasoning, Fuzzy reasoning, Temporal reasoning, Non monotonic reasoning.	Class room teaching (chalk-board), Power Point Presentations, ABL activities, Assignments, Quiz.	6
Unit 4	Planning and planning in situational calculus, representation for planning, partial order planning algorithm, learning from examples, discovery as learning, learning by analogy, explanation based learning, neural nets, genetic algorithms.	Class room teaching (chalk-board), Power Point Presentations, ABL activities, Assignments, Quiz.	7
Unit 5	Principles of Natural language processing, rule based systems architecture, Expert systems, knowledge acquisition concepts, AI application to robotics, and current trends in intelligent systems.	Class room teaching (chalk-board), Power Point Presentations, ABL activities, Assignments, Quiz.	7

BSc_HonsAgriculture

Title of the Course	System Simulation And Agro-Advisory
Course Code	ELCT-AEXT-321[T]

Part A

Year	3rd	**Semester**	6th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline-linked Engineering Science Courses							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** Describe the basic concepts of various System simulation tools and techniques used in agriculture fields**(BL1-Remember)** **CO2-** Compare the various simulation systems with their pros and cons**(BL2-Understand)** **CO3-** Demonstrate the use of various software for crop modelling, weather forecasting, dissemination of agroadvisory**(BL3-Apply)** **CO4-** Analyse the results obtained from different simulation systems with scientific interpretation**(BL4-Analyze)** **CO5-** Assess the suitability of different systems in optimum crop modelling diseases forecasting and weather forecasting**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	System Approach for representing soil-plant-atmospheric continuum, system boundaries, Crop models, concepts & techniques, types of crop models, data requirements, and relational diagrams.	Classroom teaching with AV aids, Activity based learning using different tools, Flipped classes teaching model, Collaborative learning Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Unannounced test, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 2	Evaluation of crop responses to weather elements; Elementary crop growth models; calibration, validation, verification and sensitivity analysis. Potential and achievable crop production- concept and modelling techniques for their estimation	Classroom teaching with AV aids, Activity based learning using different tools, Flipped classes teaching model, Collaborative learning Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Unannounced test, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 3	Crop production in moisture and nutrients limited conditions; components of soil water and nutrients balance.	Classroom teaching with AV aids, Activity based learning using different tools, Flipped classes teaching model, Collaborative learning Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Unannounced test, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 4	Weather forecasting, types, methods, tools & techniques, forecast verification; Value added weather forecast, ITK for weather forecast and its validity	Classroom teaching with AV aids, Activity based learning using different tools, Flipped classes teaching model, Collaborative learning Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Unannounced test, Seminars with open discussions, Group discussions or debate, Quiz	7
Unit 5	Crop-Weather Calendars; Preparation of agro-advisory bulletin based on weather forecast. Use of crop simulation model for preparation of Agro-advisory and its effective dissemination.	Classroom teaching with AV aids, Activity based learning using different tools, Flipped classes teaching model, Collaborative learning Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Unannounced test, Seminars with open discussions, Group discussions or debate, Quiz	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Preparation of crop weather calendars	Experiments	BL2-Understand	2
Practical 2	Preparation of agro-advisories based on weather forecast using various approaches and synoptic charts.	Experiments	BL2-Understand	2
Practical 3	Working with statistical and simulation models for crop growth	Experiments	BL2-Understand	2
Practical 4	Potential & achievable production; yield forecasting, insect & disease forecasting models.	Experiments	BL3-Apply	2
Practical 5	Simulation with limitations of water and nutrient management options	Simulation	BL3-Apply	2
Practical 6	Sensitivity analysis of varying weather and crop management practices.	Experiments	BL4-Analyze	2
Practical 7	Use of statistical approaches in data analysis and preparation of historical, past and present meteorological data for medium range weather forecast	Experiments	BL4-Analyze	2
Practical 8	Feedback from farmers about the agro advisory	Field work	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Processing Technology of Cereals
Course Code	ELCT-FST-221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Fundamentals of Food Technology			**Co-Requisite/s**	Fundamentals of Horticulture			
Course Outcomes & Bloom's Level	**CO1-** Memorize the morphology, composition and nutritive value**(BL1-Remember)** **CO2-** Describe the milling of cereals**(BL2-Understand)** **CO3-** Demonstrate cereal based processed products**(BL3-Apply)** **CO4-** Use the cereal-based by-products**(BL4-Analyze)** **CO5-** Analyses cereal based secondary and tertiary processing**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Present status and future prospects of cereals and millets; Morphology, physico-chemical properties of cereals, major and minor millets; Chemical composition and nutritive value	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 2	Paddy processing and rice milling: Conventional milling, modern milling, milling operations, milling machines, milling efficiency; Quality characteristics influencing final milled product; Parboiling; Rice bran stabilization and its methods	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 3	Wheat milling: Break system, purification system and reduction system; extraction rate and its effect on flour composition; quality characteristics of flour and their suitability for baking	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 4	Corn milling: Dry and wet milling of corn, starch and gluten separation, milling fractions and modified starches; Barley: Malting and milling; Oat/Rye: Processing, milling; Sorghum: Milling, malting, pearling; Millets (Pearl millets, finger millets): Processing of millets for food uses	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	6
Unit 5	Secondary and tertiary products processing of cereals and millets; By-products processing of cereals and millets; Processing of infant foods from cereals and millets; Breakfast cereal foods: Flaked, puffed, expanded, extruded and shredded	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	8

M

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Morphological characteristics of cereals	Experiments	BL2-Understand	2
Practical 2	Physical properties of cereals	Experiments	BL2-Understand	2
Practical 3	Chemical properties of cereals	Experiments	BL2-Understand	2
Practical 4	Cooking quality of rice	Experiments	BL3-Apply	2
Practical 5	Conditioning and milling of wheat	Experiments	BL3-Apply	2
Practical 6	Production of sorghum flakes and sorghum malt	Experiments	BL3-Apply	2
Practical 7	Determination of gelatinization temperature	Experiments	BL4-Analyze	2
Practical 8	Processing of value added products from millets	PBL	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Processing Technology of Fruits and Vegetables
Course Code	ELCT-FST-311[T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Horticulture			**Co-Requisite/s**	Horticulture			
Course Outcomes & Bloom's Level	**CO1-** State the production, processing status and supply chain of fruits and vegetables **(BL1-Remember)** **CO2-** Explain the basic processing methods of processing and canning **(BL2-Understand)** **CO3-** Use the processing methods for formulation of the products from fruits and vegetables **(BL3-Apply)** **CO4-** Examine the specifications for different processed products formulated by regulatory bodies **(BL4-Analyze)** **CO5-** Judge the Preparation, preservation and machines for manufacturing different processed products **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG4(Quality education) SDG8(Decent work and economic growth) SDG12(Responsible consuption and production) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Production and processing scenario of fruits and vegetables in India and world; Scope of fruit and vegetable processing industry in India. Overview of principles and preservation methods of fruits and vegetables; Supply chain of fresh fruits and vegetables.	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	3
Unit 2	Primary processing and pack house handling of fruits and vegetables. Peeling, slicing, cubing, cutting and other size reduction operations for fruits and vegetables. Minimal processing of fruits and vegetables; Blanching operations and equipment. Canning: Definition, processing steps, and equipment, cans and containers, quality assurance and defects in canned products.	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	3
Unit 3	FSSAI specifications and preparation and preservation of juices, squashes, syrups, sherbets, nectars, cordials, etc. Processing and equipment for above products; FSSAI specifications;	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	3
Unit 4	Preparation, preservation and machines for manufacture of crystallized fruits and preserves, jam, jelly and marmalades, candies, Preparation, preservation and machines for manufacture of chutney, pickles, sauce, puree, paste, ketchup; toffee, cheese, lather, dehydrated, wafers and papads, soup powders.	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	3
Unit 5	Production of pectin and vinegar; Commercial processing technology of selected fruits and vegetables for production of various value-added processed products	Activity based learning using different tools, Flipped classes teaching model, Collaborative learning, Socratic method of teaching, Power Point Presentations, ABL activities, Field demonstration of cultivation practices, Assignment, Seminars with open discussions, Group discussions or debate, Quiz	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	To Primary processing of selected fruits and vegetables.	Experiments	BL2-Understand	2
Practical 2	Preparation of RTS and syrups.	Experiments	BL2-Understand	2
Practical 3	Preparation of dried onion	Experiments	BL3-Apply	2
Practical 4	Preparation of pickles.	Experiments	BL4-Analyze	2
Practical 5	Preparation of pectin.	Experiments	BL4-Analyze	2
Practical 6	Preparation of jelly	Experiments	BL4-Analyze	2
Practical 7	Preparation of marmalade	Experiments	BL4-Analyze	2
Practical 8	Visit to food processing unit	Experiments	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Commercial Plant Breeding
Course Code	ELCT-GPB-311[T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					1	0	2	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Genetics and Plant Breeding			**Co-Requisite/s**	Genetics and Plant Breeding			
Course Outcomes & Bloom's Level	**CO1-** Describe the breeding techniques for commercial production of seed **(BL1-Remember)** **CO2-** Classify the seed production systems through the breeding techniques **(BL2-Understand)** **CO3-** Demonstrate various methods of Commercial breeding techniques at field and laboratory levels **(BL3-Apply)** **CO4-** Analyse various techniques and the effectiveness of breeding techniques utilized at commercial level. **(BL4-Analyze)** **CO5-** Assess the quality of the seed and Judge the performance of high yielding and resistance varieties of different crops **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG10(Reduced inequalities) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Types of crops and modes of plant reproduction. Line development and maintenance breeding in self and cross pollinated crops (A/B/R and two line system) for development of hybrids and seed production.	Class room Lectures/ Guest lectures, Laboratory/ Field and lab Practicals, Student Seminars/ Presentations, ABL activities, Lab and field Tours/ Demonstrations, Assignments.	3
Unit 2	Genetic purity test of commercial hybrids. Advances in hybrid seed production of maize, rice, sorghum, pearl millet, castor, sunflower, cotton pigeon pea, Brassica etc.	Class room Lectures/ Guest lectures, Laboratory/ Field and lab Practicals, Student Seminars/ Presentations, ABL activities, Lab and field Tours/ Demonstrations, Assignments.	3
Unit 3	Quality seed production of vegetable crops under open and protected environment. Alternative strategies for the development of the line and cultivars: haploid inducer, tissue culture techniques and biotechnological tools.	Class room Lectures/ Guest lectures, Laboratory/ Field and lab Practicals, Student Seminars/ Presentations, ABL activities, Lab and field Tours/ Demonstrations, Assignments.	3
Unit 4	IPR issues in commercial plant breeding: DUS testing and registration of varieties under PPV & FR Act. Variety testing, release and notification systems in India.	Class room Lectures/ Guest lectures, Laboratory/ Field and lab Practicals, Student Seminars/ Presentations, ABL activities, Lab and field Tours/ Demonstrations, Assignments.	3
Unit 5	Principles and techniques of seed production, types of seeds, quality testing in self and cross pollinated crops.	Class room Lectures/ Guest lectures, Laboratory/ Field and lab Practicals, Student Seminars/ Presentations, ABL activities, Lab and field Tours/ Demonstrations, Assignments.	3

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Understanding the difficulties in hybrid seed production, Tools and techniques for optimizing hybrid seed production	Experiments	BL2-Understand	2
Practical 2	Floral biology of self and cross pollinated species, selfing and crossing techniques.	Field work	BL2-Understand	2
Practical 3	Techniques of seed production in self and cross pollinated crops using A/B/R and two line system.	Field work	BL3-Apply	2
Practical 4	Role of pollinators in hybrid seed production	Field work	BL3-Apply	2
Practical 5	Learning techniques in hybrid seed production using male-sterility in field crops.	Field work	BL3-Apply	2
Practical 6	Concept of line its multiplication and purification in hybrid seed production	Field work	BL3-Apply	2
Practical 7	Concept of rouging in seed production plot	Field work	BL3-Apply	2
Practical 8	Sampling and analytical procedures for purity testing and detection of spurious seed.	Field work	BL3-Apply	2

BSc_HonsAgriculture

Title of the Course	Hi-tech. Horticulture
Course Code	ELCT-HORT-221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Horticulture			**Co-Requisite/s**	Horticulture			
Course Outcomes & Bloom's Level	**CO1-** Students will be equipped with sufficient theoretical knowledge with practical skills on hi-tech horticulture technology and methods **(BL1-Remember)** **CO2-** Theoretical knowledge about precision farming and various implements used in nursery preparation. **(BL2-Understand)** **CO3-** Study about INM & IPM, IWM, protected cultivation, remote sensing and GIS and DGPS. **(BL3-Apply)** **CO4-** Ability to use techniques and instruments involved in the study of orchard practice equipment **(BL4-Analyze)** **CO5-** Understand the basic practice of nursery preparation and propagation method **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction, importance & scope of hi-tech horticulture in India	Classroom lecture, ABL, Fieldwork, Solution based learning and PBL	6
Unit 2	Micro irrigation systems & its components/pH-based irrigation/ fertigation scheduling, Hi-tech canopy management of horticultural crops, High density orcharding in Mango, guava, papaya, citrus, pineapple etc.	Classroom lecture, ABL, Fieldwork, Solution based learning and PBL	6
Unit 3	Micropropagation of horticultural crops, hi-tech field preparation and planting methods, Protected cultivation.	Classroom lecture, ABL, Fieldwork, Solution based learning and PBL	6
Unit 4	Remote sensing & geographical information system, Differential geopositioning system (DGPS), Component of precision farming & application of precision farming in horticultural crops.	Classroom lecture, ABL, Fieldwork, Solution based learning and PBL	7
Unit 5	Importance of INM in horticulture. Micro irrigation methods, Nursery management in horticultural crops.	Classroom lecture, ABL, Fieldwork, Solution based learning and PBL	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Identification of protected structure	Field work	BL2-Understand	2
Practical 2	Nursery management of horticultural crops	Field work	BL2-Understand	2
Practical 3	Micropropagation in horticulture crops	Field work	BL3-Apply	2
Practical 4	Micro-irrigation system	Field work	BL3-Apply	2
Practical 5	H.D.P. of orchard	Field work	BL3-Apply	2
Practical 6	Canopy management of fruit trees	Field work	BL4-Analyze	2
Practical 7	EC, ph. Based fertilizer scheduling	Field work	BL4-Analyze	2
Practical 8	Tools and equipment's identification and use	Field work	BL4-Analyze	2

BSc_HonsAgriculture

Title of the Course	Landscaping
Course Code	ELCT-HORT-311[T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Define the knowledge on landscape designing**(BL1-Remember)** **CO2-** Explain importance of Software based learning of landscape architecture**(BL2-Understand)** **CO3-** Demonstrate the various methods/ approaches of Bonsai management. **(BL3-Apply)** **CO4-** Examine the methods of various lawn management techniques. **(BL4-Analyze)** **CO5-** Evaluate various software for landscape based on performance and designing **(BL5-Evaluate)** **CO6-** Develop plan or layout of public and private landscape area. **(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG10(Reduced inequalities) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introductory landscaping 1. History, scope and opportunities in landscape architecture 2. Terminology associated with landscaping Constrain in landscape designing	Class room teaching (Chalk-board), Power Point Presentations, ABL activities, Assignments, Flip Class/ Seminars, Quiz.	3
Unit 2	Elements and Principles of Landscaping/designing 1. Elements of landscaping and landscape designing 2. Principles of landscaping and landscape designing Bio-aesthetic planning: definition, need, planning; landscaping of urban and rural areas, Peri-urban landscaping, Landscaping of schools, public places like bus station, railway station, townships, river banks, hospitals, play grounds, airports, industries, institutions.	Class room teaching (Chalk-board), Power Point Presentations, ABL activities, Assignments, Flip Class/ Seminars, Quiz.	3
Unit 3	Types and Style of garden 1. Garden styles and types (Terrace gardening, vertical gardening, garden components, adornments, lawn making, rockery, Water Garden, walk-paths, bridges, other constructed features etc. gardens for special purposes) lawn: establishment and maintenance	Class room teaching (Chalk-board), Power Point Presentations, ABL activities, Assignments, Flip Class/ Seminars, Quiz.	3
Unit 4	Therapeutic and pharmaceutical uses 1. Trees: selection, propagation, planting schemes, canopy management, shrubs and herbaceous, planting scheme, Perennials, Climber and creepers, Annuals: Importance, selection, propagation 2. Other Garden plants: palms, ferns, grasses and cacti succulents. Pot plants: selection, arrangement	Class room teaching (Chalk-board), Power Point Presentations, ABL activities, Assignments, Flip Class/ Seminars, Quiz.	3
Unit 5	CAD- its importance and application 1. History, scope and importance of CAD 2. Advantages and disadvantages of CAD 3. Introduction to AutoCAD and its components 4. Various software used for landscape planning.	Class room teaching (Chalk-board), Power Point Presentations, ABL activities, Assignments, Flip Class/ Seminars, Quiz.	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Identification of trees, shrubs, annuals, pot plants	Field work	BL2-Understand	2
Practical 2	Propagation of trees, shrubs and annuals, care and maintenance of plants	Field work	BL2-Understand	2
Practical 3	Identification of tools and implements used in landscape design	Field work	BL3-Apply	2
Practical 4	Training and pruning of plants for special effects	Field work	BL4-Analyze	2
Practical 5	lawn establishment and maintenance	Field work	BL4-Analyze	2
Practical 6	layout of formal gardens, informal gardens, special type of gardens	Field work	BL4-Analyze	2
Practical 7	Designing of conservatory and lathe house	Field work	BL5-Evaluate	2
Practical 8	Use of computers software, visit to important gardens/ parks/ institutes.	Field work	BL6-Create	2

BSc_HonsAgriculture

Title of the Course	Protected Cultivation
Course Code	ELCT-HORT-321[T]

Part A

Year	3rd	**Semester**	6th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Horticulture			**Co-Requisite/s**	Horticulture			
Course Outcomes & Bloom's Level	**CO1-** To list out and remember the importance of Protected cultivation and its scope in India. **(BL1-Remember)** **CO2-** To classify the concept of classifications of protected structures. **(BL2-Understand)** **CO3-** To apply the concept of protected cultivation for major crops. **(BL3-Apply)** **CO4-** To examine the Basics of nursery management under protected structures. **(BL4-Analyze)** **CO5-** To evaluate the utility of growing media and growing condition under protected structures. **(BL5-Evaluate)** **CO6-** To create the budget and design for protected cultivation and structures. **(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction to Protected cultivation Protected cultivation- importance and scope, Status of protected cultivation in India and World	Class room teaching (Chalk-board) Power Point Presentations ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 2	Construction and types of protected structures Cladding materials involved in greenhouse/ poly house. Greenhouse design, environment control, artificial lights, Automation, Soil preparation and management, Substrate management. Types of benches and containers. Types of protected structure based on site and climate	Class room teaching (Chalk-board) Power Point Presentations ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 3	Irrigation and propagation under protected structures Irrigation and fertigation management, Propagation and production of quality planting material of horticultural crops	Class room teaching (Chalk-board) Power Point Presentations ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 4	Greenhouse cultivation of important horticultural crops Greenhouse cultivation of important horticultural crops rose, carnation, chrysanthemum, gerbera, orchid, anthurium, lilium, tulip, tomato, bell pepper, cucumber, strawberry, pot plants, etc.	Class room teaching (Chalk-board) Power Point Presentations ABL activities Assignments Flip Class/ Seminars Quiz	7
Unit 5	Cultivation of economically important crops Cultivation of economically important medicinal and aromatic plants. Offseason production of flowers and vegetables. Insect pest and disease management under protected structures.	Class room teaching (Chalk-board) Power Point Presentations ABL activities Assignments Flip Class/ Seminars Quiz	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Preparation and nursery management under Protected structures	Experiments	BL2-Understand	2
Practical 2	Propagation and nursery management under Protected structures	Experiments	BL3-Apply	2
Practical 3	Bed preparation and planting of crops for productions	Experiments	BL3-Apply	2
Practical 4	Intercultural operations	Experiments	BL4-Analyze	2
Practical 5	Soil EC and pH measurement	Experiments	BL4-Analyze	2
Practical 6	Regulation of irrigation and fertilizers through drip, fogging ad misting	Experiments	BL5-Evaluate	2
Practical 7	Propagation and management of Ornamental and medicinal/Aromatic crops.	Experiments	BL5-Evaluate	2
Practical 8	Visit to Protected structure	Experiments	BL6-Create	2

Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Micro propagation Technologies
Course Code	ELCT– GPB-221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					1	0	2	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Genetics and Plant breeding			**Co-Requisite/s**	Genetics and Plant breeding			
Course Outcomes & Bloom's Level	**CO1-** To understand terminology and definitions related to micro-propagation **(BL1-Remember)** **CO2-** To acquainted with different micro-propagtion techniques **(BL2-Understand)** **CO3-** To apply the knowledge for micro-propagation of economically valued crops **(BL3-Apply)** **CO4-** To get familiar with the requirements to set up a plant tissue culture laboratory **(BL4-Analyze)** **CO5-** To design strategies for commercial exploration of gained knowledge on micro-propagation technology **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Meaning and concept of in vitro culture and micro-propagation; Historical milestones, advancement and future prospects of micro propagation; totipotency, dedifferentiation. Micro-propagation- Definition, methods, stages of micro-propagation and its significance	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Industrial Visit, Report, Poster, Review writing.	6
Unit 2	Tissue culture methodology: Sterilization techniques, synthetic and natural media components, growth regulators, environmental requirement, and genetic control of regeneration.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Industrial Visit, Report, Poster, Review writing.	6
Unit 3	Plant regeneration pathways-Organogenesis and Somatic embryogenesis; Axillary bud prolife ration approach Shoot tip and meristem culture.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Industrial Visit, Report, Poster, Review writing.	6
Unit 4	Organogenesis-Purpose, methods and requirements for organogenesis, indirect and direct organogenesis; Somatic embryogenesis: Procedures and requirements for organogenesis, indirect and direct embryogenesis.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Industrial Visit, Report, Poster, Review writing.	7
Unit 5	Differences between somatic and gametic embryogenesis, Synthetic seed- Concepts, necessity, procedure and requirements for production of synthetic seeds, Production of secondary metabolites, Somaclonal variations, Cryopreservation	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, Industrial Visit, Report, Poster, Review writing.	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	To understand the different ways of representation of concentration of solutions	Experiments	BL2-Understand	2
Practical 2	To get familiar the preparation of different type of solutions	Experiments	BL2-Understand	2
Practical 3	Preparation of buffers	Experiments	BL3-Apply	2
Practical 4	Estimation of pH	Experiments	BL3-Apply	2
Practical 5	Laboratory organization	Experiments	BL3-Apply	2
Practical 6	Sterilization techniques	Experiments	BL4-Analyze	2
Practical 7	Preparation and sterilization of growth regulators	Experiments	BL4-Analyze	2
Practical 8	Experimentation on determining optimum concentration of growth regulators	Experiments	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Weed Management
Course Code	ELCT–AGRON-221[T]

Part A

Year	2nd	**Semester**	4th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Electives							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** Describe the basics concepts of weeds management different weed plants and herbicides along with their respective characteristics & nature **(BL1-Remember)** **CO2-** Classify and characterized various crop weed plants and herbicides based on different parameters **(BL2-Understand)** **CO3-** Demonstrate the use of different methods and technology of weed management in the field **(BL3-Apply)** **CO4-** Investigate the differential effects of various herbicides on different weed plants and examine and cause and management of herbicide resistance **(BL4-Analyze)** **CO5-** Evaluate the integrated weed management (IWM) models in different crops under different crop-weed ecology **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction to weeds, characteristics of weeds their harmful and beneficial effects on ecosystem.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, group discussion, Unannounced test.	6
Unit 2	classification, reproduction and dissemination of weeds. Herbicide classification, concept of adjuvant, surfactant herbicide formulation and their use.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, group discussion, Unannounced test.	6
Unit 3	Introduction to mode of action of Herbicides selectivity. allelopathy and its application for weed management.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, group discussion, Unannounced test.	6
Unit 4	Bio-herbicides and their application in agriculture. concept of herbicide mixture and utility in agriculture Herbicide compatibility with agro-chemicals and their application.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, group discussion, Unannounced test.	7
Unit 5	Integration of herbicides with non-chemical methods of weed management and its management. Herbicide resistance and its management.	ABL activities, Assignment, Class room teaching, PPT presentation, Quiz, group discussion, Unannounced test.	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Techniques of weed preservation.	Field work	BL2-Understand	2
Practical 2	Weed identification and their losses Study.	Field work	BL2-Understand	2
Practical 3	Biology of important weeds.	Field work	BL2-Understand	2
Practical 4	Study of herbicide formulations mixture of herbicides	Field work	BL3-Apply	2
Practical 5	Herbicide and agro-Chemical study.	Field work	BL3-Apply	2
Practical 6	Shift of weed flora Study in long-term experiments.	Field work	BL4-Analyze	2
Practical 7	Study of methods of herbicide application, Spraying equipment.	Experiments	BL4-Analyze	2
Practical 8	Calculations of herbicide doses and weed control efficiency and weed index.	Experiments	BL5-Evaluate	2

BSc_HonsAgriculture

Title of the Course	Agribusiness and Industrial Management
Course Code	ELP- ABM-401 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Electives							
Pre-Requisite/s	Ag. Economics			**Co-Requisite/s**	Ag. Extension			
Course Outcomes & Bloom's Level	**CO1-** Students will acquire knowledge about various aspects of agribusiness and also understand the structure and working of an enterprise.**(BL1-Remember)** **CO2-** Utilize the knowledge in the fields of project management and entrepreneurship development.**(BL2-Understand)** **CO3-** Analyze the challenges and problem of agroindustry, examining the quality of product of agroindustry and their role in agriculture.**(BL3-Apply)** **CO4-** Evaluate various policies, strategies and decisions relating to marketing that are developed by agribusiness firms.**(BL4-Analyze)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG8(Decent work and economic growth)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Structure of Agribusiness- Linkages among sub-sectors of the Agribusiness sector; economic reforms and Indian agriculture; impact of liberalization, privatization and globalization on Agri business sector Emerging trends in production, processing, marketing and exports; policy controls and regulations relating to the industrial sector with specific reference to agro-industries.	Field work	BL2-Understand	20
Module 2	Role of Agribusiness in economy- Role of agriculture in Indian economy; problems and policy changes relating to farm supplies, farm production, agro processing, Evaluation process. agricultural marketing, agricultural finance etc. in the country.	Field work	BL2-Understand	20
Module 3	Financial Management- Introduction to Financial Management, Its meaning and functions, Interface of financial management with other functional areas of a business. Financial Statements and Analysis, Capital Structure, Working Capital Management, Financial planning and Forecasting.	Field work	BL3-Apply	20
Module 4	Quality Management in Agribusiness- Basic concepts of quality management, importance of quality and the role of quality assurance in agribusiness. TQM and business strategy. Quality control process and its relevance. Quality grades and standards	Field work	BL3-Apply	20
Module 5	Agriculture supply chain management- Managing Retail Operations, Managing Retailers' Finances, Merchandise buying and handling, Merchandise Pricing, Logistics, procurement of Food products and Handling Transportation of Food Products.	Field work	BL3-Apply	20
Module 6	Project management and entrepreneurship development- Types of Project, Project lifecycle; Project feasibility; network method; Significance of entrepreneurship in economic development, developing effective business plan, Procedural steps in setting up of an industry.	Field work	BL3-Apply	20
Module 7	Production and operation management-Nature and Scope; Productivity variables and measurement; Product design and development; Quality assurance	Field work	BL4-Analyze	20
Module 8	Agribusiness policy in India- concept and formulation; and new dimensions in Agri business environment and policy; Agricultural price and marketing policies; public distribution system and other policies.	Field work	BL4-Analyze	20

BSc_HonsAgriculture

Title of the Course	Industrial Training On Product Development And Marketing
Course Code	ELP- ABM-402 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Electives							
Pre-Requisite/s	Ag. Economics			**Co-Requisite/s**	Ag. Extension			
Course Outcomes & Bloom's Level	**CO1-** Students will acquire training in the Industrial production and marketing.**(BL1-Remember)** **CO2-** Evaluation of various Industrial products, marketing channel and cost of production.**(BL2-Understand)** **CO3-** Analyze the challenges in cost of production and marketing.**(BL3-Apply)** **CO4-** Evaluate the role of industries and investors.**(BL4-Analyze)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**					

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Basic of industrial marketing Reason for understanding the concept of industrial marketing—Attributes of Marketing Strategy—Concept of Industrial Marketing—Definition of Industrial Marketing—Types of Product —Industrial Product—Industrial Process Exchange—Types of Industrial Customers—Commercial Enterprises—Industrial Distributors and Dealers—Original Equipment Manufacturers (OEMs)—Government Customers—Institutions—Cooperative Societies	Experiments	BL2-Understand	20
Module 2	Understanding industrial markets Industrial versus Consumer Markets—Market Structure —Marketing Perspective — Customer Behaviour—Industrial Marketing landscape—Industrial Development in India— Current trends in Indian Industrial market—Elements of Industrial Development Strategy	Experiments	BL2-Understand	20
Module 3	Economic issues in industrial marketing Derived demand —value chain of derived demand—ripple effect of derived demand— derived demand marketing—fluctuating demand—joint demand —stimulating demand—cross-elasticity of demand—effect of cross elasticity of demand on market—pricing policy—inelastic demand—purchasing / buying orientation—purchasing orientation— buying orientation—procurement orientation—supply management orientation —types of purchasing process	Experiments	BL2-Understand	20
Module 4	Industrial buying behavior: Organizational Buying —Features of Organizational Buying—Types of buying Situation— Straight Rebuy—Modified Rebuy—New task—System buy —Buying Center Concept— The Buying Decision Process—Buying Mode—The Sheth Model—The Webster and Wind Mode—Vendor Analysis —Vendor Performance Rating	Field work	BL3-Apply	20
Module 5	Industrial marketing research: Definition—Uses of Industrial Marketing Research —Studying the business trends —New Product Studies—Sales quota determination and DD forecasting—Market potential and market share analysis—Differences in Industrial and Consumer Marketing Research— Industrial Marketing Research Process— The Sampling Plan—Sampling methods — Probability Sampling Methods—Non-probability Sampling Methods	Field work	BL3-Apply	20
Module 6	Product development strategy: Developing product strategy—Product Policy —New Product Development— Define product—Identify market needs—Identify key issues and approaches—Idea Generation —Idea Screening —Concept development & testing—Business Analysis —Product Development—Marketing Testing— Commercialization —Industrial Product Life Cycle — The Introductory Stage—Growth—The Maturity Stage—The Decline Stage—Product Evaluation —Perceptual Mapping	Field work	BL3-Apply	20
Module 7	Pricing in industrial marketing: Pricing Environment —Characteristics of Price—The Pricing Process in Industrial Marketing—Factors affecting industrial pricing decision —Pricing Objectives—Market Skimming —Market Penetration—Product Differentiation —Other pricing objectives — Demand Conditions —Cost Condition — Pricing Policies —Competitive Analysis — Government Regulations —Pricing Strategy —Introductory Stage — Market Skimming Strategy:—Market Penetration Strategy:—Pricing Strategy at Growth stage —Pricing Strategy at Maturity stage—Pricing Strategy at Decline Stage	Field work	BL3-Apply	20
Module 8	Industrial distribution channel: Marketing channels physical distribution—factors affecting the nature of industrial channels—geographic distribution —channel size—characteristics of intermediaries— mixed system—structure of industrial channel—direct channel—indirect channel—types of industrial middlemen/intermediaries—industrial distributors (dealers)—three main/major categories of industrial distributor: —manufacturers' representatives – brokers—value- added reseller—the channel design process—controlling channel conflicts	Field work	BL3-Apply	20

Title of the Course	Agricultural waste management
Course Code	ELP- AGRON-401 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Electives							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Introduction with agricultural wastes and their utilization.**(BL1-Remember)** **CO2-** Explain different waste management methods, incorporation of crop residues, composting and Biochar**(BL2-Understand)** **CO3-** Analyze and discuss sustainable development and agriculture**(BL3-Apply)** **CO4-** Investigate the benefits of waste management in farms.**(BL4-Analyze)** **CO5-** Evaluate the performance of Biogas plant**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG6(Clean water and sanitation) SDG8(Decent work and economic growth) SDG13(Climate action)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Incorporation of Crop Residues into Soil for Nutrient Cycling and Soil Amendment: Incorporation of different plant residues, Testing of soil after crop residue incorporation	Experiments	BL2-Understand	20
Module 2	Livestock and poultry waste management: Manure handling and storage, Solid manure, Field storage manure	Experiments	BL2-Understand	20
Module 3	Vegetable waste management: Composting of different vegetables, Land spreading & Burial process of vegetables	Experiments	BL3-Apply	20
Module 4	Biodegradable Packaging Material (BDPM) as Planting Medium: plant derived biodegradable packaging EFB, tapioca starch and sugar cane bagasse.	Experiments	BL3-Apply	20
Module 5	Conversion of Agriculture Waste into Bio char: Preparation of biochar at different temperature, preparation of biochar from different crops, Testing of Physical chemical and biological properties of Biochar	Experiments	BL3-Apply	20
Module 6	Biochemical conversion Technology-Biogas (BCCT): Biogas technology, Biogas plant types, Microbiology of biogas production, Size and selection of biogas Plant, Biogas Plant –material and method of construction	Experiments	BL4-Analyze	20
Module 7	Odour management in Barns and storage area: Causes of odour, BMPs for Odour Control in Livestock Facilities, BMPs for Odour Control in Manure Storage	Experiments	BL4-Analyze	20
Module 8	Feedlot management: site selection, Liquid system, Soild System, BMPs for runoff control	Experiments	BL4-Analyze	20

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Selection of seed production area /land: (a) Previous & current year agro-metrological data, (b) soil type, soil sampling & soil profiling. Texture, Nutrition availability, Water holding capacity, Available organic carbon, Selection of crop.	Experiments	BL2-Understand	20
Module 2	Layout preparation /Cultural practices: Net area & gross area calculation, Design of experimentation, isolation distance, field preparation, seed sowing, and calculation of required seeds (seed rate)	Experiments	BL2-Understand	20
Module 3	Agronomical practices: Fertilizer application, irrigation, rouging, weeding, etc.	Field work	BL2-Understand	20
Module 4	Insect, pest & disease management: Identification of disease, diagnosis & procurement & management	Field work	BL4-Analyze	20
Module 5	Crop management: Identification of critical stages for field inspection, 50 % flowering, removal of Off type, plant data observation	Field work	BL3-Apply	20
Module 6	Crop maturity of observation: Observation of characteristics related to plant maturity (leaf characteristics, grain characteristics, BITE test, and laboratory based test).	Field work	BL3-Apply	20
Module 7	Harvesting & threshing: Harvesting techniques, Threshing tech. & equipments/ machines, Seed drying techniques.	Field work	BL3-Apply	20
Module 8	Bagging, packing & storage: Seed treatment (fungal, bacterial, coating & planting) Specific baggage for packaging & prescribed tags (as per seed act 1966) Storage & storage facilities (Gene Bank)	Field work	BL4-Analyze	20

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Project preparation for establishment of various protected structures (Poly house and net house)	Experiments	BL2-Understand	20
Module 2	Practices in preparatory operations, different types of growing media, soil decontamination techniques in polyhouse	Field work	BL2-Understand	20
Module 3	Preparation of beds under the polyhouse for cultivation of cucumber and tomato	Field work	BL2-Understand	20
Module 4	Hands on training on various intercultural operation under the polyhouse (staking, training and pruning, fertigation)	Field work	BL4-Analyze	20
Module 5	Use/application Low Tunnel Technology for off season cultivation of vegetable crops and flower crops	Field work	BL3-Apply	20
Module 6	Practices of hybrid seed production of vegetables under protected condition.	Field work	BL3-Apply	20
Module 7	Estimation of cost of cultivation for cucumber and tomato under the polyhouse condition	Field work	BL3-Apply	20
Module 8	Village survey to study about the major constant faced by the farmers in adopting protected cultivation in gird region.	Field work	BL4-Analyze	20

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	General information: In this module the students will get details about lands and method need to take to make fertile land, presently available government policies, subsidy rates to crops and pesticides and NABARD rules where it is a National Bank for Agriculture and Rural Development	PBL	BL2-Understand	20
Module 2	Experts Advice: In this module the students will be able to clarify their doubts lively by experts through online video chat and if suppose expert is not available at that time then the that will be directly forwarded to there and they will give the reply to our mail when they see. Live demos are also available to the farmers where they can each and every part in detail. 1. Online video chat 2. Chat info. 3. Live Demos	PBL	BL2-Understand	20
Module 3	Aqua and Poultry information: Here the students will get the details about the Aqua and Poultry farming which includes generation, marketing, exporting and precautions to be taken all these information will be get to Aqua and Poultry farmers. 1. Generation. 2. Marketing. 3. Exporting. 4. Precautions	PBL	BL2-Understand	20
Module 4	Irrigation and Weather information: In this module the farmer will get water resources available in their areas and what steps needs to be taken for irrigation of a particular crop. Four days weather forecasting information is also provided so that the farmer can aware of weather details and they can plan according to it. 1. Water resources. 2. Irrigation 3. Weather forecast	PBL	BL3-Apply	20
Module 5	Agriculture information: Here the information related to the required crop; Seeds, which are to be used, Fertilizers, type of fertilizers to be taken depending on the condition of the crop, type of Precautions to be taken and Time required to cultivate. 1. Crops. 2. Seeds. 3. Pesticides .4. Fertilizers. 5. Precautions	PBL	BL3-Apply	20
Module 6	Market Strategy: Here the students will get the details about the present market trends that means market rates of different crops and seeds and up's and down's in the market from the past 3 months. 1. Market values 2. Ups and down.	PBL	BL4-Analyze	20
Module 7	Connectivity: A sample Idea of placing KIOSK in a state where all villages will be connected through mandal server, all the mandal servers will be connected to district head server and finally all the district servers will be connected to state main server.	PBL	BL4-Analyze	20
Module 8	Rural development e- programmers: e-grama network, promoted by Gramin MahitiParishat (GMP) – an NGO working to establish computer kiosk enterprises in rural area. E-grama offers membership-fee-based access to basic PC-enabled services. A per-family fee allows any person from the member's family to access the kiosk at any time	PBL	BL5-Evaluate	20

Title of the Course	Introduction to Indigenous Technical Knowledge
Course Code	ELP-AEXT-402 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of indigenous knowledge system			**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Identify the concept of Indigenous Technical Knowledge and its importance.**(BL1-Remember)** **CO2-** Explain the need and importance of protecting ITK.**(BL2-Understand)** **CO3-** Illustrate various enactments related to the protection of technical knowledge**(BL3-Apply)** **CO4-** Interpret the concepts of Intellectual property to protect the technical knowledge.**(BL4-Analyze)** **CO5-** Assess the importance of ITK**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG7(Affordable and clean energy) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-1	Introduction to Indigenous Technical Knowledge: Define ITK , nature and characteristics, scope and importance, kinds characteristics, knowledge vis- a-vis indigenous knowledge, traditional knowledge Vs western knowledge traditional knowledge	PBL	BL2-Understand	32
Module-2	Protection of Indigenous Technical Knowledge:The need for protecting traditional knowledge Significance of ITK Protection, value of ITK in global economy, Role of Government to harness ITK.	PBL	BL3-Apply	32
Module-3	Legal framework and ITK: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, Plant Varieties Protection and Farmer's Rights Act, 2001 (PPVFR Act); The Biological Diversity Act 2002 and Rules 2004,.	PBL	BL4-Analyze	32
Module-4	Indigenous Technical Knowledge and intellectual property: Systems of ITK protection, Legal concepts for the protection of ITK, Patents, Strategies to increase protection of ITK	PBL	BL5-Evaluate	32
Module-5	Traditional Knowledge in Different Sectors: Traditional medicine system, ITK in agriculture, Traditional societies depend on it for their food and healthcare needs, Importance of conservation and sustainable development of environment, Management of biodiversity, Food security of the country and protection of ITK	PBL	BL6-Create	32

Title of the Course	Integrated Fish Farming
Course Code	ELP-FSC-401 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Electives							
Pre-Requisite/s	Fundamentals of fisheries			**Co-Requisite/s**	Fish ecology and aquatic Ecosystem			
Course Outcomes & Bloom's Level	**CO1-** Integrate fish farming with other agricultural activities such as crop and livestock production**(BL2-Understand)** **CO2-** Promote sustainability by utilizing agricultural waste for reducing environmental pollution and recourse consumption **(BL2-Understand)** **CO3-** Apply fish farming to benefit multiple income streams providing financial stability **(BL3-Apply)** **CO4-** Analyze the recycling of nutrients from various within systems**(BL4-Analyze)** **CO5-** Evaluate various inputs design to minimize environmental impact by reducing pollution from the ecosystem **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG12(Responsible consuption and production) SDG14(Life below water) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Selection of fish seed(spawn) production area /land: (a) Select a culturable fish species for polyculture .An average depth of 6.5 to 10ft depth should be maintained in the case of six species composite fish culture.	Field work	BL2-Understand	20
Module 2	Layoutpreparation/Culturalpractices:Netgross area & water area .calculation,Designofexperimentation,isolationdistance,Pondpreparation,fish seedstocking,and calculationofrequiredfish seeds (seedrate) Pre -stocking practices: Ploughing,Fertilizing the Pond ,Liming , Adding minerals etc.	Field work	BL2-Understand	20
Module 3	Fish farming cum Horticulture : Pond banks provide a suitable place which can be economically used for raising fruit and plants like banana ,papaya and vegetables.	Field work	BL2-Understand	20
Module 4	Fish farming with Livestock: In this practice excreta of Animals (poultry	Field work	BL3-Apply	20
Module 5	Fish cum duck Farming: Pond manuring, Aeration , weed removing and provide supplementary feed.	Field work	BL3-Apply	20
Module 6	Stocking size:Thesurvivaloftheﬁngerlingsintroducedintoaparticularponddependsverymuchontheirsize:biggerthesize greater will be the survival rate and vice versa. The fingerlings stocked should have a size of 10 to 40 gm. Water Quality Management : Regular sampling of Physical and chemical water quality parameters	Field work	BL3-Apply	20
Module 7	Growth Promoter and medicines: Various growth promoter and medicines are being used for the growth and production of fish seed.	Field work	BL4-Analyze	20
Module 8	Post stocking Practice on Feed management: Natural feeding is being Provided for the growth of fish seed and using the Bag feeding method for polyculture species.	Field work	BL4-Analyze	20

Pre-Requisite/s	Horticulture			**Co-Requisite/s**	Horticulture			
Course Outcomes & Bloom's Level	**CO1-** Describe the importance and scope Floriculture and Landscape designing**(BL1-Remember)** **CO2-** Explain the basic concept of landscape architecture**(BL2-Understand)** **CO3-** Demonstrate various Software for landscape architecture**(BL3-Apply)** **CO4-** Analyse the challenges of value addition of commercial floriculture crops**(BL4-Analyze)** **CO5-** Evaluate the role of value addition and essential oil extraction in floriculture industry**(BL5-Evaluate)** **CO6-** Design landscape layout by utilizing Software and Create value added products from waste.**(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Introduction to Floriculture and Landscaping Objective: • To understand the basic concept of floriculture • To study the present scenario of Ornamental crops and landscape designing	Field work	BL2-Understand	20
Module 2	Identification of Ornamental Crops Objective: • To identify the major ornamental crops in locality • To understand the crop morphology and characters	Field work	BL2-Understand	20
Module 3	Propagation of Ornamental Crops Objective: • To understand the propagation methods for flower crops • To identify the major propagation techniques of ornamental crops in locality	Field work	BL3-Apply	20
Module 4	Landscape design and planning Objective: • To learn about the landscape architecture and planning • To understand the 2D and 3D design concept • To use Software like 5D Planner, Sketchup and AutoCAD for landscape designing	Field work	BL3-Apply	20
Module 5	Specialized Garden design Objective: • To learn about the landscape architecture and planning • To understand the concept of UPH • To use Software like 5D Planner, Sketchup and AutoCAD for landscape designing	Field work	BL3-Apply	20
Module 6	Production of cut/loose flower Objective: • To learn about the package and practices of major flower crops. • To understand the propagation and nursery management techniques of flower crops. • Cost of cultivation of production technology.	Field work	BL3-Apply	20
Module 7	Dry flower production technology of flower crops Objectives: • To learn about the various drying methods • To practice the dry flower products • To analyse the cost of dry flower products	Field work	BL4-Analyze	20
Module 8	Post harvest handling of Flower crops Objective: •To inculcate the knowledge about the preservative technology •To study the post-harvest handling of flower crops •To practice the vase life study of major cut flower	Field work	BL4-Analyze	20

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-1	Effect of Drying Methods on Aromatic Plant Quality Compare the impact of air-drying, oven-drying, and freeze-drying on the aroma, color, and chemical composition of aromatic plants like lavender or mint.	Experiments	BL2-Understand	20
Module-2	Preservation Techniques for Ornamental Plants Investigate the efficacy of different preservation methods (such as drying, glycerine preservation, and silica gel drying) on maintaining the color and texture of ornamental plants like roses or orchids.	Experiments	BL2-Understand	20
Module-3	Biochemical Analysis of Medicinal Plant Extracts Analyze the biochemical composition of extracts from medicinal plants like ginseng or echinacea using techniques like chromatography and spectrophotometry to determine their medicinal value.	Experiments	BL3-Apply	20
Module-4	Comparative Study of Preservation Methods for Aromatic Herbs Compare traditional preservation methods (e.g., drying, salt curing) with modern techniques (e.g., vacuum sealing, freeze-drying) to determine their impact on the aroma and flavor retention of herbs like basil or thyme.	Experiments	BL3-Apply	20
Module-5	Enhancing Medicinal Plant Properties through Fermentation Study the effects of fermentation on the bioactivity and bioavailability of compounds in medicinal plants such as garlic or aloe vera, exploring changes in chemical composition and potential health benefits.	Experiments	BL4-Analyze	20
Module-6	Value Addition through Herbal Tea Blending Experiment with blending different dried aromatic and medicinal herbs to create unique herbal tea blends, assessing their sensory qualities and potential health benefits through taste tests and chemical analysis.	Experiments	BL4-Analyze	20
Module-7	Preservation Techniques for Fresh-cut Ornamental Flowers Investigate the effectiveness of preservatives, hydration solutions, and storage conditions in prolonging the vase life of fresh-cut ornamental flowers like roses or carnations	Experiments	BL5-Evaluate	20
Module-8	Assessment of Antioxidant Activity in Aromatic Plants Measure the antioxidant activity of aromatic plants such as sage or oregano using assays like DPPH radical scavenging or ORAC (oxygen radical absorbance capacity) to quantify their potential health benefits.	Experiments	BL5-Evaluate	20

Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Multimedia and Graphic Designing & Production of Information Materials
Course Code	ELP-JMC-401 [P]

Part A

Year	4th	**Semester**	8th	**Credits**	L	T	P	C
					0	0	10	10
Course Type	Lab only							
Course Category	Discipline Electives							
Pre-Requisite/s	fundamentals of computer application			**Co-Requisite/s**	Tools and techniques of information generation and representation			
Course Outcomes & Bloom's Level	**CO1-** Describe the importance and scope of commercial crop production.**(BL1-Remember)** **CO2-** Explain the knowledge regarding various organic matters and synthetic material for commercial productions**(BL2-Understand)** **CO3-** Demonstrate various agronomical crops under different organic & synthetic products contents**(BL3-Apply)** **CO4-** Analyze the challenges of commercial cultivation, establishment and management along with the possible Practical solutions**(BL4-Analyze)** **CO5-** Evaluate the commercial production of agronomical crop under different practices**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-1	Introduction to multimedia, multimedia definition and concepts, need of multimedia, Areas of use, development platform for multimedia, identify multimedia elements text, images, sound, animation and video, multimedia hardware and software requirement, making simple multimedia with power point, text as a component of multimedia, concept of plain and formation text, RTF and HTML text, object linking and embedding concept, fonts- needs and types.	PBL	BL2-Understand	32
Module-2	Sound in Multimedia , Importance of Sound in Multimedia, Sound and its attributes – tone, intensity, frequency, wavelength , pitch etc . Mono v/s Stereo sound , sound channel, effects in sound , analog v/s digital sound, overview of various sound file formats on PC WAVE, MP3, concept of MIDI, software for sound editing and mixing, 3D sound .	PBL	BL3-Apply	32
Module-3	Graphics in Multimedia, importance of graphics in multimedia, vector and raster graphics, image capturing methods, scanner, digital camera etc. Various attributes of images- Size, color, bit depth, resolution etc., Various image file formats- BMP, DIB,EPS, PIC and TIF formats and their features and limitations .	PBL	BL4-Analyze	32
Module-4	Video and animation in multimedia, impact of video in multimedia, basics of videos, analog and digital video, how to use video on PC, brief note on various video standard, PAL, NTSE, different file format and their use in multimedia, MPEG, AVI, MJPG, name of video editing software, basics of animation, types of animation and use of animation, software for creating animations	PBL	BL5-Evaluate	32
Module-5	Application of multimedia and its future, application og multimedia in different industries Education, Entertainment, Journalism etc. Future of Multimedia, Carrier in multimedia production, virtual reality as new technology in multimedia, application of VR, introduction to HMD, Boom cave, introduction to various types authoring tools.	PBL	BL5-Evaluate	32

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module 1	Introduction to mushrooms -Taxonomical rank -History and Scope of mushroom cultivation - Edible and Poisonous Mushrooms-Vegetative characters	Field work	BL2-Understand	20
Module 2	Identification of common edible, medicinal and poisonous mushroom	Field work	BL2-Understand	20
Module 3	Health benefits of mushrooms, Nutritional and medicinal values of mushrooms. Therapeutic aspects- antitumor effect	Field work	BL2-Understand	20
Module 4	Spawn production - Culture media preparation- production of pure culture, mother spawn preparation	Field work	BL3-Apply	20
Module 5	Sterilization and sanitation of mushroom house, Selection of substrate for mushroom cultivation, Composting technology, mushroom bed preparation	Field work	BL4-Analyze	20
Module 6	Spawning, spawn running, Cultivation technology of oyster, milky and paddy straw mushroom and harvesting.	Field work	BL4-Analyze	20
Module 7	Problems in mushroom cultivation - diseases, pests and nematodes, moulds and their management strategies	Field work	BL5-Evaluate	20
Module 8	Post-harvest technology: Preservation of mushrooms - freezing, dry freezing, drying, canning, quality assurance and entrepreneurship	Field work	BL4-Analyze	20

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-1	Identification of different plant diseases through regular field visit.	PBL	BL2-Understand	20
Module-2	Study on occurrence of the disease and their relations with the weather parameters. Selected disease will be observed on weekly interval (Standard Meteorological Weeks) and disease scoring will be done. Data handling in excel (Microsoft Office) and correlation matrix analysis study will be carried out. Area under disease progress curve (AUDPC) will be computed. Graph designing.	PBL	BL3-Apply	20
Module-3	Symptomatological studies of plant diseases on natural conditions.	PBL	BL4-Analyze	20
Module-4	Isolation of the plant pathogen. Preparation of the media.	PBL	BL3-Apply	20
Module-5	Steps of Koch Postulates: a) The microorganism or other pathogen must be present in all cases of the disease. b) The pathogen can be isolated from the diseased host and grown in pure culture. c) The pathogen from the pure culture must cause the disease when inoculated into a healthy, susceptible host. The pathogen must be reisolated from the new host and shown to be the same as the originally inoculated pathogen	PBL	BL4-Analyze	20
Module-6	Morphological studies of the pathogens and their preservation in agar slants.	PBL	BL5-Evaluate	20
Module-7	In-vitro management of the pathogen through different plant extracts and chemical pesticides.	PBL	BL5-Evaluate	20

Syllabus-2023-2024

BSc_HonsAgriculture

Title of the Course	Pests of Crops and Stored Grain and their Management
Course Code	ENT-311 [T]

Part A

Year	3rd	**Semester**	5th	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of entomology			**Co-Requisite/s**	Insect ecology and morphology			
Course Outcomes & Bloom's Level	**CO1-** Describe the importance and scope of commercial crop production.**(BL1-Remember)** **CO2-** Explain the knowledge regarding various organic matters and synthetic material for commercial productions**(BL2-Understand)** **CO3-** Demonstrate various agronomical crops under different organic & synthetic products contents**(BL3-Apply)** **CO4-** Analyze the challenges of commercial cultivation, establishment and management along with the possible Practical solutions**(BL4-Analyze)** **CO5-** Evaluate the commercial production of agronomical crop under different practices**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG10(Reduced inequalities) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	To study about Identification of different types of damage	Field work	BL2-Understand	2
Practical 2	To study about Pests of paddy	Field work	BL2-Understand	2
Practical 3	To study about Identification and study of life cycle and seasonal history of various insect pests attacking vegetable crops and their produce	Field work	BL3-Apply	2
Practical 4	To study about identification of insect pests and Mites associated with stored grain	Field work	BL3-Apply	2
Practical 5	To study about Determination of insect infestation by different methods	Experiments	BL4-Analyze	2
Practical 6	To study about assessment of losses due to insects	Experiments	BL4-Analyze	2
Practical 7	To study about Calculations on the doses of insecticides application technique.	Experiments	BL5-Evaluate	2
Practical 8	To study about Identification of rodents and rodent control operations in godowns.	Field work	BL5-Evaluate	2

Part D(Marks Distribution)

Theory					
Total Marks	**Minimum Passing Marks**	**External Evaluation**	**Min. External Evaluation**	**Internal Evaluation**	**Min. Internal Evaluation**

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Honey bee species, castes of bees	Field work	BL2-Understand	2
Practical 2	eekeeping appliances and seasonal management, bee enemies and disease.	Field work	BL2-Understand	2
Practical 3	Bee pasturage, bee foraging and communication.	Field work	BL3-Apply	2
Practical 4	Types of silkworm, voltinism and biology of silkworm.	Field work	BL3-Apply	2
Practical 5	Mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves.	Field work	BL3-Apply	2
Practical 6	Species of lac insect, host plant identification	Field work	BL4-Analyze	2
Practical 7	Identification of other important pollinators, weed killers and scavengers.	Field work	BL4-Analyze	2
Practical 8	Visit to research and training institutions devoted to beekeeping.	Field work	BL5-Evaluate	2

Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of Horticulture			**Co-Requisite/s**	Production Technology for Vegetables and Spices			
Course Outcomes & Bloom's Level	**CO1-** Describe the importance and scope of commercial crop production.**(BL1-Remember)** **CO2-** Explain the knowledge regarding various organic matters and synthetic material for commercial productions**(BL2-Understand)** **CO3-** Demonstrate various agronomical crops under different organic & synthetic products contents**(BL3-Apply)** **CO4-** Analyze the challenges of commercial cultivation, establishment and management along with the possible Practical solutions**(BL4-Analyze)** **CO5-** Evaluate the commercial production of agronomical crop under different practices**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕			**SDG (Goals)**	SDG12(Responsible consuption and production)			

Part B

Modules	Contents	Pedagogy	Hours

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Identification of Ornamental and MAP plants.	PBL	BL2-Understand	2
Practical 2	Nursery bed preparation and seed sowing	Field work	BL2-Understand	2
Practical 3	Training and pruning of Ornamental plants	Field work	BL2-Understand	2
Practical 4	Planning and layout of garden.	Field work	BL3-Apply	2
Practical 5	Bed preparation and planting of MAP.	Field work	BL3-Apply	2
Practical 6	Protected structures care and maintenance	Field work	BL4-Analyze	2
Practical 7	Intercultural operations in flowers and MAP	Field work	BL4-Analyze	2
Practical 8	Harvesting and post-harvest handling of cut and loose flowers. Processing of MAP.	Field work	BL5-Evaluate	2

Part D(Marks Distribution)

Theory					
Total Marks	**Minimum Passing Marks**	**External Evaluation**	**Min. External Evaluation**	**Internal Evaluation**	**Min. Internal Evaluation**
80	31	50		30	
Practical					
Total Marks	**Minimum Passing Marks**	**External Evaluation**	**Min. External Evaluation**	**Internal Evaluation**	**Min. Internal Evaluation**
20	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Acquaintance with various laboratory equipments and microscopy	Experiments	BL2-Understand	2
Practical 2	Sterilization techniques	Experiments	BL2-Understand	2
Practical 3	Preparation of PDA	Experiments	BL3-Apply	2
Practical 4	Isolation of fungal pathogen	Experiments	BL3-Apply	2
Practical 5	Preparation of media, isolation and Kochs	Experiments	BL4-Analyze	2
Practical 6	General study of different structures of fungi	Experiments	BL4-Analyze	2
Practical 7	Study of representative fungal genera	Experiments	BL5-Evaluate	2
Practical 8	Staining and identification of plant pathogenic bacteria	Experiments	BL5-Evaluate	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Study of soil profile in field.	Field work	BL2-Understand	2
Practical 2	Study of soil sampling tools, collection of representative soil sample, its processing and storage	Field work	BL2-Understand	2
Practical 3	Determination of soil colour	Experiments	BL3-Apply	2
Practical 4	Determination of soil pH and electrical conductivity	Experiments	BL3-Apply	2
Practical 5	Determination of soil texture by feel and Bouyoucos Methods.	Experiments	BL3-Apply	2
Practical 6	Determination of Bulk density & Particle density	Experiments	BL3-Apply	2
Practical 7	Determination of moisture content and porosity	Experiments	BL3-Apply	2
Practical 8	Determination of soil organic carbon	Experiments	BL3-Apply	2

MSc_Agriculture-Agronomy

Title of the Course	Principles and Practices of Soil Fertility and Nutrient Management
Course Code	AGRON-502[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Agronomy, basic soil science			**Co-Requisite/s**	Agronomy, Scientific management of crop nutrients and soil.			
Course Outcomes & Bloom's Level	**CO1-** To gain basic knowledge of soil fertility and productivity **(BL1-Remember)** **CO2-** To study Importance or Significance of soil macronutrient and micronutrients **(BL2-Understand)** **CO3-** To Assess and develop importance of soil physical and chemical properties **(BL3-Apply)** **CO4-** To study about soil pollution and mitigation process **(BL4-Analyze)** **CO5-** To study about soil pollution and mitigation process **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG13(Climate action)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Soil fertility and productivity - factors affecting; features of good soil management; problems of supply and availability of nutrients; relation between nutrient supply and crop growth; organic farming - basic concepts and definitions.	Brain storming, Guided learning, Cooperative Learning Strategies	6
Unit 2	Criteria of essentiality of nutrients; Essential plant nutrients - their functions, nutrient deficiency symptoms; transformation and dynamics of major plant nutrients.	Brain storming, , Critical incidents, Fieldwork and outdoor learning Activity based learning using different tools Flipped classes teaching model Collaborative learning Socratic method of teaching. Power Point Presentations. ABL activities Field demonstration of cropping and farming systems, ===== Assignment Quiz Seminars with open discussions Group discussions or debate	6
Unit 3	Preparation and use of farmyard manure, compost, green manures, vermin-compost, bio-fertilizers and other organic concentrates their composition, availability and crop responses; recycling of organic wastes and residue management. Soil less cultivation.	Brain storming, Critical incidents, Fieldwork and outdoor learning	6
Unit 4	Commercial fertilizers; composition, relative fertilizer value and cost; crop response to different nutrients, residual effects and fertilizer use efficiency; agronomic, chemical and physiological, fertilizer mixtures and grades; methods of increasing fertilizer use efficiency; nutrient interactions.	Brain storming, Guided Questioning Fieldwork and outdoor learning, Talks and presentations	7
Unit 5	Time and methods of manures and fertilizers application; foliar application and its concept; relative performance of organic and inorganic nutrients; economics of fertilizer use; integrated nutrient management; use of vermicompost and residue wastes in crops.	Brain storming, Stimulus activities Fieldwork and outdoor learning,	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	1. Determination of soil pH	PBL		2
Practical 2	2. Determination of soil EC	PBL		2
Practical 3	3. Determination of soil organic C	PBL		2
Practical 4	4. Determination of available N, P, K and S of soil	PBL		2
Practical 5	5. Determination of total N, P, K and S of soil	PBL		2
Practical 6	6. Determination of total N, P, K, S in plant	PBL		2
Practical 7	7. Computation of optimum and economic yield	PBL		2

Syllabus-2023-2024

MSc_Agriculture-Agronomy

Title of the Course	Principles and Practices of Weed Management
Course Code	AGRON-503 [T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Principles and practices of weed management			**Co-Requisite/s**	Principles and practices of weed management			
Course Outcomes & Bloom's Level	**CO1-** The knowledge on weed biology and survey of weeds in varied ecosystem. **(BL1-Remember)** **CO2-** Basic concept, introductory idea and classification of herbicides and its application methods and knowing about mode and mechanism of action of herbicides. **(BL2-Understand)** **CO3-** Basic concept, introductory idea and classification of herbicides and its application methods and knowing about mode and mechanism of action of herbicides. **(BL3-Apply)** **CO4-** Effective cultural, mechanical, biological, and chemical methods for managing weeds in different cropping system, crops and water weed **(BL4-Analyze)** **CO5-** Integrated weed management practices for different ecosystems **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG4(Quality education) SDG8(Decent work and economic growth) SDG12(Responsible consuption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Weed biology and ecology, crop-weed competition including allelopathy; principles and methods of weed control and classification; weed indices.	Brain storming, Fieldwork and outdoor learning, Cooperative Learning Strategies	6
Unit-2	Herbicides introduction and history of their development; classification based on chemical, physiological application and selectivity; mode and mechanism of action of herbicides	Brain storming, Guided learning, Cooperative Learning Strategies Lab work	6
Unit-3	Herbicide structure - activity relationship; factors affecting the efficiency of herbicides; herbicide formulations, herbicide mixtures; herbicide resistance and management; weed control through bio-herbicides, myco-herbicides and allele chemicals; Degradation of herbicides in soil and plants; herbicide resistance in weeds and crops; herbicide rotation	Guided learning, Cooperative Learning Strategies, Talks and presentations	8
Unit-4	Weed management in major crops and cropping systems; parasitic weeds; weed shifts in cropping systems; aquatic and perennial weed control	Cooperative Learning Strategies, Lab work, Fieldwork and outdoor learning Problem-based learning	6
Unit-5	Integrated weed management; cost: benefit analysis of weed management.	Fieldwork and outdoor learning Problem-based learning ,Discussions and Presentation, ABL	6

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Unit-1	1. Identification of important weeds of different crops	Experiments	BL2-Understand	2
Unit-2	2. Preparation of a weed herbarium	Experiments	BL2-Understand	2
Unit-2	3. Weed survey in crops and cropping systems	Field work	BL3-Apply	2
Unit-3	4. Crop-weed competition studies	Field work	BL3-Apply	2
Unit-4	5. Preparation of spray solutions of herbicides for high and low-volume sprayers	Experiments	BL4-Analyze	2
Unit-4	6. Use of various types of spray pumps and nozzles and calculation of swath width	Experiments	BL4-Analyze	2
Unit-5	7. Economics of weed control	Field work	BL5-Evaluate	2
Unit-5	8. Herbicide resistance analysis in plant and soil	Experiments	BL5-Evaluate	2

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Subtropical and Temperate Fruit Production
Course Code	FSC-502[T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					2	3	1	6
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** State structure, nature and importance of horticultural varieties**(BL1-Remember)** **CO2-** Describe Planting and Orchard Floor Management**(BL2-Understand)** **CO3-** Discuss about the importance of use of bio-fertilizers, role of bio-regulators,**(BL3-Apply)** **CO4-** Describe about quality improvement by management practices; maturity indices, harvesting, grading, packing, storage**(BL4-Analyze)** **CO5-** Identification of physiological disorders- causes and remedies**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Importance and Background: Origin, distribution and importance, major species, rootstocks and commercial varieties of regional, national and international importance, eco-physiological requirements.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
2	Propagation, Planting and Orchard Floor Management: Asexual and sexual methods of propagation.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
3	Planting and Orchard Floor Management: Propagation, planting systems and densities, training and pruning, rejuvenation and replanting, intercropping, nutrient management, water management, fertigation, use of bio-fertilizers, role of bio-regulators, abiotic factors limiting fruit production.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
4	Flowering, Fruit-Set and Harvesting: Physiology of flowering, pollination management, fruit set and development, physiological disorders – causes and remedies.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
5	crop regulation, quality improvement by management practices; maturity indices, harvesting, grading, packing, storage and ripening techniques; insect and disease management.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Distinguished features of tropical fruit species, cultivars and rootstocks.	PBL		
Practical 2	Demonstration of planting systems, training and pruning	PBL		
Practical 3	Hands on practices on pollination and crop regulation	PBL		
Practical 4	Leaf sampling and nutrient analysis	PBL		
Practical 5	Physiological disorders-malady diagnosis	PBL		
Practical 6	Physico-chemical analysis of fruit quality attributes	PBL		
Practical 7	Field/ Exposure visits to tropical orchards	PBL		
Practical 8	Project preparation for establishing commercial orchards	PBL

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Nutrition of Fruit Crops
Course Code	FSC-508[T]

Part A

					L	T	P	C
Year	2nd	**Semester**	3rd	**Credits**	2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Describe the basic concepts and principles of Nutrition in fruit crops **(BL1-Remember)** **CO2-** Understand the importance and various types of nutrients and their uptake mechanisms**(BL2-Understand)** **CO3-** Apply the corrective measures to overcome deficiency or toxicity**(BL3-Apply)** **CO4-** Analyse soil and plant status with respect to various nutrients**(BL4-Analyze)** **CO5-** Evaluate the role various nutrients on yield and quality of fruit crops **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	General Concepts and Principles: Importance and history of nutrition in fruit crops, essential plant nutrients, factors affecting plant nutrition; nutrient uptake and their removal from soil.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
2	Diagnostics, Estimation and Application: Nutrient requirements, root distribution in fruit crops, soil and foliar application of nutrients in major fruit crops, fertilizer use efficiency.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
3	Methods and techniques for evaluating the requirement of macro- and micro-elements, Diagnostic and interpretation techniques including DRIS	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
4	: Role of different macro and micro-nutrients, their deficiency and toxicity disorders, corrective measures to overcome deficiency and toxicity disorders.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
5	Integrated Nutrient Management (INM): Fertigation in fruit crops, biofertilizers and their use in INM systems.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Visual identification of nutrient deficiency symptoms in fruit crops	PBL		
Practical 2	Identification and application of organic, inorganic and bio- fertilizers	PBL		
Practical 3	Soil/ tissue collection and preparation for macro- and micro- nutrient analysis	PBL		
Practical 4	Analysis of soil physical and chemical properties- pH, EC, Organic carbon	PBL		
Practical 5	Determination of N,P,K and other macro- and micronutrients	PBL		
Practical 6	Fertigation in glasshouse and field grown horticultural crops	PBL		
Practical 7	Preparation of micro-nutrient solutions, their spray and soil applications	PBL

MSc_Agriculture-Genetics_and_Plant_Breeding

Title of the Course	Principles of Plant Breeding
Course Code	GPB-502[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Plant Morphology			**Co-Requisite/s**	Fundamentals of Plant Breeding			
Course Outcomes & Bloom's Level	**CO1-** Define the basic concept of crop improvement and genetic variation. **(BL1-Remember)** **CO2-** Describe the various breeding methods, their drawbacks and significance. **(BL2-Understand)** **CO3-** Demonstrate the skill on emasculation, pollination and hybridization. **(BL3-Apply)** **CO4-** Differentiate the inbred lines and hybrids, composite and synthetic varieties. **(BL4-Analyze)** **CO5-** Problems based on heritability, genetic advances and genetic variations and the role of heterosis, inbreeding depression, heritability and genetic advances in plant breeding. **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG4(Quality education) SDG12(Responsible consuption and production) SDG15(Life on land) SDG17(Partnerships for the goals)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-I	History of Plant Breeding (Pre and post-Mendelian era); Objectives of plant breeding, characteristics improved by plant breeding; Patterns of Evolution in Crop Plants- Centres of Origin-biodiversity and its significance. Plant genetic recourses and its conservation.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-II	Genetic basis of breeding self- and cross - pollinated crops including mating systems and response to selection - nature of variability, components of variation; Heritability and genetic advance, genotype environment interaction.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-III	Self-incompatibility and male sterility in crop plants and their commercial exploitation. General and specific combining ability; Types of gene actions and implications in plant breeding; Plant introduction and utilization.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-IV	Pure line theory, pure line selection and mass selection methods; Line breeding, pedigree, bulk, backcross, single seed descent and multiline method; Population breeding in self-pollinated crops (diallel selective mating approach), Stability model analysis.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-V	Breeding methods in cross pollinated crops; Population breeding-mass selection and ear-to-row methods; S1 and S2 progeny testing, progeny selection schemes, recurrent selection schemes for intra and inter population improvement and development of synthetics and composites; Hybrid breeding - genetical and physiological basis of heterosis and inbreeding, production of inbreds, breeding approaches for improvement of inbreds, predicting hybrid performance; seed production of hybrid and their parent varieties/inbreds.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-VI	Breeding methods in asexually/clonally propagated crops, clonal selection apomixes, clonal selection. Self-incompatibility and male sterility in crop plants and their commercial exploitation; Concept of plant ideotype and its role in crop improvement; Transgressive breeding.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	6
Unit-VII	Breeding methods in asexually propagated crops- clonal selection and hybridization. Wide hybridization; Polyploidy in relation to plant breeding. Mutation breeding- methods and uses. Breeding for important biotic and abiotic stresses. Biotechnological tools-DNA markers and marker assisted selection.	Field work, Thematic teaching, Classroom leacture, Experimentation, Guided questioning	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical-1	Floral biology in self and cross pollinated species, selfing and crossing techniques.	Experiments	BL2-Understand	2
Practical -2	Selection methods in segregating populations and evaluation of breeding material	Experiments	BL3-Apply	2
Practical-3	Analysis of variance (ANOVA)	Experiments	BL4-Analyze	2
Practical-4	Estimation of heritability and genetic advance	Experiments	BL5-Evaluate	2
Practical-5	Maintenance of experimental records;	Field work		2
Practical-6	Learning techniques in hybrid seed production using male-sterility in field crops.	Field work	BL5-Evaluate	2

Course Category	Discipline Core							
Pre-Requisite/s	Fundamentals of Breeding			**Co-Requisite/s**	Basics of Biotechnology			
Course Outcomes & Bloom's Level	**CO1-** Study the structure and function of cell and cell cycle **(BL1-Remember)** **CO2-** Understand the principles of bioenergetics and the history of molecular genetics. **(BL2-Understand)** **CO3-** Examine the structure and function of genetic material and its regulation and Central Dogma of life **(BL3-Apply)** **CO4-** Mechanism of recombinant DNA technology and gene amplification. **(BL4-Analyze)** **CO5-** Conceptualize the mechanism of unregulated cell cycle (cancer ancell aging). **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG2(Zero hunger) SDG8(Decent work and economic growth) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Ultrastructure of the cell; Differences between eukaryotic and prokaryotic cells, macromolecules; Structure and function of cell wall, nuclear membrane and plasma membrane; Cellular Organelles nucleus, plastidschloro/chromoplast, mitochondria endoplasmic reticulum, Golgi complex, lysosomes, peroxisomes.	T1 Class room teaching(chalk-board) Power Point Presentations T2 ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 2	Bioenergetics; Ultra structure and function of mitochondria and biological membranes; Chloroplast and other photosynthetic organelles; Interphase nucleus- Structure and chemical composition; Cell division and physiology of cell division.	T1 Class room teaching(chalk-board) Power Point Presentations T2 ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 3	Historical background of molecular genetics; Genetic material in organisms; Structure and properties of nucleic acid, DNA transcription and its regulation Transcription factors and their role; Genetic code, regulation of protein synthesis in prokaryotes and eukaryotes ribosomes, t-RNAs and translational factors.	T1 Class room teaching(chalk-board) Power Point Presentations T2 ABL activities Assignments Flip Class/ Seminars Quiz	6
Unit 4	Transposable elements; Mechanisms of recombination in prokaryote; DNA organization in eukaryotic chromosomes DNA content variation, types of DNA sequences Unique and repetitive sequences; organelle genomes; Gene amplification and its significance; Proteomics and protein-protein interaction; Signal transduction; Genes in development; Cancer and cell aging.	T1 Class room teaching(chalk-board) Power Point Presentations T2 ABL activities Assignments Flip Class/ Seminars Quiz	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Morphological and Gram staining of natural bacteria.	Experiments	BL2-Understand	2
Practical 2	Cultivation of bacteria in synthetic medium.	Experiments	BL2-Understand	2
Practical 3	Determination of growth rate and doubling time of bacterial cells in culture.	Experiments	BL3-Apply	2
Practical 4	Demonstration of bacteriophage by plaque assay method.	Experiments	BL3-Apply	2
Practical 5	Determination of soluble protein content in a bacterial culture.	Experiments	BL3-Apply	2
Practical 6	Isolation, purification and raising clonal population of a bacterium.	Experiments	BL4-Analyze	2
Practical 7	Biological assay of bacteriophage and determination of phage population in lysate	Experiments	BL5-Evaluate	2

MSc_Agriculture-Genetics_and_Plant_Breeding

Title of the Course	Breeding for Stress Resistance and Climate Change
Course Code	GPB-516[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Fundamental of Plant Breeding			**Co-Requisite/s**	Basics of Biotechnology			
Course Outcomes & Bloom's Level	**CO1-** Define the fundamental concepts and theories of stress resistance and climate change. **(BL1-Remember)** **CO2-** Describe the nature and structure of breeding for stress resistance and climate change. **(BL2-Understand)** **CO3-** Conceptualize stress resistance management and hands on lab tools and techniques **(BL3-Apply)** **CO4-** Apply the concepts of breeding for stress resistance and climate change.**(BL4-Analyze)** **CO5-** Problems based on breeding strategies for stress resistance and climate change.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies) SDG12(Responsible consuption and production)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Concept and impact of climatic change; Importance of plant breeding with special reference to biotic and abiotic stress resistance; Classification of biotic stresses – major pests and diseases of economically important crops.	Class room lecture, PBL, Field work,Herberia development	6
Unit 2	Concepts of resistance to insect and pathogen resistance; Analysis and inheritance of resistance variation; Host defence responses to pathogen invasions- Biochemical and molecular mechanisms; Acquired and induced immunity and systemic acquired resistance (SAR); Host-pathogen interaction, gene-for-gene hypothesis, molecular evidence for its operation and exceptions; Concept of signal transduction and other host-defence mechanisms against viruses and bacteria.	Class room lecture, PBL, Field work,Herberia development	6
Unit 3	Types and genetic mechanisms of resistance to biotic stresses –Horizontal and vertical resistance in crop plants; Quantitative resistance/ adult plant resistance and slow rusting resistance; Classical and molecular breeding methods - Measuring plant resistance using plant fitness; Behavioural, physiological and insect gain studies; Phenotypic screening methods for major pests and diseases; Recording of observations; Correlating the observations using marker data – Gene pyramiding methods and their implications. Classification of abiotic stresses - Stress inducing factors, moisture stress/ drought and water logging and submergence; Acidity, salinity/ alkalinity/ sodicity; High/ low temperature, wind, etc.; Stress due to soil factors and mineral toxicity; Physiological and Phenological responses; Emphasis of abiotic stresses in developing breeding methodologies.	Class room lecture, PBL, Field work,Herberia development	6
Unit 4	Genetics of abiotic stress resistance; Genes and genomics in breeding cultivars suitable to low water regimes and water logging and submergence, high and low/ freezing temperatures; Utilizing MAS procedures for identifying resistant types in important crops like rice, sorghum, wheat, cotton, etc.; Breeding for resistance to stresses caused by toxicity, deficiency and pollutants/ contaminants in soil, water and environment.	Class room lecture, PBL, Field work,Herberia development	6
Unit 5	Use of crop wild relatives as a source of resistance to biotic and abiotic factors in major field crops; Transgenics in management of biotic and abiotic stresses, use of toxins, protease inhibitors, lectins, chitinases and Bt for diseases and insect pest management.	Class room lecture, PBL, Field work,Herberia development	8

<4d style="border: 1px solid black;">Field work

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Understanding the climatological parameters and predisposal of biotic and abiotic stress factors- ways of combating them for diseases caused by fungi and bacteria;	Field work	BL2-Understand	2
Practical 2	Symptoms and data recording; use of MAS procedures;	Field work	BL2-Understand	2
Practical 3	Phenotypic screening techniques for sucking pests and chewing pests – Traits to be observed at plant and insect level;	Field work	BL3-Apply	2
Practical 4	Phenotypic screening techniques for nematodes and borers; Ways of combating them;	Field work	BL3-Apply	2
Practical 5	Evaluating the available populations like RIL, NIL, etc. for pest resistance;	Field work	BL4-Analyze	2
Practical 6	Use of standard MAS procedures. Breeding strategies - Weeds – ecological, environmental impacts on the crops;	Field work	BL4-Analyze	2
Practical 7	Breeding for herbicide resistance;	Field work	BL3-Apply	2
Practical 8	Screening crops for drought and flood resistance; factors to be considered and breeding strategies;	BL4-Analyze	2

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Postharvest Management of Horticulture Produce
Course Code	PHM-501[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** State structure, nature and importance of horticultural produce **(BL1-Remember)** **CO2-** Describe regulation of ripening by use of chemicals and growth regulators**(BL2-Understand)** **CO3-** Operate pre and Postharvest treatments for extending storage life/ vase life**(BL3-Apply)** **CO4-** Examine standards and specifications for fresh produce**(BL4-Analyze)** **CO5-** Judge handling system and marketing of horticultural crops**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Importance and scope History, Importance and scope of Postharvest technology of horticultural produce. Nature and structure of horticultural produce. Pre and Postharvest losses and their causes.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
2	Regulation of ripening Climacteric and non-climacteric fruits. Regulation of ripening by use of chemicals and growth regulators. Control of sprouting, rooting and discoloration in vegetables.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
3	Treatments for extending shelf life Maturity indices for harvest. Harvesting and harvesting tools. Curing in roots and tubers. Pre-package Operation: Pre-cooling, washing,sorting, grading of horticultural perishables for local markets andexport. Postharvest handling of spices, plantation crops, medicinaland aromatic plants. Equipment for washing, sizing, grading.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
4	Handling system and marketing of horticultural crops Pre and Postharvest treatments for extending storage life/ vase life. VHT, irradiation treatment, skin coating, de-greening, etc. Pre-packaging, Packaging techniques for local market and export. Standards and specifications for fresh produce	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2
5	Handling system and marketing of horticultural crops Postharvest handling system for horticulture crops of regional importance. Principles of transport, modes of transportation, types of vehicles and transit requirements for different horticultural produce. Marketing: Factors influencing marketing of perishable crops, marketing systems and organizations.	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming Problem-based learning	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Study of maturity indices for harvest of fruits, vegetables, spices and plantation crops;	PBL		
Practical 2	Protective skin coating with wax emulsion and pre and Postharvest treatment with fungicides and chemicals	PBL		
Practical 3	Pre-packaging of perishables	PBL		
Practical-4	Extension of vase life of cut flowers by use of chemicals and growth regulators;	PBL		
Practical-5	Control of sprouting of potato and onion by using growth regulators	PBL		
Practical-6	Study of effect of pre-cooling on shelf-life and quality of fresh fruits, vegetables and flowers;	PBL

Syllabus-2023-2024

MSc_Agriculture-Agronomy

Title of the Course	Remote sensing & GIS Techniques for Soil and Crop studies
Course Code	SOIL-509 [T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	basic knowledge of soil science			**Co-Requisite/s**	AI and remote sensor			
Course Outcomes & Bloom's Level	**CO1-** Describe the fundamental concept of remote sensing. **(BL1-Remember)** **CO2-** Discuss the application of remote sensing in agriculture. **(BL2-Understand)** **CO3-** Apply image processing techniques for identification of crop and soil issues. **(BL3-Apply)** **CO4-** Examine the Crop stress and Yield forecast of different agricultural crops **(BL4-Analyze)** **CO5-** Determine the GIS techniques for solving complex agricultural problems. **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction and history of remote sensing; sources, propagation of radiations in atmosphere; interactions with matter.	Brain storming, Guided learning, Cooperative Learning Strategies	6
Unit 2	Sensor systems - camera, microwave radiometers and scanners; fundamentals of aerial photographs and image processing and interpretations.	Brain storming, Guided learning, Cooperative Learning Strategies, Lab work	6
Unit 3	Application of remote sensing techniques - land use soil surveys, crop stress and yield forecasting, prioritization in watershed and drought management, wasteland identification and management.	Guided learning, Cooperative Learning Strategies, Lab work, Fieldwork and outdoor learning	6
Unit 4	Significance and sources of the spatial and temporal variability in soils; variability in relation to size of sampling; classical and geo-statistical techniques of evolution of soil variability.	Brain storming, Cooperative Learning Strategies, Problem-based learning	7
Unit 5	Introduction to GIS and its application for spatial and non-spatial soil and land attributes.	Lab work, Fieldwork and outdoor learning Problem-based learning ,Discussions and Presentation, ABL	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Familiarization with different remote sensing equipments and data products	Experiments		2
Practical 2	Interpretation of aerial photographs and satellite data for mapping of land resources	Experiments		2
Practical 3	Analysis of variability of different soil properties with classical and geostatistical techniques	Experiments		2
Practical 4	Creation of data files in a database programme	Experiments		2
Practical 5	Prioritization of watershed	Experiments		2
Practical 6	Use of GIS for soil spatial simulation and analysis	Experiments		2
Practical 7	Preparation of land use and land cover map	Experiments		2
Practical 8	To enable the students to conduct soil survey and interpret soil survey reports in terms of land use planning	Experiments		2

MSc_Agriculture-Genetics_and_Plant_Breeding

Title of the Course	Seed Production Principles and Techniques in Field Crops
Course Code	SST-503[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Seed Technology Fundamentals			**Co-Requisite/s**	Entomology Basics			
Course Outcomes & Bloom's Level	**CO1-** Understand about role of pollinator in quality seed production **(BL1-Remember)** **CO2-** Describe the concept of IPM during seed production and storage **(BL2-Understand)** **CO3-** Understand the classes of pesticides and its use during production and storage of seed **(BL3-Apply)** **CO4-** Conceptualize the detection and loss estimation due to pests in seed storage. **(BL4-Analyze)** **CO5-** Learning about Process of fumigation and its effect **(BL5-Evaluate)** **CO6-** Learning about Process of safe seed storage **(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕			**SDG (Goals)**	SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education)			

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Principles of seed entomology; pollinator insects, insect pests and their classification based on mode of infestation etc.	Cooperative, Interpretive Trails, Critical reading and Writing, ABL	6
Unit 2	Principles of insect pollination, role of pollinators in seed production. Augmenting quality seed production through honeybee pollination incrucifers and forage legumes. Plant protection measures in bee pollinated crops. Management of pollinators for hybrid seed production.	Cooperative, Interpretive Trails, Critical reading and Writing, ABL	6
Unit 3	Major insect pests of principal crops and their management practices. Methods of insect pest control. Classes of pesticides, their handling and safe use on seed crops.	Cooperative, Interpretive Trails, Critical reading and Writing, ABL	6
Unit 4	Storage insect pests infecting seeds, their development and economic importance. Storage losses due to pests, control of storage pests, management of storage insects pests, mites and rodents, seed sampling and loss estimation.	Cooperative, Interpretive Trails, Critical reading and Writing, ABL	6
Unit 5	Principles of fumigation and their use, effect of different fumigants; preservatives and seed protectants on seed quality; Type of storage structures domestic and commercial.	Cooperative, Interpretive Trails, Critical reading and Writing, ABL	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Collection and identification of insect-pollinators, collection and identification of important pests of stored seeds.	Field work	BL2-Understand	2
Practical 2	Detection and estimation of pest infestation vis- a- vis loss of seed quality	Field work	BL3-Apply	2
Practical 3	Safe handing and use of fumigants and insecticides.	Field work	BL3-Apply	2
Practical 4	Safety measures in fumigating and disinfecting , exposure period, aeration etc. the storage structures.	Field work	BL4-Analyze	2
Practical 5	Plant protection equipments, their operation and maintenance.	Field work	BL5-Evaluate	2
Practical 6	Pesticides, its dose determination, preparation of solution and its application.	Field work	BL6-Create	2

Syllabus-2023-2024

MSc_Agriculture-Genetics_and_Plant_Breeding

Title of the Course	Post Harvest Handeling and Storage of Seeds
Course Code	SST-508[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Seed Technology			**Co-Requisite/s**	Maintenance breeding			
Course Outcomes & Bloom's Level	**CO1-** Define the basic mechanism involved in seed processing.**(BL1-Remember)** **CO2-** Understanding on fundamental aspects of storage techniques and quality management practices.**(BL2-Understand)** **CO3-** Conceptualize the advanced research on seed developmental biology.**(BL3-Apply)** **CO4-** Examine the process of seed deterioration**(BL4-Analyze)** **CO5-** Acquire the skill on seed handling and storage methods on commercial basis.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG8(Decent work and economic growth)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Seed processing – objectives and principles; processing sequence – threshing, shelling, ginning, extraction methods; drying – principles and methods; seed cleaning, grading, upgrading – methods – machineries and equipment – scalper, pre-cleaner, cleaner cum grader, specific gravity separator, indented cylinder, disc separator, spiral separator, velvet separator, magnetic separator, electronic colour sorter – working principles and functions.	ABL, Field Base and outdoor learning, Project work	7
Unit-2	Online seed processing – elevators and conveyers – processing plant – specifications, design and layout; mechanical injury – causes and detection – management.	ABL, Field Base and outdoor learning, Project work	6
Unit-3	Seed treatment – methods – pre and mid storage seed treatments, seed treating formulations and equipments; packaging materials – types – bagging and labeling; seed blending – principle and methods.	ABL, Field Base and outdoor learning, Project work	6
Unit-4	Seed storage – purpose and importance – factors affecting storage, optimum condition for storage of different seeds; storage principles – Harrington's thumb rule – concepts and significance of moisture equilibrium – maintenance of safe seed moisture – physical, physiological, biochemical and molecular changes during seed storage – storage behavior of orthodox and recalcitrant seeds – prediction of viability – viability nomograph.	ABL, Field Base and outdoor learning, Project work	6
Unit-5	Methods of seed storage – modified atmospheric storage – ultra dry storage – vacuum storage – cryopreservation – germplasm storage – gene banks – NBPGR, IPGRI and National seed storage laboratory; seed storage godown – structure – maintenance – sanitation.	ABL, Field Base and outdoor learning, Project work	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical -1	Seed extraction – wet and dry methods.	Experiments	BL5-Evaluate	2
Practical -2	Seed processing sequence for different crops	Experiments	BL5-Evaluate	2
Practical -3	Design of processing plant – equipments – estimation of processing efficiency	Experiments	BL5-Evaluate	2
Practical -4	Seed drying methods – principle and methods	Experiments	BL5-Evaluate	2
Practical -5	Practicing seed grading – upgrading techniques	Experiments	BL5-Evaluate	2
Practical -6	Pre-storage seed treatments – protectants – antioxidants – halogens	Experiments	BL5-Evaluate	2
Practical -7	Practicing seed blending methods	Experiments	BL5-Evaluate	2
Practical -8	Seed storage godown – sanitation, fumigation – visit to seed storage godown and cold storage unit	Experiments	BL5-Evaluate	2

MSc_Agriculture-Genetics_and_Plant_Breeding

Title of the Course	Statistical Methods For Applied Sciences
Course Code	STAT-502[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Statistics			**Co-Requisite/s**	Mathematics			
Course Outcomes & Bloom's Level	**CO1-** Describe the understanding of basic concept of statistics and probability in the field of agriculture **(BL1-Remember)** **CO2-** Explain the concepts of probability distributions and various statistical tools used for agricultural data analysis **(BL2-Understand)** **CO3-** Calculate the various statistical parameters of given data samples using parametric and non-parametric tests **(BL3-Apply)** **CO4-** Investigate the multivariate analysis using different software **(BL4-Analyze)** **CO5-** Evaluate the use of various statistical software used for agricultural data sets test/analysis**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG3(Good health and well-being) SDG8(Decent work and economic growth) SDG10(Reduced inequalities)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Classification, tabulation and graphical representation of data. Descriptive statistics (including Box-plot and Scattergrams). Probability Theory, Statistics and Exploratory Data Analysis. Random variable and mathematical expectation.	Classroom Lectures, Activity based learning	9
Unit 2	Discrete and continuous probability distributions: Binomial, Poisson, Normal distribution, Beta and Gamma distributions and their applications. Concept of sampling distribution: chi-square, t and F distributions. Tests of significance based on t and F distributions.	Classroom Lectures, Activity based learning	9
Unit 3	Introduction to theory of estimation and confidence-intervals. Correlation and regression. Simple and multiple linear regression model, estimation of parameters, predicted values and residuals, correlation, partial correlation coefficient, multiple correlation coefficient, rank correlation, test of significance of correlation coefficient and regression coefficients.	Classroom Lectures, Activity based learning	10
Unit 4	Non-parametric tests - sign, Wilcoxon, Mann-Whitney U-test, Wald Wolfowitz run test, Run test for the randomness of a sequence. Median Wallis test, Friedman two-way ANOVA by ranks.	Classroom Lectures, Activity based learning	10
Unit 5	Introduction to multivariate analytical tools- hypothesis about the mean vector of a multinormal pop analysis, principal component analysis and Factor analysis.	Classroom Lectures, Activity based learning	10

M

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
practical-1	Tabulation and graphical presentation of data.	Experiments	BL2-Understand	2
Practical 2	Fitting of distributions ~ Binomial, Poisson and Normal.	Experiments	BL2-Understand	2
Practical 3	Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F.	Experiments	BL3-Apply	2
Practical 4	Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution.	Experiments	BL3-Apply	2
Practical 5	Correlation and regression analysis.	Experiments	BL4-Analyze	2
Practical 6	Applications of dimensionality reduction technique PCA.	Experiments	BL4-Analyze	2
Practical 7	Nonparametric tests.	Experiments	BL5-Evaluate	2

Part B

Modules	Contents	Pedagogy	Hours
1	Classification,tabulationandgraphicalrepresentationofdata.Descriptive statistics (includingBox-plot and Scattergrams). Probability Theory, Statistics and ExploratoryDataAnalysis.Randomvariableandmathematical expectation.	Cooperative Learning Strategies, Brainstorming	3
2	Discreteandcontinuousprobabilitydistributions:Binomial,Poisson,Normal distribution,BetaandGammadistributionsandtheir applications. Conceptofsamplingdistribution:chi square,tandFdistributions.Testsofsignificancebasedontand Fdistributions.	Cooperative Learning Strategies, Brainstorming	3
3	Introductiontotheoryofestimationandconfidence-intervals.Correlationand regression.Simpleandmultiplelinearregressionmodel,estimationofparameters, predictedvaluesandresiduals,correlation,partialcorrelationcoefficient,multiple correlation coefficient,rankcorrelation,testofsignificanceofcorrelation coefficientandregressioncoefficients.	Cooperative Learning Strategies, Brainstorming	3
4	Non-parametrictests-sign,Wilcoxon,Mann-WhitneyU-test,WaldWolfowitzrun test,Runtestfortherandomnessofasequence.Mediantest,Kruskal-Wallistest, Friedmantwo-wayANOVAbyranks.Kendall'scoefficientofconcordance	Cooperative Learning Strategies, BrainstormingCooperative Learning Strategies, Brainstorming	3
5	Introduction to multivariate analytical tools- Hotelling's T2 Tests of hypothesisabout the mean vector of a multinormal population. Cluster analysis, principalcomponentanalysisandFactoranalysis.	Cooperative Learning Strategies, Brainstorming	3

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Tabulationandgraphicalpresentationofdata	PBL		
Practical 2	Fitting of distributions~Binomial,Poissonand Normal.	PBL		
Practical 3	Large sample tests,testingofhypothesisbasedonexactsamplingdistributions~chisquare, tandF.	PBL		
Practical 4	Confiden ceintervalestimationand point estimation of parameters of binomial,PoissonandNormaldistribution	PBL		
Practical 5	Correlation and regression analysis.	PBL		
Practical 6	Applications of dimensionality reduction technique PCA	PBL		
Practical 7	Non parametric tests.	PBL

MSc_Agriculture-Agronomy

Title of the Course	Statistical Methods For Applied Sciences
Course Code	STAT-502[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Agronomy			**Co-Requisite/s**	Agronomy			
Course Outcomes & Bloom's Level	**CO1-** Describe the understanding of basic concept of Statistics and Probability in the field of agriculture**(BL1-Remember)** **CO2-** Explain the concepts of probability distributions and various statistical tools used for agricultural data analysis**(BL2-Understand)** **CO3-** Calculate the various statistical parameters of given data samples using parametric and non-parametric tests**(BL2-Understand)** **CO4-** Investigate the multivariate analysis using different software**(BL4-Analyze)** **CO5-** Evaluate the use of various statistical software used for agricultural data sets test/analysis**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✓ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG4(Quality education) SDG8(Decent work and economic growth)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Classification, tabulation and graphical representation of data. Descriptive statistics (including Box-plot and Scatter grams). Probability Theory, Statistics and exploratory Data Analysis. Random variable and mathematical expectation.	Classroom Lectures Activity based learning Power Point Presentations ABL activities Assignments Unannounced Test Quiz	8
Unit-2	Discrete and continuous probability distributions: Binomial, Poisson, Normal distribution, Beta and Gamma distributions and their applications. Concept of sampling distribution: chi-square, t and F distributions. Tests of significance based on t and F distributions.	Classroom Lectures Activity based learning Power Point Presentations ABL activities Assignments Unannounced Test Quiz	10
Unit-3	Introduction to theory of estimation and confidence-intervals. Correlation and regression. Simple and multiple linear regression model, estimation of parameters, predicted values and residuals, correlation, partial correlation coefficient, multiple correlation coefficient, rank correlation, test of significance of correlation coefficient and regression coefficients.	Classroom Lectures Activity based learning Power Point Presentations ABL activities Assignments Unannounced Test Quiz	10
Unit-4	Unit – 4 Non-parametric tests - sign, Wilcoxon, Mann-Whitney U-test, Wald Wolfowitz run test, Run test for the randomness of a sequence. Median test, Kruskal- Wallis test, Friedman two-way ANOVA by ranks. Kendall's coefficient of concordance.	Classroom Lectures Activity based learning Power Point Presentations ABL activities Assignments Unannounced Test Quiz	10
Unit-5	Unit-5 Introduction to multivariate analytical tools- Hotelling's T2 Tests of hypothesis about the mean vector of a multinormal population. Cluster analysis, principal component analysis and Factor analysis.	Classroom Lectures Activity based learning Power Point Presentations ABL activities Assignments Unannounced Test Quiz	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Unit-1	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL2-Understand	2
Unit-2	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL2-Understand	2
Unit-3	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL3-Apply	2
Unit-4	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL3-Apply	2
Unit-5	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL4-Analyze	2
Unit-6	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL4-Analyze	2
Unit-7	1. Tabulation and graphical presentation of data. 2. Fitting of distributions ~ Binomial, Poisson and Normal. 3. Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F. 4. Confidence interval estimation and point estimation of parameters of binomial, Poisson and Normal distribution. 5. Correlation and regression analysis. 6. Applications of dimensionality reduction technique PCA. 7. Nonparametric tests.	Experiments	BL5-Evaluate	4

MSc_Agriculture-Agronomy

Title of the Course	Experimental Designs
Course Code	STAT-511 [T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Experimental Designs			**Co-Requisite/s**	Experimental Designs			
Course Outcomes & Bloom's Level	**CO1-** Describe the basic concept of designing of field experiment **(BL1-Remember)** **CO2-** Compare the different experimental designs used in agriculture field experiments **(BL2-Understand)** **CO3-** Demonstrate the analysis of covariance in basic designs and confounding in factorial experiments **(BL3-Apply)** **CO4-** Analyse the result of various statistical designs along give scientific interpretation **(BL4-Analyze)** **CO5-** Assess the suitability of different Software for the statistical analysis of different designs for different sets of experimental conditions **(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professsonal Ethics ✓ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Need for designing of experiments, characteristics of a good design. Data Transformation, Basic principles of designs- randomization, replication and local control.	Brain storming, Guided learning, Cooperative Learning Strategies	6
Unit-2	Uniformity trials, size and shape of plots and blocks; Analysis of variance; completely randomized design, randomized block design and Latin square design.	Problem-based learning	6
Unit-3	Factorial experiments, (symmetrical as well as asymmetrical). Orthogonality and partitioning of degrees of freedom, Confounding in symmetrical factorial experiments, Factorial experiments with control treatment.	Cooperative Learning Strategies, Problem-based learning ,Discussions and Presentation	6
Unit-4	Split plot and strip plot designs; Analysis of covariance and missing plot techniques in randomized block and Latin square designs; Transformations, crossover designs, balanced incomplete block design, resolvable designs and their applications ~ Lattice design, alpha design - concepts, randomization procedure, analysis and interpretation of results. Response surfaces. Experiments with mixtures.	Brain storming, Guided learning, Cooperative Learning Strategies	7
Unit-5	Bioassays- direct and indirect, indirect assays based on quantal dose response, parallel line and slope ratio assays potency estimation	Brain storming, Guided learning, Cooperative Learning Strategies	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	1. Analysisof data obtainedfromCRD	PBL		2
Practical 2	2. Analysisofdata obtainedfromRBD	PBL		2

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Production of Cool Season Vegetable Crops
Course Code	VSC-501[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Enlist the varietal strength of cool season vegetable crops.**(BL1-Remember)** **CO2-** Explain the production technology of temperate vegetable crops.**(BL2-Understand)** **CO3-** Demonstrate the intercultural operations in cool season vegetable crops.**(BL3-Apply)** **CO4-** Analyze the difference between cool season and warm season vegetable crops.**(BL4-Analyze)** **CO5-** Apply knowledge of intercultural practices for improving yield of vegetable crops.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction, commercial and nutritional importance, origin and distribution, botany and taxonomy, area, production, productivity and constraints, soil requirements, climatic factors for yield and quality, commercial varieties/ hybrids, seed rate and seed treatment, raising of nursery, sowing/ planting time and methods, hydroponics and aeroponics, precision farming, cropping system, nutritional including micronutrients and irrigation requirements, intercultural operations, special horticultural practices, weed control, mulching, role of plant growth regulators, physiological disorders, maturity indices, harvesting, yield, post-harvest management (grading, packaging and marketing), pest and disease management and production economics of crops. UNIT I Bulb and tuber crops: Onion, garlic and potato.	Cooperative Learning Strategies, Brainstorming, Problem-based learning, Guided Questioning, Fieldwork and outdoor learning, Stimulus activities	2
2	Cole crops: Cabbage, cauliflower, kohlrabi, broccoli, Brussels sprouts and kale.	Cooperative Learning Strategies, Brainstorming, Problem-based learning, Guided Questioning, Fieldwork and outdoor learning, Stimulus activities	2
3	Root crops: carrot, radish, turnip and beetroot	Cooperative Learning Strategies, Brainstorming, Problem-based learning, Guided Questioning, Fieldwork and outdoor learning, Stimulus activities	2
4	Peas and beans: Garden peas and broad bean.	Cooperative Learning Strategies, Brainstorming, Problem-based learning, Guided Questioning, Fieldwork and outdoor learning, Stimulus activities	2
5	Leafy vegetables: Beet leaf, fenugreek, coriander and lettuce.	Cooperative Learning Strategies, Brainstorming, Problem-based learning, Guided Questioning, Fieldwork and outdoor learning, Stimulus activities	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Scientific raising of nursery and seed treatment	PBL		
Practical 2	Sowing and transplanting	PBL		
Practical 3	Description of commercial varieties and hybrids	PBL		
Practical 4	Demonstration on methods of irrigation, fertilizers and micronutrients application	PBL		
Practical 5	Mulching practices, weed management	PBL		
Practical 6	Use of plant growth substances in cool season vegetable crops;	PBL		
Practical 7	Study of nutritional and physiological disorders	PBL		
Practical 8	Studies on hydroponics, aeroponics and other soilless culture	PBL

Syllabus-2023-2024

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Production Technology Of Warm Season Vegetable Crops
Course Code	VSC-502[T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					2	3	1	6
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Enlist the varietal strength of warm season vegetable crops.**(BL1-Remember)** **CO2-** Explain the production technology of warm season vegetable crops.**(BL2-Understand)** **CO3-** Demonstrate the intercultural operations in warm season vegetable crops.**(BL3-Apply)** **CO4-** Analyze the difference between warm season and cool season vegetable crops.**(BL4-Analyze)** **CO5-** Apply knowledge of intercultural practices for improving yield of vegetable crops.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction, commercial and nutritional importance, origin and distribution, botany and taxonomy, area, production, productivity and constraints, soil requirements, climatic factors for yield and quality, commercial varieties/ hybrids, seed rate and seed treatment, raising of nursery, sowing/ planting time and methods, hydroponics and aeroponics, precision farming, cropping system, nutritional including micronutrients and irrigation requirements, intercultural operations, special horticultural practices, weed control, mulching, role of plant growth regulators, physiological disorders, maturity indices, harvesting, yield, post-harvest management (grading, packaging and marketing), pest and disease management and production economics of crops. Bulb and tuber crops: Onion, garlic and potato.	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2
2	Cole crops: Cabbage, cauliflower, kohlrabi, broccoli, Brussels sprouts and kale.	Cooperative Learning Strategies, Fieldwork and outdoor learning, Guided Learning/Questioning, Talks and presentations	2
3	Root crops: carrot, radish, turnip and beetroot	Cooperative Learning Strategies, Fieldwork and outdoor learning, Guided Learning/Questioning, Talks and presentations	2
4	Peas and beans: Garden peas and broad bean.		2
5	Leafy vegetables: Beet leaf, fenugreek, coriander and lettuce.	Cooperative Learning Strategies, Fieldwork and outdoor learning, Guided Learning/Questioning, Talks and presentations	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Scientific raising of nursery and seed treatment	PBL		
Practical 2	Sowing, transplanting, vegetable grafting	PBL		
Practical 3	Description of commercial varieties and hybrids	PBL		
Practical 4	Demonstration on methods of irrigation, fertilizers and micronutrients application	PBL		
Practical 5	Mulching practices, weed management	PBL		
Practical 6	Use of plant growth substances in warm season vegetable crops;	PBL		
Practical 7	Study of nutritional and physiological disorders;	PBL		
Practical 8	Studies on hydroponics, aeroponics and other soilless culture;	PBL

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Growth and Development of Vegetable Crops
Course Code	VSC-503[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** To identify plant growth substances.**(BL1-Remember)** **CO2-** To understand role and use of plant growth substance in vegetable production.**(BL2-Understand)** **CO3-** To detect plant growth substance in plant sample.**(BL3-Apply)** **CO4-** To analyze plant growth physiology.**(BL4-Analyze)** **CO5-** To evaluate the effects of abiotic stresses in horticultural crops.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit – 1	Unit – 1 Introduction and phytohormones: Definition of growth and development; Cellular structures and their functions; Physiology of phyto-hormones functioning/ biosynthesis and mode of action; Growth analysis and its importance in vegetable production.	Cooperative Learning Strategies Brainstorming Problem-based learning Guided Questioning Fieldwork and outdoor learning Stimulus activities	2
Unit-2	Unit – 2 Physiology of dormancy and germination: Physiology of dormancy and germination of vegetable seeds, tubers and bulbs; Role of auxins, gibberellilns, cyktokinins and abscissic acid; Application of synthetic PGRs including plant growth retardants and inhibitors for various purposes in vegetable crops; Role and mode of action of morphactins, antitranspirants, anti-auxin, ripening retardant and plant stimulants in vegetable crop production.	Cooperative Learning Strategies Brainstorming Problem-based learning Guided Questioning Fieldwork and outdoor learning Stimulus activities	2
Unit – 3	Unit – 3 Abiotic factors: Impact of light, temperature, photoperiod, carbon dioxide, oxygen and other gases on growth, development of underground parts, flowering and sex expression in vegetable crops; Apical dominance.	Cooperative Learning Strategies Brainstorming Problem-based learning Guided Questioning Fieldwork and outdoor learning Stimulus activities	2
Unit – 4	Unit – 4 Fruit physiology: Physiology of fruit set, fruit development, fruit growth, flower and fruit drop; parthenocarpy in vegetable crops; phototropism, ethylene inhibitors, senescence and abscission; fruit ripening and physiological changes associated with ripening.	Cooperative Learning Strategies Brainstorming Problem-based learning Guided Questioning Fieldwork and outdoor learning Stimulus activities	2
Unit – 5	Unit – 5 Morphogenesis and tissue culture: Morphogenesis and tissue culture techniques in vegetable crops; Grafting techniques in different vegetable crops.	Cooperative Learning Strategies Brainstorming Problem-based learning Guided Questioning Fieldwork and outdoor learning Stimulus activities	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Preparation of plant growth regulator's solutions and their application	PBL		
Practical 2	Experiments in breaking and induction of dormancy by chemicals	PBL		
Practical 3	Induction of parthenocarpy and fruit ripening;	PBL		
Practical 4	Application of plant growth substances for improving flower initiation, changing sex expression in cucurbits and checking flower and fruit drops and improving fruit set in solanaceous vegetables	PBL		
Practical 5	Growth analysis techniques in vegetable crops;	PBL		
Practical 6	Grafting techniques in tomato, brinjal, cucumber and sweet pepper.	PBL

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Princinples of Vegetable Breeding
Course Code	VSC-504[T]

Part A

Year	1st	**Semester**	1st	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Describe principles and practices adopted for breeding of vegetable crops.**(BL1-Remember)** **CO2-** Describe principles and practices adopted for breeding of vegetable crops.**(BL2-Understand)** **CO3-** Identify constructive approaches in hybrid seed production.**(BL3-Apply)** **CO4-** Apply advance techniques of breeding in vegetable crops.**(BL4-Analyze)** **CO5-** Use basic biometric genetics in computation of various parameters.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
Unit – 1	UNIT-I Importance and history- Importance, history and evolutionary aspects of vegetable breeding and its variation from cereal crop breeding.	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2
Unit-2	UNIT-II Selection procedures- Techniques of selfing and crossing; Breeding systems and methods; Selection procedures and hybridization; Genetic architecture; Breeding for biotic stress (diseases, insect pests and nematode), abiotic stress (temperature, moisture and salt) resistance and quality improvement; Breeding for water use efficiency (WUE) and nutrients use efficiency (NUE).	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2
Unit – 3	UNIT-III Heterosis breeding- Types, mechanisms and basis of heterosis, facilitating mechanisms like male sterility, self-incompatibility and sex forms.	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2
Unit – 4	UNIT-IV Mutation and Polyploidy breeding; Improvement of asexually propagated vegetable crops and vegetables suitable for protected environment.	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2
Unit – 5	UNIT-V Ideotype breeding- Ideotype breeding; varietal release procedure; DUS testing in vegetable crops; Application of In-vitro and molecular techniques in vegetable improvement.	Cooperative Learning Strategies Brainstorming Stimulus activities Fieldwork and outdoor learning	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Floral biology and pollination behaviour of different vegetables	PBL		
Practical 2	Techniques of selfing and crossing of different vegetables, viz., Cole crops, okra, cucurbits, tomato, eggplant, hot pepper, etc.;	PBL		
Practical 3	Breeding system and handling of filial generations of different vegetables;	PBL		
Practical 4	Exposure to biotechnological lab practices	PBL		
Practical 5	Visit to breeding farms	PBL		

Part D(Marks Distribution)

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Breeding of Self Pollinated Vegetable Crops
Course Code	VSC-505[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Describe basic concepts of various methods and technologies used in self-pollinated vegetable crops improvement programs**(BL1-Remember)** **CO2-** Explain the various procedures used for PGR conservation, transfer of traits of interest and advance technologies used for seed production in self-pollinated vegetable crops**(BL2-Understand)** **CO3-** Utilize the crop improvement concepts and principles for developing improved varieties, F1 hybrids and advance breeding linesself-pollinated vegetable crops**(BL3-Apply)** **CO4-** Investigate the suitability of different methods and technologies for the particular traits depending upon gene action, inheritance pattern and nature of donor parents self-pollinated vegetable crops**(BL4-Analyze)** **CO5-** Assess the breeding behaviour of various breeding population along with their maintenance strategiesself-pollinated vegetable crops**(BL5-Evaluate)** **CO6-** Formulate the breeding strategies for transferring gene of interest from different gene of various biotic and abiotic stress and quality traitsself-pollinated vegetable crops**(BL6-Create)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Origin, botany, taxonomy, wild relatives, cytogenetics and genetics, types ofpollination and fertilization mechanism, sterility, breeding objectives, breedingmethods (introduction, selection, hybridization, mutation and polyploidy), varietiesand varietal characterization, resistance breeding for biotic and abiotic stresses,breeding for protected environment and quality improvement, molecular markersand marker's assisted breeding; QTLs, PPV and FR Act. Fruit vegetables- Tomato, eggplant, hot pepper, sweet pepper and okra.	Cooperative Learning Strategies Brainstorming Guided learning Problem-based learning Fieldwork and outdoor learning	2
2	Tuber crops: Potato.	Cooperative Learning Strategies Brainstorming Guided learning Problem-based learning Fieldwork and outdoor learning	2
3	Leguminous vegetables- Garden peas and cowpea.	Cooperative Learning Strategies Brainstorming Guided learning Problem-based learning Fieldwork and outdoor learning	2
4	Leguminous vegetables: French bean, Indian bean, cluster bean and broad bean.	Cooperative Learning Strategies Brainstorming Guided learning Problem-based learning Fieldwork and outdoor learning	2
5	Leafy vegetables- Lettuce and fenugreek.	Cooperative Learning Strategies Brainstorming Guided learning Problem-based learning Fieldwork and outdoor learning	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Floral mechanisms favouring self and often cross pollination	PBL		
Practical 2	Progeny testing and development of inbred lines	PBL		
Practical 3	Selection of desirable plants from breeding population, observations and analysis of various qualitative and quantitative traits in germplasm, hybrids and segregating generations;	PBL		
Practical 4	Palynological studies, selfing and crossing techniques;	PBL		
Practical 5	Hybrid seed production of vegetable crops in bulk	PBL		
Practical 6	Screening techniques for biotic and abiotic stress resistance in above mentioned crops;	PBL		
Practical 7	Molecular marker techniques to identify useful traits in the vegetable crops and special breeding techniques;	PBL		
Practical 8	Visit to breeding farms;	PBL

Title of the Course	Breeding of Cross Pollinated Vegetable Crops
Course Code	VSC-506[T]

Part A

Year	1st	**Semester**	2nd	**Credits**	L	T	P	C
					2	3	1	6
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Acquire knowledge about the breeding of cross pollinated vegetable crops**(BL1-Remember)** **CO2-** Improve yield, quality, abiotic and biotic resistance, and important traits of cross pollinated vegetable crops**(BL2-Understand)** **CO3-** Explain how to start the breeding of cross pollinated vegetable crops**(BL3-Apply)** **CO4-** Analyse the importance of breeding programme of cross pollinated vegetable crops**(BL4-Analyze)** **CO5-** Apply how to develop new varieties of cross pollinated vegetable crops**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Origin, botany, taxonomy, cytogenetics, genetics, types of pollination and fertilization, mechanism, sterility and incompatibility, breeding objectives, breeding methods (introduction, selection, hybridization, mutation, polyploidy), varieties and varietal characterization, resistance breeding for biotic and abiotic stresses, quality improvement, molecular markers and marker assisted breeding, and QTLs, PPV and FR act Unit-1 Cucurbitaceous crops: Gourds, melons, cucumber, pumpkin and squashes.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
2	Cole crops: Cauliflower, cabbage, kohlrabi, broccoli and brussels sprouts.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
3	Root and bulb crops: Carrot, radish, turnip, beet root and onion.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
4	Tuber crops: Sweet potato, tapioca, taro and yam.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2
5	Leafy vegetables: Beet leaf, spinach, amaranth and coriander.	Fieldwork and outdoor learning, Stimulus activities, Cooperative Learning Strategies, Brainstorming	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Floral mechanisms favoring cross pollination	PBL		
Practical 2	Development of inbred lines	PBL		
Practical 3	Selection of desirable plants from breeding population	PBL		
Practical 4	Observations and analysis of various quantitative and qualitative traits in germplasm, hybrids and segregating generations	PBL		
Practical 5	Induction of flowering, palynological studies, selfing and crossing techniques	PBL		
Practical 6	Hybrid seed production of vegetable crops in bulk; Screening techniques for biotic and abiotic stress resistance in above mentioned crops	PBL		
Practical 7	Demonstration of sib-mating and mixed population;	PBL		
Practical 8	Molecular marker techniques to identify useful traits in vegetable crops and special breeding techniques;	PBL

Syllabus-2023-2024

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Seed Production of Vegetable Crops
Course Code	VSC-508[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Memorize principles and methods of quality seed production.**(BL1-Remember)** **CO2-** Describe the basic principles of vegetable seed production in self and cross-pollinated species.**(BL2-Understand)** **CO3-** Experiment with processing and management of vegetable seeds.**(BL3-Apply)** **CO4-** Evaluate the agro-techniques for vegetable seed production in self and cross-pollinated species.**(BL4-Analyze)** **CO5-** Investigate the seed certification process.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction, history, propagation and reproduction: Introduction, definition of seed and its quality, seed morphology, development and maturation; Apomixis and fertilization; Modes of propagation and reproductive behaviour; Pollination mechanisms and sex forms in vegetables; History of vegetable seed production; Status and share of vegetable seeds in seed industry	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
2	Agro-climate and methods of seed production: Agro-climate and its influence on quality seed production; Deterioration of crop varieties, genetical and agronomic principles of vegetable seed production; Methods of seed production, hybrid seeds and techniques of large scale hybrid seed production; Seed village concept	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
3	Seed multiplication and its quality maintenance: Seed multiplication ratios and replacement rates in vegetables; Generation system of seed multiplication; Maintenance and production of nucleus, breeder, foundation, certified/ truthful label seeds; Seed quality and mechanisms of genetic purity testing	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
4	Seed harvesting, extraction and its processing: Maturity standards; Seed harvesting, curing and extraction; Seed processing, viz., cleaning, drying and treatment of seeds, seed health and quality enhancement, packaging and marketing; Principles of seed storage; Orthodox and recalcitrant seeds; Seed dormancy	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
5	Improved agro-techniques and field and seed standards: Improved agro-techniques; Field and seed standards in important solanaceous, leguminous and cucurbitaceous vegetables, cole crops, leafy vegetables, bulbous and root crops and okra; clonal propagation and multiplication in vegetative propagated crops; Seed plot technique and true potato seed production in potato	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	1. Study of floral biology and pollination mechanisms in vegetables;	PBL		
Practical 2	2. Determination of modes of pollination	PBL		
Practical 3	3. Field and seed standards	PBL		
Practical 4	4. Use of pollination control mechanisms in hybrid seed production of important vegetables	PBL		
Practical 5	5. Maturity standards and seed extraction methods	PBL		
Practical 6	6. Seed sampling and testing;	PBL		
Practical 7	7. Visit to commercial seed production areas	PBL		
Practical 8	8. Visit to seed processing plant	PBL

Syllabus-2023-2024

MSc_Agriculture-Horticulture_Vegetable_Science

Title of the Course	Organic Vegetable Production
Course Code	VSC-511[T]

Part A

Year	2nd	**Semester**	3rd	**Credits**	L	T	P	C
					2	0	1	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s				**Co-Requisite/s**				
Course Outcomes & Bloom's Level	**CO1-** Define basic concept of organic inputs.**(BL1-Remember)** **CO2-** Outline soil fertility management in organic vegetable production.**(BL2-Understand)** **CO3-** Apply concept of biodynamic and EM technology in organic vegetable production.**(BL3-Apply)** **CO4-** Analyze plant protection measures in organic vegetable production.**(BL4-Analyze)** **CO5-** Evaluate certification process and quality control.**(BL5-Evaluate)**							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✕ Professsonal Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		**SDG (Goals)**	SDG1(No poverty) SDG2(Zero hunger) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1	Importance and principles—Importance, principles, perspective, concepts and components of organic farming in vegetable crops	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
2	Organic production of vegetables—Organic production of vegetable crops, viz., Solanaceous, Cucurbitaceous, Cole, root and tuber crops	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
3	Managing soil fertility—Managing soil fertility, mulching, raising green manure crops, weed management in organic farming system; Crop rotation in organic production; Processing and quality control of organic vegetable produce	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
4	Composting methods—Indigenous methods of composting, Panchyagavvya, Biodynamics preparations and their application; ITKs in organic vegetable farming; Role of botanicals and bio-control agents in the management of pests and diseases in vegetable crops	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2
5	Certification and export—Techniques of natural vegetable farming, GAP and GMP certification of organic products; Export- opportunity and challenges	Guided learning Fieldwork and outdoor learning Cooperative Learning Strategies Brainstorming	2

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Practical 1	Methods of preparation and use of compost, vermicompost, biofertilizers and biopesticides	PBL		
Practical 2	Soil solarisation	PBL		
Practical 3	Use of green manures	PBL		
Practical 4	Waste management; Organic soil amendments in organic production of vegetable crops	PBL		
Practical 5	Weed, pest and disease management in organic vegetable production	PBL		
Practical 6	Visit to organic fields and marketing centres	PBL
