

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Introduction to Structural Engineering
Course Code	CEL0101[T]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Students must know about various elements and basics of materials			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will get knowledge of Basic Civil Engineering(BL1-Remember) CO2- To understand the Soil properties, Building elements, Integration of Techniques(BL2-Understand) CO3- Students are able to apply knowledge of surveying in field(BL3-Apply) CO4- To Analyse the different Plannings of building(BL4-Analyze) CO5- To evaluate the behavior and Structural failure & constructional issues(BL4-Analyze) CO6- To Complete Determination of Layouts (BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction of soil, Preliminary definition and relationships, determination of index properties, classification of soils, soil structure and clay mineralogy, bearing capacity, shear strength, different types of foundations, shallow ,pile, well, machine foundation, site investigation and sub soil exploration, advanced measuring instruments	Experimental learning , case study ,field trips	8
2	Introduction of surveying, Principle of surveying, Reconnaissance, types of surveying, different types of map, Methods of linear measurements, Conventional symbols, Area calculation, Traversing and Triangulation	Experimental learning , case study ,field trips	8
3	Drawing of Building Elements, Drawing of various elements of buildings like different types of door, windows, lintels, arches, staircase, floors and roofs, Building Planning, Principles of Layout, Different types of IS codes and its provision, different types of loads	Experimental learning , case study ,field trips	9
4	Introduction, properties, grades, advantage & disadvantages of concrete, Ingredients of concrete, types of cement, aggregates, water, admixtures, Inspection & testing of materials as per Indian Standard Specifications, bricks, types of bond, destructive and non destructive testing of materials.	Experimental learning , case study ,field trips	9
5	Structural integrity, Physical and performance failure, fatigue failures, failure due to defective materials, failure due to manufacturing errors, failure due to natural disasters, Different types of new structural designing software	Experimental learning , case study ,field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Sieve Analysis of Fine Aggregates	Experiments	BL3-Apply	2
2	Sieve Analysis of Course Aggregates	Experiments	BL3-Apply	2
3	To range the chain line of 40 to 60m	Experiments	BL3-Apply	2
4	Reconnaissance Survey for Index Sketch	Experiments	BL3-Apply	2
5	Drawing of Bars in Beams	Experiments	BL2-Understand	2
6	Drawing of Bars in Columns	Experiments	BL2-Understand	2
7	Specific Surface of Aggregate	Experiments	BL3-Apply	2
8	Samplings of Soil	Experiments	BL3-Apply	2

Part D(Marks Distribution)

Theory					
Total Marks	Minimum Passing Marks	External Evaluation	Min. External Evaluation	Internal Evaluation	Min. Internal Evaluation

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Basic Electronics
Course Code	ECL0101[T]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Knowledge of modern physics			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To become familiar with various types of semiconductors and basic electronic devices. (BL1-Remember) CO2- To understand the operation of various electronic devices. (BL2-Understand) CO3- To implement the concepts of semiconductors to various semiconductor devices. (BL3-Apply) CO4- To analyze the various electronic devices and their frequency response. (BL4-Analyze) CO5- To evaluate the performance of electronic devices such as diodes, transistors, function generators, and cathode ray oscilloscopes. (BL5-Evaluate)							
Coures Elements	Skill Development ✕ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG1(No poverty) SDG2(Zero hunger) SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
I	Semiconductor Basics: Intrinsic and Extrinsic Semiconductors, Current Mechanisms in Semiconductors: Drift and Diffusion Current. PN Junction: Formation of PN Junction, Creation of Depletion Layer, Forward and Reverse Biasing, Diode Current Equation, Volt – Ampere characteristics of PN junction diode and effect of temperature on V-I characteristics, Diode resistances, Diode Capacitances, Diode Equivalent circuits: Piecewise Linear approximation Model, Simplified approximation Model, Ideal equivalent circuit.	Lecture Method/Video Clips	12
II	Diode Applications: Diode as Rectifier: Half Wave rectifier, Full Wave Rectifier, Calculation of Average, RMS loads voltages and currents, Rectification efficiency, PIV, Ripple factor. Break Down Diodes: Avalanche and Zener Breakdown. V-I characteristics of Zener Diode, Zener Diode Specifications, Zener Diode Equivalent Circuit. Zener Diode as Shunt Regulator: Analysis of Zener diode as shunt regulator under varying Load capacitance and Supply voltage.	Lecture Method/Video Clips/Simulation	10
III	Bipolar Junction Transistor: Formation of NPN and PNP Transistor, unbiased and biased transistor, Transistor currents, Symbol of NPN and PNP Transistors, Common Base, Common Emitter and Common Collector Configurations along with Input and Output Characteristics, Transistor Amplifying action. Transistor Biasing: Load Line, Operating Point, Need of Biasing, Different Biasing Techniques: Fixed Bias, Emitter Stabilized Bias, Voltage Divider Bias, DC Bias with Voltage Feedback	Lecture Method/Video Clips/Virtual Labs	10
IV	Field Effect Transistor: JFET: Construction of N channel and P channel JFET, Working of JFET along with Drain and Transfer Curves, JFET Parameters and symbol, JFET Biasing. MOSFET: Construction and working of N channel and P channel Depletion and Enhancement MOSFETs, Drain and Transfer curves, Symbols. Operational Amplifier: Basics of operation amplifier, op-amp parameters: Input offset voltage, Output offset voltage, Slew rate, CMRR etc. Open and closed loop gain, Virtual Ground, Characteristic of ideal operational amplifier. Operational Amplifier Applications: Use of Ideal Op-amp to construct: Inverting amplifier, Non-inverting amplifier,	Lecture Method/Video Clips/Virtual Labs	12

	Differentiator, Integrator, Adder, Subtractor etc.		
V	Electronic Instruments: Digital Voltmeter, Digital Multimeter, Cathode Ray Oscilloscope, Applications of CRO: Measurement of Voltage, Current, Time Period, Frequency, Use of Lissajous Pattern to Measure unknown frequency and phase difference, Function Generator.	Lecture Method/Video Clips/Virtual Labs/Simulation	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Introduction to Laboratory Equipment's: Cathode Ray Oscilloscope (CRO), Function Generator, Digital Multimeter.	Experiments	BL2-Understand	2
3	To study Full Wave Centre Tap Rectifier and calculate various parameters.	Experiments	BL4-Analyze	2
1	To study and plot the V-I characteristics of PN Junction Diode.	Experiments	BL4-Analyze	2
4	To study Full Wave Bridge Rectifier and calculate various parameters	Experiments	BL4-Analyze	2
3	To study and plot Input & Output Characteristics of BJT in Common Base Configuration	Experiments	BL5-Evaluate	2
4	To study and plot Input & Output Characteristics of BJT in Common Emitter Configuration	Experiments	BL4-Analyze	2
2	To Design Half-Wave rectifier by using basic electronic components	PBL	BL6-Create	10
4	Construct a Simple Audio Amplifier • Objective: Build a small audio amplifier for use with portable speakers. • Focus Areas: Operational amplifiers, transistors, capacitors, and speaker integration. • Outcome: A compact amplifier circuit that boosts audio signals for speaker output.	PBL	BL6-Create	10

Part D(Marks Distribution)

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Communication Skills & Colloquium
Course Code	HUL0101[T]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Disciplinary Major							
Pre-Requisite/s	Student must have knowledge about Language proficiency.			Co-Requisite/s	1.Developed Communication skills. 2.Career Development workshop			
Course Outcomes & Bloom's Level	CO1- Comprehend and summarize characteristics & various structural principles prerequisite to Technical Communication ((BL1-Remember) CO2- Classify and formulate the elementary intricacies of Scientific and Technical Writing using application grammar construct.(BL2-Understand) CO3- Create cohesive technical paragraphs & text.(BL3-Apply) CO4- Paraphrase text(s) and use appropriate referencing styles(BL4-Analyze) CO5- Evaluate the significance of Formal Writing(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
Module-1	Introduction to Communication Skills, Objectives, Significance of Communication, Flow of Communication, Principles Communication, Essential Features, Process of Communication, Verbal (Oral & Written) and Non-verbal Communication, Barriers to Effective Communication, Introduction to Technical Communication, Major Difference between Technical Communication and General Communication.	Audio/Video clips, group discussion, Lecture Method	6
Module-2	Introduction & Significance of Listening skills, Types of Listening, Barriers in Effective Listening, Basic Grammar - Parts of Speech, Active Passive and Articles.	Audio/Video clips, group discussion, Lecture Method	6
Module-3	Introduction to Formal Letter Writing, Elements of Letter Writing and Style of Writing, Layout & Structure of Formal Letter Writing, Introduction to the Types of Business Letters- Enquiry, Calling Quotations, Order, Complaint and Adjustment. Introduction to Employment Communication- Job Application, Writing Resume, Differences among Resume, Curriculum Vitae & Bio-data.	Audio/Video clips, group discussion, Lecture Method	6
Module-4	Introduction to Oral Presentations, Objectives, Significance and Approach, Preparation and Delivery of Oral Presentation (topics to be selected by the teachers). Introduction to Interview Skills. How to Develop Interview Skills. Dos and Don't of Interviews, Types of Interviews, Reviewing TV Program/Book/News Paper Articles etc.	Audio/Video clips, group discussion, Lecture Method	6
Module-5	Introduction to Report Writing, Major Objectives of Writing Reports, Significance of Business/Technical, Types and Forms of Reports, Styles of Writing Reports- Printed Format, Memo Format, Letter Format, Book/Letter Text Format. Layout and Structure of Reports, Components of Reports, Writing	Audio/Video clips, group discussion, Lecture Method	6

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Unit 1	Soft Skills	PBL	BL2-Understand	6
Unit 2	Basics of Communication	PBL	BL3-Apply	6
Unit 3	Letter Writing	PBL	BL3-Apply	6
Unit 4	Active Passive	PBL	BL4-Analyze	6
Unit 5	Rport Writing	PBL	BL5-Evaluate	6

Part D(Marks Distribution)

Theory

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Calculus For Engineers
Course Code	MAL0101[T]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					5	3	2	10
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basic knowledge of Functions, Limit, Continuity and Differentiability			Co-Requisite/s	Basic knowledge of variables			
Course Outcomes & Bloom's Level	CO1- Knowledge about the derivative and use of derivative to expand the functions and evaluation of Maxima and Minima.(BL1-Remember) CO2- Knowledge about the vector valued function directional derivative, gradient, divergence and curl with their properties(BL2-Understand) CO3- Applying: Partial derivatives and its applications apply to evaluate the Maxima and Minima.(BL3-Apply) CO4- Find the area under a given curve, length of an arc through integration as application to Beta and Gamma Function.(BL4-Analyze) CO5- Evaluating: Find the area and volume by applying the techniques of double and triple integrals., (BL5-Evaluate) CO6- Applications of vector valued function in integration to find line , surface and volume. (BL5-Evaluate)							
Coures Elements	Skill Development ✕ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Differentiation, Extrema on an Interval, Rolle's Theorem and the Mean Value Theorem, Increasing and Decreasing functions and First derivative test, Second derivative test, Maxima and Minima. Functions of two variables, partial derivatives, total differential, Jacobian and its Properties	Audio/Video clips, group discussion, lecture Method	8
Unit 2	Taylor's expansion for two variables, maxima and minima, constrained maxima and minima, Lagrange's multiplier method. Integration, Average function value, Area between curves, Volumes of solids of revolution, Beta and Gamma functions, interrelation.	Audio/Video clips, group discussion, lecture Method	8
Unit 3	Evaluation of double integrals, change of order of integration, change of variables between Cartesian and polar co-ordinates, Evaluation of triple integrals, change of variables between Cartesian and cylindrical and spherical co-ordinates, evaluation of multiple integrals using gamma and beta functions.	Audio/Video clips, group discussion, lecture Method	8
Unit 4	Scalar and vector valued functions, gradient, tangent plane, directional derivative, divergence and curl, scalar and vector potentials, Statement of vector identities, Simple problems.	Audio/Video clips, group discussion, lecture Method	8
Unit 5	Line, surface and volume integrals, Statement of Green's, Stoke's and Gauss divergence Theorems, verification and evaluation of vector integrals using them.	Audio/Video clips, group discussion, lecture Method	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Introduction to MATLAB through matrices, and general Syntaxes.	Experiments	BL3-Apply	2
2	Plotting and visualizing curves and surfaces in MATLAB– Symbolic computations using MATLAB	Experiments	BL3-Apply	2
3	Evaluating Extremum of a single variable function	Experiments	BL3-Apply	2
4	Understanding integration as Area under the curve	Experiments	BL3-Apply	2
5	Evaluation of Volume by Integrals (Solids of Revolution)	Experiments	BL3-Apply	2
6	Evaluating Maxima and minima of functions of several variables	Experiments	BL3-Apply	2
7	Evaluating triple integrals	Experiments	BL3-Apply	2
8	Evaluating gradient, curl and divergence	Experiments	BL3-Apply	2

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Engineering Mechanics
Course Code	MEL0101[T]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Knowledge of basic sciences			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- CO1 Remember the basics of sciences in effects of system of forces on rigid bodies in static and kinetic conditions.(BL1-Remember) CO2- CO2 Understand the basics of sciences in effects of system of forces on rigid bodies in static and kinetic conditions.(BL2-Understand) CO3- CO3 Apply system of forces in the belts drive systems as power transmission devices, shafts and beams.(BL3-Apply) CO4- CO4 Analyze the beams and trusses with centre of mass and moment of inertia.(BL4-Analyze) CO5- CO5 Evaluate shear force and bending moment in designing of shafts and beams and trusses.(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Introduction of Engineering Mechanics Basic concepts of system of forces- Coplanar Concurrent Forces - Components in Space – Resultant Moment of Forces and its Application - Couples and Resultant of Force System - Equilibrium of System of Forces- Free body diagrams- Equations of Equilibrium of Coplanar Systems and Spatial Systems.	Lectures Method, Group discussion	9
Unit-2	Friction Types of friction, Limiting friction, Laws of Friction, static and Dynamic Friction. Motion of Bodies - Wedge, Ladder and Screw jack.	Lectures Method, Group discussion	7
Unit-3	Transmission of Power Belt Drivers - Open, Crossed and compound belt drives, length of belt, tensions- tight side and slack side, Power transmitted and condition for maximum power.	Lectures Method, Group discussion	7
Unit-4	Center of Gravity & Moment of Inertia: Centroids - Centroids of Composite figures - Centre of Gravity of Bodies - Area moment of Inertia: - polar Moment of Inertia - Transfer - Theorems - Moments of Inertia of Composite Figures, Moment of Inertia of Masses - Transfer Formula for Mass Moments of Inertia..	Lectures Method, Group discussion	8
Unit-5	Shear Force & Bending Moment Diagrams & Trusses: Support Reactions, Shear force and bending moment Diagram for Cantilever & simply supported beam with concentrated, distributed load and Couple. Application of Equilibrium Concepts. Trusses- types, method of joints and method of moments.	Lectures Method, Group discussion	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Experiment-1	1. To verify the law of Triangle of forces and Lami's theorem.	Experiments	BL3-Apply	2
Experiment-2	2. To verify the law of parallelogram of forces	Experiments	BL3-Apply	2
Experiment-3	3. To verify law of polygon of forces	Experiments	BL3-Apply	2
Experiment-4	4. To find the support reactions of a given truss and verify analytically.	Experiments	BL3-Apply	2
Experiment-5	5. To determine support reaction and shear force at a given section of a simply supported beam and verify in analytically using parallel beam apparatus.	Experiments	BL3-Apply	2
Experiment-6	6. To verify bending moment at a given section of a simply supported beam.	Experiments	BL3-Apply	2
Experiment-7	7. To find coefficient of friction on horizontal and inclined planes.	Experiments	BL3-Apply	2
Experiment-8	8. To determine centre of gravity of different shapes.	Experiments	BL3-Apply	2

(SOET)(BTech-CivilEngineering)

Title of the Course	Mechanical Workshop Practice
Course Code	MEP0101[P]

Part A

Year	1st	Semester	1st	Credits	L	T	P	C
					0	0	2	2
Course Type	Lab only							
Course Category	Discipline Core							
Pre-Requisite/s	Basic knowledge of casting, joining and machining.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember basics of physics.(BL1-Remember) CO2- To understand the tool materials and their proper applications.(BL2-Understand) CO3- To prepare and manufacture the various joints using carpentry and fitting shop tools and welding process.(BL3-Apply) CO4- To analyze casting and welding products.(BL4-Analyze) CO5- To evaluate the casting process parameters and welding parameters for efficient productivity.(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG9(Industry Innovation and Infrastructure)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Carpentry Shop Carpentry, process of finished products, building work, furniture, cabinet making Etc. joinery, preparation of joints, Timber, Timber sizes, classification of Timber, Characteristics of good timber, seasoning of wood.	Lectures with whiteboard/PPT, Recorded video/interactive videos, Quiz	
Unit-2	Marking and Measuring Tools Steel rule and Steel tape, Marking gauge, Try-square, Compass and divider, Scriber or marking knife, Bevel, Holding Tools- Carpenter's vice, C-clamp, Bar clamp, Planing Tools- Jack plane, Smoothing plane, Rebate plane, Plough plane Cutting Tools- Saws, Cross-cut or hand saw, Rip saw, Tenon saw, Compass saw, Chisels, Drilling and boring tools- Carpenter's brace, Auger bit, Hand drill, Gimlet, miscellaneous tools- Mallet, Pincer, Claw hammer, Screw driver, Wood rasp file, Bradawl, wood joints- Lap joints, Mortise and Tenon Joints, Bridle joint.	Lectures with whiteboard/PPT, Recorded video/interactive videos, Quiz	
Unit-3	Welding Shop Electric arc welding, Gas welding, Thermal welding, Electrical Resistance welding, Friction welding Equipment Used for Welding- Transformers, Motor generators, Rectifiers, Welding cables, Electrodes, electrode holder, Ground clamp, wire brush and chipping hammer, Welding table and cabin, Face shield, Hand gloves. Techniques of welding Preparation of work, striking an arc, Strike and Withdraw, Touch and with draw, Weaving, Types of Joints- Butt Joint, Corner Joint, Tee Joint, Lap joint, Edge welding positions- Flat position welding, Horizontal position welding, Vertical position welding, Overhead position welding.	Lectures with whiteboard/PPT, Recorded video/interactive videos, Quiz	
Unit-4	Fitting Shop Introduction hand fitting, the assembly of machine tools, jigs, gauges, etc., bench work. assembly of mating parts, removal of metal, fit, simple hand tools. filing, chipping, scraping, sawing drilling, and tapping. Holding tools, Cutting Tools - Finishing Tools, Reamers, Files, miscellaneous tools ---- File card, Spirit level, Ball Peen Hammer, Cross Peen, Hammer, Straight-Peen Hammer, Screw driver, Spanners.	Lectures with whiteboard/PPT, Recorded video/interactive videos, Quiz	
Unit-5	Foundry shop Process, Melting, Furnace, Degassing, Mold making, Pouring, Shakeout, Degating, Heat treating, Surface cleaning, Finishing,	Lectures with whiteboard/PPT, Recorded video/interactive videos, Quiz	

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Experiment-1	To study of Tools and Their Operations in Carpentry joint	Experiments	BL2-Understand	4
Experiment-2	To Prepare Half Lap corner joint and T- joint	Experiments	BL3-Apply	4
Experiment-3	To study of tools and their operations in Fitting Shop	Experiments	BL3-Apply	4
Experiment-4	To study of tool and operations in welding shop	Experiments	BL3-Apply	4
Experiment-5	To study of single point cutting tools , machine tool and operations in machine shop	Experiments	BL3-Apply	4

(SOET)(BTech-CivilEngineering)

Title of the Course	Structural Materials
Course Code	CEL0233[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basics of Civil Engineering			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will get knowledge of Basic Structural Materials(BL1-Remember) CO2- To understand the materials use in Civil Engineering industry(BL2-Understand) CO3- Students are able to apply the details of Innovative Textures(BL3-Apply) CO4- To analyse different Admixtures & other adhesives(BL4-Analyze) CO5- To evaluate the behavior of different Structural materials in different purposes(BL5-Evaluate) CO6- To Create adequate type of Construction material (BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Mud:- Stabilization and use for walling and terracing, Stones:- Classification, Availability, Characteristics, Test and Uses. Lime: Availability, Preparation and Uses. Brick:- Manufacture , Properties, Classification, Testing & Defects, Qualities of good brick, Aggregates <u>AI applications used for checking the strength of different composition of concrete</u>	Lectures with Seminars, PBL and Case Studies	8
2	Timbers: - Varieties of Indian timbers , Characteristics, Defects and decay, seasoning and preservation. Roof Covering Materials:- Clay Tiles (Country, Allahabad, Mangalore tiles etc.), Concrete Tiles, Asbestos Cement sheets (Plain & Corrugated), Aluminium Sheets (Plain & Corrugated), Galvanized Iron Sheets (Plain & Corrugated), Stone Slating, Shingles, Thatch	Lectures with Seminars, PBL and Case Studies	8
3	Glass & Glass Products: Plain, Special Glasses & Glass Products. Surface Finishing:- Plastering, Painting & varnishing. Floor Finishing: - Hard & Soft Floorings. Bamboo:- Properties, uses	Lectures with Seminars, PBL and Case Studies	8
4	Cement:- Types of cement, composition, properties and uses, brief study on manufacture of Portland cement , tests for cement. Adhesives:-Introduction, Natural Adhesives, Thermoplastic Adhesives, Thermosetting Adhesives & Plastics, Epoxide Resins, Rubber Adhesive. Ceramics:- Manufacturing , properties & Uses, D.P.C.:- Asphalt, Bitumen, Synthetic	Lectures with Seminars, PBL and Case Studies	8
5	Metals :- Ferrous – Iron (Pig, Cast & Wrought), Steel, Structural, Sheet and Alloys. Non Ferrous: Aluminium, copper & copper based alloys (brass & bronze), tin, cadmium, chromium, zinc, lead, nickel. Gypsum:- Introduction - Gypsum Board, Suspended Ceiling (Board & Tiles), Gypsum Plaster. Prefabrication:- Systems – open prefab system, large panel prefab system, joints, pre-casting methods, materials, on-site and off-site prefabrication, components	Lectures with Seminars, PBL and Case Studies	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Compressive Strength of Bricks	Experiments	BL2-Understand	2
2	Water absorption of Bricks	Experiments	BL2-Understand	2
3	Initial and Final Setting time of Cement	Experiments	BL3-Apply	2
4	Efflorescence of Bricks	Experiments	BL2-Understand	2
5	Specific Gravity of Aggregate	Experiments	BL3-Apply	2
6	Fineness of Cement	Experiments	BL2-Understand	2
7	Tensile test of TOR Steel	Experiments	BL3-Apply	2
8	Soundness of Cement	Experiments	BL3-Apply	2
9	project on waste material used in concrete	PBL		28 days

Title of the Course	Essentials of Information Technology
Course Code	CSL0201[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	0	2	4
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	To understand the contents and successfully complete this course, a participant must have a basic understanding of Basics of Computer system, Storage Systems, Operating systems, Networking and Database.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Understand the basics of Computer systems like types, I/O devices, storage of computer systems (Knowledge, Understand)(BL1-Remember) CO2- Apply the various networking concepts, topologies and remove deadlocks. (Apply). (BL2-Understand) CO3- Explain various memory management techniques and Analyze the concept of Sub-programs and blocks (Analysis)(BL3-Apply) CO4- Design the concept of software, operating system for better utilization of external system (Design)(BL4-Analyze) CO5- Evaluating the various algorithm, its solution and other communication techniques. (Investigation).(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✗ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG4(Quality education) SDG9(Industry Innovation and Infrastructure)				

Part B

Modules	Contents	Pedagogy	Hours
1	Computer Basics: Basics of Computer Systems(T1,T2), Evolution of Computers, Computer Generations, Classification of Computers(T1,T3), Computer Applications, Interaction between User and Computer(T7). Hardware Components, Basic Computer Organization, Input and Output Devices(T1,T3), Central Processing Unit(T1), System Bus Architecture, Memory or Storage Unit	Lecture with White Board, PPT	6
2	Operating System: Introduction to Operating System, Function of Operating Systems(T1), Working Knowledge of GUI-Based Operating System (T3,T4), Working with latest version of Windows(T3,T4). Various Operating Systems, Evaluation of Operating System(T3,T4,T7), Virtual Machine, Operating Systems for Mobile, Installation of Operating System(T1,T3,T4), Boot Process.	Lecture with White Board, PPT	6
3	Computer Networks and World Wide Web: Introduction to Computer Networks (LAN, MAN, WAN, PAN)(T3,T4), Network Topologies, Ethical Issues related to Network Security(T2,T3). Internet and World Wide Web(T7,T8), Internet Evolution(T1), FTP, Electronic Mail, Search Engines(T1), Introduction to HTML, Static and Dynamic Web Pages	Lecture with White Board, PPT	6
4	Computer Software: Introduction, System Software(T1,T3), Application Software, Firmware(T3), Software Installing and Uninstalling(T3,T4), Software Development Steps, Characteristics of good software(T1,T7), Usability of software, Introduction to Free and Open Source Software(T3,T4), Introduction to Database Management System	Lecture with White Board, PPT	6
5	Subprograms and Blocks: Problem Solving: Flow Charts(T3,T4), Tracing Flow Chart, Algorithms. Fundamentals of sub-programs(T1,T3,T4), Scope of life time of variables, static and dynamic scope(T7), design issues of subprograms and operations, parameter passing methods(T3,T4), overloaded sub-programs, generic sub-programs(T1,T3), design issues for functions user defined overloaded operators	Lecture with White Board, PPT	6

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Explain the Installation process of Operating system and its Memory Management.	Experiments	BL2-Understand	10
2-3	Design of a Web Page which describe your Biodata.	PBL	BL3-Apply	10
4-5	Describe Software development life cycle (SDLC) with all components.	PBL	BL5-Evaluate	10

(SOET)(BTech-CivilEngineering)

Title of the Course	Programming Logics
Course Code	CSP0201[P]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					0	0	2	2
Course Type	Lab only							
Course Category	Foundation core							
Pre-Requisite/s	Basic understanding of Windows/Linux operating system.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Remember: Recall the syntax and basic concepts of C programming. (BL1-Remember) CO2- Understand: Explain the meaning of C programming constructs and how they work together (BL2-Understand) CO3- Apply : Apply the various conditional and looping statement and functional programming. (BL3-Apply) CO4- Analyzing: Analyze and evaluate C programming code to identify errors and optimize performance. (BL4-Analyze) CO5- Evaluate : Evaluate the effectiveness of C programming solutions and propose improvements. (BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✗ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG4(Quality education) SDG9(Industry Innovation and Infrastructure)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction: Character set, variables and identifiers, built-in data types, arithmetic operators and expressions, constants and literals, simple assignment statements, basic input/output statements, simple 'C' programs.	Demonstration through PPT, Computer	10
2	Conditional Statements and Loops: Decision making within a program, conditions, relational operators, logical connectives, if statement, if-else statement; Loops: while loop, do-while loop, for loop; nested loops, infinite loops; switch statement, structured programming. Array: One Dimensional Arrays - array manipulation, searching, insertion and deletion in an array; Two Dimensional Arrays - addition/multiplication of two matrices, transpose of a square matrix; string	Demonstration through PPT, Computer	10
3	Pointer: Address operators, pointer type declaration, pointer assignment, pointer initialization, pointer arithmetic, functions and pointers, arrays and pointers, pointer arrays, dynamic memory allocation. Functions: Standard library functions, prototype of a function, return type, function calling, block structure, passing arguments to a function - call by reference and call by value; recursive functions, arrays as function arguments.	Demonstration through PPT, Computer	10
4	Structure and Union: Structure variables, initialization, structure assignment, nested structure, structures and functions, structures and arrays - arrays of structure, structures containing arrays, unions. Dynamic Memory Management: Use of malloc, calloc, realloc and free keywords	Demonstration through PPT, Computer	10
5	File Management: Introduction, defining and opening a file, closing a file, input/output operations on files, error handling during i/o operations, random access to files, programs using files. Command Line Arguments: argv and argc arguments, programs using command line arguments. Preprocessor: Introduction, macro substitution, file inclusion, compiler control directives.	Demonstration through PPT, Computer	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Life Insurance Premium Calculator	Experiments	BL3-Apply	10
2-3	Program to compare best life insurance plan using an array.	PBL	BL4-Analyze	10
4-5	Write a C program to read name and marks of n number of students from user and store them in a file. If the file previously exists, add the information of n students.	PBL	BL5-Evaluate	20

(SOET)(BTech-CivilEngineering)

Title of the Course	Principles of Electrical Engineering
Course Code	EEL0201[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline-linked Engineering Science Courses							
Pre-Requisite/s	Knowledge of physics and basic electronics			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Predict the behavior of any electrical circuits, Formulate and solve complex DC circuits. (BL1-Remember) CO2- Predict the behavior of any electrical circuits, Formulate and solve complex single phase AC circuits. (BL2-Understand) CO3- Predict the behavior of any electrical circuits, Formulate and solve complex Three phase AC circuits. (BL3-Apply) CO4- Identify the type of electrical machine used for that particular application. Realize the requirement of transformers in transmission and distribution of electric power and other applications. (BL4-Analyze) CO5- Predict the behavior of various measuring instruments in electrical engineering (BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✗ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG7(Affordable and clean energy) SDG9(Industry Innovation and Infrastructure)				

Part B

Modules	Contents	Pedagogy	Hours
1	D.C. Circuit: - Combination of resistance in series & parallel, their solution, Star –Delta combination, KCL and KVL. Voltage and current sources, dependent and independent sources, source conversion, DC circuit's analysis using mesh & nodal method, Superposition theorem.	Lecture with white board, ppt	10
2	Single Phase Circuit:- Generation of Alternating Voltage & Currents, Their Equation, Definition, R.M.S and Average values, Vector representation of alternating quantities, Phasor relations between voltage & current in each of resistance, inductance and capacitance, A.C series circuit power & power factor, Resonance in series circuit.	Lecture with white board, ppt	12
3	Electrical Measuring Instruments:- Introduction and classification of Electrical Instruments, Essentials of indicating instruments, Moving iron instruments, Types of moving iron instruments, Advantages and Disadvantages of moving iron instruments, Applications of moving iron equipment, Permanent Magnet type moving coil instruments, extension of range of ammeters and voltmeter, Dynamometer type instruments, Dynamometer type wattmeters	Lecture with white board, ppt	7
4	Poly-phase Circuits:-Generation of Poly-phase Voltages, 3phase system, Phase sequence, Inter connection of 3 phases, Voltage, Currents & Power relationships in balanced 3 phase circuits, Power Measurement in single phase & 3 phase circuits..	Lecture with white board, ppt	8
5	Transformer:- Construction & working principle of transformer, Emf equation, No load & Full load phasor diagram, Equivalent circuit, Losses & Efficiency, Voltage Regulation, Open circuit & Short Circuit Test on the Transformer	Lecture with white board, ppt	10

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Statistics For Engineers
Course Code	MAL0203[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Basic Sciences and Mathematics							
Pre-Requisite/s	statistics for engineers typically include basic mathematics (algebra, calculus), understanding of probability theory, and familiarity with concepts in engineering disciplines. Additionally, knowledge of software tools like MATLAB or Python for data analysis is beneficial.			Co-Requisite/s	statistics for engineers may include introductory courses in engineering mechanics, computer programming, and experimental methods. Additionally, concurrent enrollment in courses covering linear algebra and differential equations could provide valuable mathematical background for understanding advanced statistical concepts and applications in engineering contexts.			
Course Outcomes & Bloom's Level	CO1- To remember basic concept of about the design data collection plans and basic tools of descriptive statistics. (BL1-Remember) CO2- To understand the identify relationship between two variables using scatter plot and Interpret a simple correlation. To understand the Knowledge about the different types of continuous distribution with their properties and applications. (BL2-Understand) CO3- To apply the test and make hypothesis by Student's t-test, F-test, chi-square test, Z test, goodness of fit. (BL3-Apply) CO4- To analyze the concept of sampling distribution of a statistic and its properties, difference between parameter and statistic. (BL4-Analyze) CO5- To evaluate and describe the properties of unbiasedness. Also identifying and provide an application the null hypothesis, alternative hypothesis and test statistic. (BL5-Evaluate)							
Coures Elements	Skill Development ✕ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to statistics and data analysis Measures of central tendency, Measures of variability, [Moments, Skewness, Kurtosis (Concepts only)]. Correlation and Regression, Partial and Multiple correlations, Multiple regressions.	lecture with ppt, quiz Audio/Video clips, group discussion,	10
2	Introduction, random variables, Probability mass Function, distribution and density functions, joint Probability distribution and joint density functions, Marginal, conditional distribution and density functions, Mathematical expectation, and its properties Covariance, moment generating function, characteristic function.	lecture with ppt, quiz Audio/Video clips, group discussion	10
3	Binomial and Poisson distributions, Normal distribution, Gamma distribution, Exponential distribution.	lecture with ppt, quiz lecture with ppt, quiz Audio/Video clips, group discussion, classroom presentations, Analysis	6
4	Testing of hypothesis, Introduction, Types of errors, critical region, procedure of testing hypothesis, Large sample tests, Z test for Single Proportion, Difference of Proportion, mean and difference of means.	lecture with ppt, quiz Audio/Video clips, group discussion	8
5	Small sample tests, Student's t-test, F-test, chi-square test, goodness of fit, independence of attributes, Design of Experiments, Analysis of variance, one and two way classifications, CRD, RBD, LSD.	lecture with ppt, quiz Audio/Video clips, group discussion,	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Introduction: Understanding Data types; importing/exporting data.	Experiments	BL2-Understand	2
2	Computing Summary Statistics/plotting and visualizing data using Tabulation and Graphical Representations.	Experiments	BL3-Apply	2
3	Applying correlation and simple linear regression model to real dataset; Computing and interpreting the coefficient of determination	Experiments	BL3-Apply	2
4	Applying multiple linear regression model to real data set; computing and interpreting the multiple coefficient of determination	Experiments	BL3-Apply	2
5	Fitting the following probability distributions: Binomial distribution,	Experiments	BL3-Apply	2
6	Normal distribution Poisson distribution	Experiments	BL3-Apply	2
7	Testing of hypothesis for One sample mean and proportion from real, time problems	Experiments	BL3-Apply	2
8	Testing of hypothesis for Two sample mean and proportion from real, time problems	Experiments	BL3-Apply	2

(SOET)(BTech-CivilEngineering)

Title of the Course	Environmental Pollution and Global Issues
Course Code	MCL0201[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Foundation core							
Pre-Requisite/s	Basic knowledge of natural resources, biodiversity, ecological succession, energy flow, environmental issues and problems.			Co-Requisite/s	A detailed understanding of the complexity of environment and its challenges and solutions to these problems and challenges.			
Course Outcomes & Bloom's Level	CO1- CO1. Develop environmental scientists and engineers and sensitize them towards environmental issues.(BL2-Understand) CO2- CO2. To acquire analytical skills in assessing environmental impacts through a multidisciplinary approach(BL3-Apply) CO3- CO3. Ability to distinguish between various methods of various pollution analysis(BL4-Analyze) CO4- CO4.Acquire expertise and skills needed for the Environmental Management Systems and techniques of monitoring, Environment audit, Environmental Impact Analysis, environment instrumentation and control systems and for the projects development, implementation, and maintenance.(BL5-Evaluate) CO5- CO5. Students acquire skills for to communicate, prepare, plan and implement the environmental management project(BL6-Create)							
Coures Elements	Skill Development ✕ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✓ Environment ✓		SDG (Goals)	SDG5(Gender equality) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG12(Responsible consunption and production) SDG13(Climate action) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
1 (Environment, Ecosystem and Environmental Education)	Environment – Definition and its segments, (Lithosphere, Hydrosphere, Atmosphere and Biosphere), Multidisciplinary nature of Environmental Science, Ecology and Ecosystem: Basic concepts, functions of ecosystem, Energy Flow, Food chain, food web, Ecological Pyramids, Ecological Successions. Environmental Education- Definition, scope, importance, Need for Public Awareness, Environmental Ethics. Environmental Impact Assessment: Screening, Scoping, Base line Analysis, Impact Mitigation, Documentation, Review, Public hearing, Post Project Monitoring.	Lecture with ppt., Diagrams, Flowchart depiction on whiteboard during online/offline lectures, Audio/Video clips, discussion (questions & answers section)	8
2 (Natural Resources Management)	Natural Resources – Classification, Water Resources (availability, quality, water budget), Mineral Resources (distribution, availability and future perspectives), and Forest Resources. Energy Resources- Classification and alternatives of conventional energy resources- Solar, working of solar photovoltaic cells, Geothermal, Wind energy, Nuclear Energy, Biomass and Bio-gas	Lecture with ppt., Diagrams, Flowchart depiction on whiteboard during online/offline lectures, Audio/Video clips, Group discussion.	8
3 (Water, Soil & Noise Pollution)	Water pollution – sources & effects, characteristics and treatment of waste water, engineered systems for water purification: Aeration, solid separation, settling operations, filtration and disinfection. Soil - formation of soil, elementary and mineral composition, types of soil in India, soil pollution, effects and abatements. Noise Hazards: Continuous and impulse noise, Effect of noise on man, Measurement and evaluation of Noise, noise isolation and absorption techniques, silencers, practical aspects of noise.	Lecture with ppt., Diagrams, Flowchart depiction on whiteboard during online/offline lectures, Audio/Video clips, Group discussion.	8
4 (Atmospheric chemistry and Air Pollution)	Classification, sources and toxic effects of air pollutants, dispersal of air pollutants, engineered systems for air purification: Atmospheric cleansing process, approaches to contamination control. Air pollutants with emphasis on reactive intermediates in atmosphere like hydroxyl radical, ozone and nitrate radical, types of hydrocarbon in the troposphere, reaction of organic compounds in the atmosphere.(Green house gas effect, Global warming, Climate change).	Lecture with ppt., Diagrams, Flowchart depiction on whiteboard during online/offline lectures, Audio/Video clips, Group discussion.	8
5 (Waste Management)	Solid waste: Generation and waste characterization. Collection, storage and transport. Waste disposal, waste processing techniques, reduction, reuse and recycling, resource recovery and utilization. Physical and chemical treatment methods and composting. Hazardous waste management and treatment.	Lecture with ppt., Diagrams, Flowchart depiction on whiteboard during online/offline lectures, Audio/Video clips, Group discussion. Field visits. Industrial Visit (MSW/BMW/STP/ETP)	8

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Making of Modern India
Course Code	MCL0202[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	0	0	2
Course Type	Theory only							
Course Category	Humanities, Social Sciences and Management							
Pre-Requisite/s	Basic knowledge of social sciences and political sciences.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- At the end of this course, students would be intellectually well equipped to have a sense of modern Indian history and culture. (BL1-Remember) CO2- The students will have an understanding of making of India as a nation and salient features of modern India. (BL2-Understand) CO3- 4. It will help students to develop their personality and thinking horizon for being a good and concerned Indian citizen (BL3-Apply)							
Coures Elements	Skill Development ✕ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✓ Human Values ✓ Environment ✕		SDG (Goals)	SDG1(No poverty) SDG4(Quality education) SDG5(Gender equality) SDG15(Life on land)				

Part B

Modules	Contents	Pedagogy	Hours
5	1. Idea of India in historical perspective a) Indian culture, b) cultural commonness, c)cultural diversities, d)unity in diversity, e) culturall accomodations ,f) cultural conflicts, g)Idea of India and British Rule , h) Role of Indian Intelligentsia. 2. Emergence and growth of Indian Nationalism a) Anti-colonial basis ,b) Economic Nationalism ,c) communalism and nationalism ,d) revivalism and Indian nationalism ,e)Enlightenment values ,f)European Nationalism and Indian Nationalism 3. Social Reform Movements a) British Rule and Indian introspection ,b)Raja Rammohan Roy, c) social reform movements in 19th century , d)Swami Vivekanand ,e)The women issue ,f)Caste system 4. Indian National Movement a)Early Revolts and 1857 Revolt, b)Early Nationalists ,c) Bang Bhang Movement , d) Gandhi led Mass Movements, e) Socialist and Left trends , f) Princely States and their integration into nation, h)Partition and Independence . 5. India after independence a)Making of Indian Constitution ,b) Post Independent Nehru Era , c) India facing Wars , d) Indian econmy- From Planning to LPG ,e) Achievements, f) Challenges in 21st century India.	Class room Lecuters	24

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Engineering Graphics
Course Code	MEL0202[T]

Part A

Year	1st	Semester	2nd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basic knowledge of geometrical construction, sketching, imagination etc.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To get the fundamentals of engineering graphics, geometrical construction and its applications. (BL1-Remember) CO2- To understand the basic concept of engineering graphics through real-life examples. (BL2-Understand) CO3- To implement the different engineering graphics concepts over appropriate drawing dataset. (BL3-Apply) CO4- To analyze the drawing performance of engineering graphics techniques. (BL4-Analyze) CO5- To evaluate the drawing performance of engineering graphics techniques on a corresponding object. (BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG4(Quality education) SDG9(Industry Innovation and Infrastructure)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	1. Drafting tools, 2. Principles of Graphics, 3. Geometrical constructions 4. Scales: Plain, diagonal, 5. Curves used in engineering practice: such as ellipse, parabola, hyperbola by different methods. Cycloidal curves, Involute and Spirals.	Lecture with Whiteboard, PPT	8
Unit-2	1. Types of projection, Orthographic projections, First angle and third angle projection. 2. Projections of points in different quadrants. Projections of lines, True inclination and true length of straight line, Traces.	Lecture with Whiteboard, PPT	8
Unit-3	Projections of planes: Perpendicular plane, oblique plane and Auxiliary plane, projection of planes with inclined to one or both the reference planes and traces of planes.	Lecture with Whiteboard, PPT	8
Unit-4	1. Projection of solids: Polyhedron and solids of revolution, projection of solids with inclined to one or both the reference planes. 2. Introduction to Section of solids and Development of surfaces.	Lecture with Whiteboard, PPT	8
Unit-5	1. Isometric projection: Isometric scale, isometric projections from orthographic drawing. 2. Computer Aided Drafting (CAD): Introduction, benefit, software's, basic commands of drafting entities like line, circle, polygon, polyhedron, cylinders; transformations and editing commands like move, rotate, mirror, array; solution of projection problems on CAD.	Lecture with Whiteboard, PPT	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Experiment -1	Drawing sheet of plane scale.	Experiments	BL3-Apply	2
Experiment -2	Drawing sheet of diagonal scale.	PBL	BL3-Apply	2
Experiment -3	Drawing sheet of ellipse.	PBL	BL3-Apply	2
Experiment -4	Drawing sheet parabola and hyperbola	PBL	BL3-Apply	2
Experiment -5	Drawing sheet of cycloidal curves.	PBL	BL3-Apply	2
Experiment -6	Drawing sheet of orthographic projection		BL3-Apply	2
Experiment -7	Drawing sheet of projection of line		BL3-Apply	2
Experiment -8	Drawing sheet of projection of plane.		BL2-Understand	2

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Evaluation of Industrial Training -1
Course Code	CED0301[P]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					0	0	2	2
Course Type	Lab only							
Course Category	Projects and Internship							
Pre-Requisite/s	subject knowledge of first and second semester .			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Understand the 'real' working environment and get acquainted with the organization structure, business operations and administrative functions(BL2-Understand) CO2- To have hands-on experience in the students' related field so that they can relate and reinforce what has been taught at the university(BL2-Understand) CO3- To promote cooperation and to develop synergetic collaboration between industry and the university in promoting a knowledgeable society(BL3-Apply) CO4- Develop the confidence require for group living and sharing of responsibilities of acquire leader ship qualities and democratic attitudes. (BL4-Analyze) CO5- Develop the capacity to meet emergencies and natural disasters and practice national integration and social harmony(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✓ Environment ✕		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Students have to submit a report on training and give a presentation on his/her experience	Presentation	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-I	Industrial training has its own importance in a career of a student who is pursuing a professional degree. It is considered as a part of college curriculum. The objective of an industrial training is to provide us an insight regarding internal working of companies. We understand that theoretical knowledge is not enough for a successful professional career. With an aim to go beyond academics, industrial visit provides students a practical perspective of the work place. Industrial trainings provide an opportunity to learn practically through interaction, working methods and employment practices.	Field work	BL3-Apply	40 hrs
Module-II	It gives students an exposure to current work practices as opposed to possibly theoretical knowledge being taught at college. Industrial visits provide an excellent opportunity to interact with industries and know more about industrial environment. Industrial trainings are arranged by TAP cell with an objective of providing us an opportunity to explore different sectors like IT, Manufacturing services, finance and marketing. Industrial visit helps to combine theoretical knowledge with practical knowledge. Industrial realities are opened to the students through industrial visits/trainings.	Field work	BL4-Analyze	40 hrs

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Strength of Materials (SWAYAM)
Course Code	CEL0302[T]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					3	0	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	a complete description of the geometry of the member, its constraints, the loads applied to the member and the properties of the material of which the member is composed.			Co-Requisite/s	Mechanics			
Course Outcomes & Bloom's Level	CO1- Students will revise the concept of Mechanics and Forces (BL1-Remember) CO2- To understand the basic concept of analysis and design of members subjected to torsion also the analysis and design of structural elements such as columns and struts(BL2-Understand) CO3- Students are able to Take the Data Concerning strength of various structural elements(BL3-Apply) CO4- To suggest suitable material from among the available in the field of construction and manufacturing(BL4-Analyze) CO5- To evaluate the behavior and strength of structural elements under the action of compound stresses and thus understand failure concepts (BL4-Analyze) CO6- To Complete Determination of SFD, BMD and Deflection of Different Structural Elements(BL4-Analyze)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to Strength of Materials, Stress Component is Scalar, Stress Vector, Stress Tensor, Equilibrium Conditions, Mohr's Circle, Proof of Mohr's Circle, Principal Stress, Octahedral and Deviatoric Stresses and Principal Directions	problem based learning, experimental learning, field trips, case study	10
2	Free Surfaces, Photoelasticity, Strain, State of Strain, Strain Measurement, Tension Test, Stress Strain Relations, Interrelations between Elastic Constants, Thermal Strain	problem based learning, experimental learning, field trips, case study	10
3	Torsion: Thought and Physical Experiments, Mathematical Development, Problem solving, Hollow shaft	problem based learning, experimental learning, field trips, case study	8
4	Bending: Euler-Bernoulli Hypothesis, Flexure Formula, Engineering Analysis of Beams, Shear Stress in Beams, Composite Beams, Shear in I Beams and Shear Centre, Unsymmetrical Bending and Combined Loading	problem based learning, experimental learning, field trips, case study	8
5	Moment-Curvature and Load Deflection, Moment-Area Method, Method of Superposition and Energy Method, Fictitious Load Method, Theories of Failure, Yield surfaces, Mohr's Theory and Failure in Combined Loading, Governing Equations, Fixed-free and Pinned-pinned, Fixed-pinned, Fixed-fixed	problem based learning, experimental learning, field trips, case study	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Comparative study of tensile strength of different types of steel	PBL	BL4-Analyze	10
2	Comparative study of hardness of steel with other available materials	PBL	BL4-Analyze	10
3	To study the mechanical Properties of metals	Experiments	BL4-Analyze	2
4	To perform torsion test on mild steel rod	Experiments	BL3-Apply	2
5	To determined impact strength of steel (charpy test)	Experiments	BL4-Analyze	2
6	To determined impact strength of steel (izod test)	Experiments	BL4-Analyze	2
7	To determine brinell hardness numbers for mild steel	Experiments	BL5-Evaluate	2
8	To determine the rock well hardness numbers for steel	Experiments	BL4-Analyze	2
9	To determine the tensile strength of mild steel	Experiments	BL4-Analyze	2
10	Analysis of simply supported beam with ANSYS	Experiments	BL4-Analyze	2

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Concrete Technology
Course Code	CEL0303[T]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Students must have knowledge of Structural Materials			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in theory of Construction materials (BL1-Remember) CO2- To understand & analyze the different function of ingredients of concrete(BL2-Understand) CO3- To implement the different designing concrete mix design(BL3-Apply) CO4- To provide experimental basis, and to enable the students to analyze and test the concrete properties (BL4-Analyze) CO5- To evaluate the applications of different special types of concrete(BL5-Evaluate) CO6- To apply the understanding of destructive and non destructive testing of concrete(BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to Strength of Materials, Stress Component is Scalar, Stress Vector, Stress Tensor, Equilibrium Conditions, Mohr's Circle, Proof of Mohr's Circle, Principal Stress, Octahedral and Deviatoric Stresses and Principal Directions	lecture with problem based learning, experimental learning, field trips, case study	10
2	Concrete: Introduction: classification, properties, grades, advantage & disadvantages of concrete. Ingredients of concrete, manufacturing and types of cement, aggregates, water and admixtures. Properties of Fresh and Hardened Concrete: Workability-Testing of fresh concrete, Compressive & Tensile strength Characteristics of hardened concrete: Shrinkage and Creep of concrete temperature effects, durability,	lecture with problem based learning, experimental learning, field trips, case study	10
3	Concrete in aggressive environment: Alkali – aggregate reaction, sulphate attack, chloride attack, acid attack, effect of sea water, special coating for water proofing, sulphate chloride and acid attack, concrete for hot liquids. Special concreting techniques: Pumped concrete, concrete, underwater concrete, pre-placed concrete, vacuum dewatered concrete, hot and cold weather concreting, Ready mixed concrete	lecture with problem based learning, experimental learning, field trips, case study	10
4	Design of Concrete Mix: Introduction, Various classical methods of concrete mix design, Mix design using I.S. code method- basic considerations and factors influencing the choice of mix design, acceptance criteria for concrete. Production and Quality Control of Concrete, curing at different temperatures. field control, Inspection & Testing of Concrete	lecture with problem based learning, experimental learning, field trips, case study	8
5	Special Concrete : Brief Introduction of Concreting underwater, hot & cold weather condition, Light weight concrete, Ready mix concrete, Fiber reinforced concrete, Polymer concrete composites, Shotcrete, Rubble concrete, Resin concrete, Heat resistant concrete, Mass concrete, Temperature control of mass concrete. Repair and Rehebitation : Distress in structure – causes and precautions, damage assessment of structural elements, repairing techniques and repairing materials.	lecture with problem based learning, experimental learning, field trips, case study	8

	<u>Concrete Mix Design Optimization: AI algorithms (especially machine learning) can analyze historical data to predict the best combination of materials (cement, aggregates, water, admixtures) to improve strength and durability, reduce cost and material waste, meet environmental targets (e.g., lower CO₂ footprint)</u>		
--	--	--	--

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Comparative study of tensile strength of different types of steel	Experiments	BL5-Evaluate	3
2	To determine the normal consistency, initial and final setting time of cement	Experiments	BL4-Analyze	3
3	To determine the soundness of cement	Experiments	BL3-Apply	3
4	To determine the bulking of sand	Experiments	BL3-Apply	3
5	To determine the compressive strength of cement mortar	Experiments	BL5-Evaluate	3
6	To determine the density & water absorption of aggregates	Experiments	BL4-Analyze	3
7	To determine the workability of concrete by slump cone test/ compaction factor test	Experiments	BL4-Analyze	3
8	To determine the compressive strength of concrete cube	Experiments	BL5-Evaluate	3
9	Relative Analysis of Composite Concrete using different materials (Sugarcane Bagasse, Coconut Shell, Sawdust)	PBL	BL5-Evaluate	10

(SOET)(BTech-CivilEngineering)

Title of the Course	Highway and Traffic Engineering
Course Code	CEL0313[T]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basics of Materials			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will be able to get Awareness about the road planning & Traffic problems of the country.(BL1-Remember) CO2- To introduce the knowledge of Highway Planning(BL1-Remember) CO3- Students are able to have knowledge of Highway Planning, Alignment, Construction & maintenance of roads(BL2-Understand) CO4- To knowledge of Traffic Jamming & its solutions on Highways & Minimize The numbers of road accidents(BL2-Understand) CO5- To design Highways(BL3-Apply) CO6- To be able to construct roads(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG1(No poverty) SDG2(Zero hunger) SDG3(Good health and well-being) SDG4(Quality education) SDG5(Gender equality) SDG6(Clean water and sanitation) SDG7(Affordable and clean energy) SDG8(Decent work and economic growth) SDG10(Reduced inequalities) SDG11(Sustainable cities and economies) SDG12(Responsible consupction and production) SDG13(Climate action) SDG14(Life below water) SDG15(Life on land) SDG17(Partnerships for the goals)				

Part B

Modules	Contents	Pedagogy	Hours
1	Basics: Historical background, composition of concrete, general note on strength mechanism, recent practice and future trends. Constituent of Concrete : 1. Cement - Chemical composition, hydration, heat of hydration, hydrated structure, various types of cement, testing of cement as per Indian standard. 2. Aggregates - Utility in concrete, classification, effect of geometry & texture, strength, mechanical properties, moisture content, water absorption, bulking of sand, deleterious substances, sieve analysis, various grading and grading requirements, sampling & testing as per Indian Standards. 3. Water - General Requirements & limiting values of impurities. 4. Admixtures - Additives and admixtures, types, necessity and benefit Mineral admixture - Fly ash, silica fume, blast furnace slag, and other pozzolanic materials. Chemical admixtures - Accelerator, retarder, water reducing elements, plasticizer and super-plasticizer, their functions and dosage.	Experimental learning , case study ,field trips,problem based learning	10
2	Cross sectional elements- width, camber, super-elevation, sight distances, extra widening at curves, horizontal and vertical curves, numerical problems.	Experimental learning , case study ,field trips,problem based learning	10
3	Bituminous & Cement Concrete Pavements: Design of flexible pavements, Design of Rigid pavements using IRC charts WBM, , surface dressing, interfacial treatment- seal coat, tack coat, prime coat, wearing coats, grouted macadam, bituminous concrete specification, construction and maintenance. Advantages and disadvantages of rigid pavements, general principles of design, types, construction, maintenance and joints, dowel bars, <u>tie bars</u>	Experimental learning , case study ,field trips,problem based learning	8
4	Low Cost Roads, Drainage of Road and testing: Principles of stabilization, mechanical stabilization, requirements, advantages, disadvantages and uses, quality control, macadam roads-types, specifications, construction, maintenance and causes of failures, highway materials, properties and testing, Channelized and unchannelised intersections, at grade &	Experimental learning , case study ,field trips,problem based learning	9

	grade separated intersections, description, rotary-design elements, advantages and disadvantages. Evaluation and <u>maintenance of pavements.</u>		
5	Traffic Characteristics: road user's Characteristics-general human characteristics, physical, mental and emotional factors, factor affecting reaction time, PIEV theory, vehicular characteristics: characteristics affecting road design width, height, length, and other dimensions. Weight, power, speed and breaking capacity of a vehicle. Traffic studies: - spot speed studies and <u>volume studies</u> , <u>speed and delay studies</u> purpose, causes of delay, method of conducting speed and delay studies. Origin and destination studies: various method, collection and interpretation of data. Traffic capacity studies: volume, density, Mass transportation.	Experimental learning , case study ,field trips,problem based learning	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To determine the water absorption, compressive strength and efflorescent effect of brick	Experiments	BL3-Apply	2
2	Abrasion Test	Experiments	BL3-Apply	2
3	Impact Test	Experiments	BL4-Analyze	2
4	Specific Gravity Test	Experiments	BL2-Understand	2
5	Bitumen Adhesion	Experiments	BL4-Analyze	2
6	Penetration Test	Experiments	BL3-Apply	2
7	Viscosity Test	Experiments	BL4-Analyze	2
8	Ductility Test	Experiments	BL5-Evaluate	2

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Elementary design of structures (RCC)
Course Code	CEL0331[T]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					2	1	0	3
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basics of Materials Properties and Knowledge of Mechanics			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will be able to get knowledge about Structural Members(BL1-Remember) CO2- To introduce the knowledge of Beams and Slab Designs(BL2-Understand) CO3- Students are able to understand yield Line theory of Slabs(BL2-Understand) CO4- To analyze the concept of Soft Storey(BL4-Analyze) CO5- To Apply Codal Provision in designing methods(BL3-Apply) CO6- To be able to create different basic elements of a building(BL4-Analyze)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Basic Principles of Structural Design : Assumptions, Mechanism of load transfer, Various properties of concrete and reinforcing steel, <u>Different methods of designing</u> , Introduction to working stress method and limit state methods of design, partial safety factor for load and material.	Experimental learning , case study ,field trips,problem based learning	10
2	Design of Beams: Singly & Doubly reinforced sections	Experimental learning , case study ,field trips,problem based learning	8
3	Design of Slabs: One way slab, Two way slab, Yield line theory	Experimental learning , case study ,field trips,problem based learning	8
4	Concept of Soft Storey: Mechanism of load transfer in soft storey, Stiffness and Stability criteria, <u>Design problems of soft story</u> .	Experimental learning , case study ,field trips,problem based learning	8
5	Design and drawing details of the various RCC structures, Discussion of Codal provisions of IS 456-2000, SP-16, <u>Discussion of various IS codes</u>	Experimental learning , case study ,field trips,problem based learning	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Patterns of Reinforcements in Beams	Experiments	BL3-Apply	2
2	Patterns of Reinforcements in Columns	Experiments	BL3-Apply	2
3	Patterns of Reinforcements in Slabs	Experiments	BL3-Apply	2
4	Types of Beams	Experiments	BL2-Understand	2
5	Types of Columns	Experiments	BL2-Understand	2
6	Types of Slab	Experiments	BL2-Understand	2
7	Drawings of Beams in AutoCad	Experiments	BL4-Analyze	2
8	Drawings of Columns in AutoCad	Experiments	BL4-Analyze	2

(SOET)(BTech-CivilEngineering)

Title of the Course	Building Planning and Drawing
Course Code	CEL0333[T]

Part A

Year	2nd	Semester	3rd	Credits	L	T	P	C
					2	0	1	3
Course Type	Lab only							
Course Category	Discipline Core							
Pre-Requisite/s	Students must have basic knowledge of Engineering Graphics and Building Elements			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To Remember basic fundamentals of building Design(BL1-Remember) CO2- To Understand the concept of drawing basic elements of buildings(BL2-Understand) CO3- To Analyse different techniques for different views of building(BL4-Analyze) CO4- To apply knowledge of different plans on real life building strutures(BL3-Apply) CO5- To develop plans of superstructure and substructure details of a building(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Building Elements: Designing and detailing of various building components & their types such as footing, doors & frames, windows, ventilators, lintels and arches, stairs and staircase, trusses, flooring etc.	problem based learning, experimental learning, case study	5
2	Building Planning: Orientation, principles of planning, arrangements of rooms, usual requirements & purpose. Size & area restrictions of rooms, doors & windows etc. for residential building. Types of buildings, Category of residential housing scheme. Terminologies like MOS, FAR, building bye-laws, and relevant Provision of N.B.C, general requirements of space for public buildings	problem based learning, experimental learning, case study	6
3	Architectural aspect of buildings drawing- relevant plan, elevation & section of buildings. & different types of architecture like, Roman, Italic, Byzantine., Mughal, Gothic, catholic. etc Various elements like landscaping, interior designing, exterior designing, etc	problem based learning, experimental learning, case study	8
4	Building Services – Introduction of Building Services like water supply and drainage, electrification, ventilation and lightening and staircases, fire safety, thermal insulation, acoustics of buildings. Earthquake resistant buildings.	problem based learning, experimental learning, case study	5
5	Town planning: Principles of town planning regulation and requirements of zoning, Road works and other utilities. Difference types of town development. Such as ribbon development, grid development neighborhood development etc. & Various building designing softwares like AutoCadd, Staddpro, Revit, 3Ds Max, etc <u>3D Model Generation from 2D Plans, Using computer vision and machine learning, to Convert scanned blueprints or hand-drawn plans into editable CAD/BIM model</u>	problem based learning, experimental learning, case study	4

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Drawing of Substructure Element	Experiments	BL2-Understand	2
2	Drawing of Superstructure Part 1	Experiments	BL2-Understand	2
3	Drawing of Superstructure Part 2	Experiments	BL3-Apply	2
4	Drawing of Plumbing Elements	Experiments	BL3-Apply	2
5	Drawing of Swimming Pool Elements	Experiments	BL4-Analyze	2
6	Drawing of Sanitary elements	Experiments	BL4-Analyze	2
7	Drawing of Electrification elements	Experiments	BL4-Analyze	2
8	Drawing of various types of Buildings	Experiments	BL3-Apply	2

Course Outcomes & Bloom's Level								
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG4(Quality education)				

Part B

Modules	Contents	Pedagogy	Hours
Unit 1	Introduction to numerical computing, Approximation and error in numerical computations, Numerical solution of algebraic and Transcendental equations. Regula-Falsi method, Newton-Raphson method, Graffes-Root squaring method, Iterative method. Solution of simultaneous linear equation, Gauss-Elimination method, Jacobi's method Gauss- Seidel method Iterative method. Numerical differentiation and integration(Trapezoidal rule Simpson's 1/3rd rule , Simpson's 3/8rule)	lecture with Board , Quiz, Seminar,	8
Unit 2	Difference operators, Interpolation: Newton's forward and backward method, Lagrange method, Central difference interpolation, Numerical solution of ordinary differential equations: Picard's method, Euler method, Modified Euler method and Runge- Kutta Method, Numerical solution of partial differential equation: Elliptic (Laplace Equation), Parabolic (Heat conduction equation)	lecture with Board , Quiz, Seminar,	8
Unit 3	Laplace Transform: Laplace Transform of elementary functions, Laplace Transform of derivatives, integrals and multiplication by t^n and division by t , Inverse Laplace Transform., convolution Theorem (application only), application to solution of differential equations.	lecture with Board , Quiz, Seminar,	8
Unit 4	Fourier transform, Fourier complex transform Fourier integral theorem, Fourier sine and cosine transform of simple function of derivatives, Finite Fourier sine & cosine transform, inverse of Fourier transform, Application to differential equation, solution of one dimensional heat and wave equations through Fourier transform.	lecture with Board , Quiz, Seminar,	8
Unit 5	Transform: Definition of Z -transform, Z-transform of simple sequences. Properties of Z -transform. Initial and final value theorem, Inverse Z -transform, partial fraction method, convolution theorem, residue method, Application to finite difference equation.	lecture with Board , Quiz, Seminar,	8

Title of the Course	Fluid Mechanics
Course Code	CEL0406[T]

Part A

Year	2nd	Semester	4th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	subject knowledge of engineering mechanics and physics			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- • CO1: To remember the various concepts of fluid mechanics(BL1-Remember) CO2- • CO2: To understand & analyze the different fluid flow problems.(BL2-Understand) CO3- • CO3: To implement the different designing concepts of fluid mechanics.(BL3-Apply) CO4- • CO4: To provide experimental basis ,and to enable the students to analyze the behaviour of various in fluids and its characteristics.(BL4-Analyze) CO5- • CO5: To evaluate the applications of fluids in various fields such as research&industries.(BL4-Analyze) CO6- • CO6: To apply the understanding of fluids in identifying the fluids and its different types.(BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
Unit-1	Characteristics of fluids; continuum concepts; physical properties – bulk modulus; cohesion and adhesion; vapor pressure; surface tension; Newton's Law of viscosity – Newtonian and Non- Newtonian fluids; Pascal's law; pressure variation; scales and methods of pressure measurement; forces acting on plane and curve surfaces; <u>Flow Optimization: AI optimizes water flow in reservoirs and canals to maximize resource efficiency while minimizing</u> <u>Reduced-order Modeling: AI simplifies complex fluid mechanics problems by generating reduced-order models, which approximate full-scale simulations with lower computational costs.</u>	Lectures with problem based learning, experimental learning, case study, field trips	10
Unit-2	Kinematics of Flow : Types of flow-ideal & real , steady & unsteady, uniform & non-uniform, one, two dimensional flow, path lines, streak lines, streamlines and stream tubes; continuity equation for one dimensional flow, rotational & irrotational flow, circulation, stagnation point, separation of flow, sources & sinks, velocity potential, stream function, flownets & Utility.	Lectures with problem based learning, experimental learning, case study, field trips	10
Unit-3	Dynamics of Flow: Euler's equation of motion along a streamline and derivation of Bernoulli's equation, application of Bernoulli's equation, energy correction factor, linear momentum equation for steady flow; momentum correction factor. The moment of momentum equation. Forces on fixed and moving vanes and other applications. Fluid Measurements: Velocity measurement (Pitot tube, current meters etc); flow measurement (orifices, nozzles, venturimeter). <u>Shape Optimization: AI optimizes the design of fluid-handling components (e.g., airfoils, nozzles, pumps) by predicting how changes affect flow behavior.</u>	Lectures with problem based learning, experimental learning, case study, field trips,	10
Unit-4	Laminar Flow: Introduction to laminar & turbulent flow, Reynolds experiment & Reynolds number, relation between shear & pressure gradient, laminar flow through circular pipes, laminar flow between parallel plates, laminar flow through porous media, Stokes law, lubrication principles, Major & minor head losses in pipe. Flow Control: AI-enabled systems can dynamically adjust conditions (e.g., valve	Lectures with problem based learning, experimental learning, case study, field trips,	8

	positions, pump speeds) to maintain desired flow characteristics. <u>Fault Detection: AI models analyze sensor data from pipelines, turbines, and other systems to detect leaks or inefficiencies.</u>		
Unit-5	Dimensional Analysis: Introduction, dimensional homogeneity, use of Buckingham-pi theorem, calculation of dimensionless numbers, application of similarity laws to model & prototype. Machines: Introduction to different types of turbines and Pumps Pelton, Francis and Kaplan Turbine, Centrifugal Pumps: Reciprocating Pump	Lectures with problem based learning, experimental learning, case study, field trips,	10

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To determine C_v , C_c and C_d for orifice meter	Experiments	BL3-Apply	3
2	To determine C_v , C_c and C_d for venturi meter	Experiments	BL2-Understand	3
3	Find the losses due to friction in pipe	Experiments	BL4-Analyze	3
4	Find the losses due to pipe fitting.	Experiments	BL2-Understand	3
5	Find the C_d for Nozzle meter.	Experiments	BL3-Apply	3
6	Find the meta-centric height.	Experiments	BL2-Understand	3
7	Design of a Sustainable Rainwater Harvesting System Students design and simulate a rainwater harvesting system using fluid flow principles. They will calculate pipe sizes, determine flow rates, and estimate storage capacities based on local rainfall data.	PBL	BL3-Apply	10
8	Design of a Sedimentation Tank in a Water Treatment Plant Using fluid mechanics, students design a sedimentation tank to remove particulates from water in a treatment plant. They will determine settling velocities and optimize tank dimensions to meet flow requirements.	PBL	BL4-Analyze	10

(SOET)(BTech-CivilEngineering)

Title of the Course	Fundamentals of Surveying
Course Code	CEL0407[T]

Part A

Year	2nd	Semester	4th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	subject knowledge of linear measurement, geometry			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- • CO1:To remember the various concepts of surveying.(BL1-Remember) CO2- • CO2:To understand & analyze the horizontal vertical & inclined measurements. (BL2-Understand) CO3- • CO3:To implement the different instrumentation techniques.(BL3-Apply) CO4- • CO4: To provide experimental basis,and to enable the studentstoanalyzetheRLs of different levels.(BL4-Analyze) CO5- • CO5:To evaluate the land areas & volume of earth work.(BL5-Evaluate) CO6- • CO6: To apply the understand inglocation of of fininte points (BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Principles and classifications of surveying, chain surveying- basic concepts, terminology and instruments used. Plane table surveying: Principle, methods and equipments, two and three point problems and their solutions Leveling: Principle, terminology and instrumentation, booking of leveling readings, reduction of levels, profile leveling, cross-sectioning and reciprocal leveling. Contouring, its types, methods, characteristics, etc	Lectures with problem based learning, experimental learning, case study, field trips	10
2	Traversing by Compass: different types of bearings and their measurement systems, Different types of compasses for the measurement of bearings, compass traversing and closing error and its adjustments. Traversing by theodolite, Field work checks, traverse computations, latitude and departures, plotting & adjusting of traverse, omitted measurements.	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Tachometry: Tachometric systems and principles, uses of anallatic lens, tangential system, subtense system, instrument constant, field work reduction, direct-reading tachometers, use of tachometry for traversing and contouring. Trigonometrical leveling.	Lectures with problem based learning, experimental learning, case study, field trips	10
4	Curves: Classification and use; elements of circular curves, calculations, setting out Curves by offsets and by theodolites, compound curves, reverse curves, transition curves, Vertical curves	Lectures with problem based learning, experimental learning, case study, field trips	10
5	Control Surveys: Providing frame work of control points, triangulation principle, Reconnaissance, selection and marking of stations, angle measurements and corrections, baseline Measurement and corrections, computation of sides, precise traversing, Introduction & principles of hydrographic survey.	Lectures with problem based learning, experimental learning, case study, field trips	

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	chain surveying	Experiments	BL3-Apply	3
2	compass surveying	Experiments	BL3-Apply	3
3	dummy level	Experiments	BL2-Understand	3
4	plane table survey	Experiments	BL2-Understand	3
5	auto level survey	Experiments	BL3-Apply	3
VI	Mapping the Future: A Land Surveying Adventure In this project, students will simulate the role of professional land surveyors tasked with determining the boundaries and features of a plot of land for a new construction project (e.g., building a school, park, or housing development). They will use various surveying tools, methods, and technologies to collect data, create maps, and present their findings.	PBL	BL4-Analyze	8

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Fundamentals of Geotechnical Engineering
Course Code	CEL0408[T]

Part A

Year	2nd	Semester	4th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basic Mechanics, Geological formations			Co-Requisite/s	The prerequisites for this subject include basic mathematics, physics, engineering mechanics, strength of materials, and geology.			
Course Outcomes & Bloom's Level	CO1- CO1: To define key concepts in soil mechanics, including soil composition, structure, and classification systems based on particle size and consistency limits. (BL1-Remember) CO2- CO2: To explain the relationship between soil properties, such as permeability, effective stress, and consolidation, and their impact on engineering behavior. (BL2-Understand) CO3- CO3: To apply soil mechanics principles to determine the permeability, consolidation, and settlement characteristics of soils in laboratory and field settings. (BL3-Apply) CO4- CO4: To analyze stress distribution beneath loaded areas using Boussinesq's and Water Guard's methods, and assess shear strength using Mohr-Coulomb theory and various soil testing techniques. (BL4-Analyze) CO5- CO5: To evaluate the effects of lateral earth pressures and select appropriate methods for determining pressures in cohesive and cohesion-less soils, considering factors like surcharge and wall friction. (BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Basic Definitions & Index Properties: Definition and scope of soil mechanics, Historical development. Formation of soils. Soil composition. Minerals, Influence of clay minerals on engineering behaviour. Three Phase system, Index properties and their determination. Consistency limits. Classification system based on particle size and grain size distribution by sieve and hydrometer analysis, Relative density	Lectures with problem based learning, experimental learning, case study, field trips	10
2	Soil Water and Consolidation: Soil water, Permeability Determination of permeability in laboratory and in field. Seepage and seepage pressure. Flow nets, uses of a flownet, calculation of stresses. Compressibility and consolidation, Relationship between pressure and void ratio, Theory of one dimensional consolidation. Consolidation test, Fitting Time curves. Normally and over consolidated clays. Determination of preconsolidation pressure, settlement analysis. Calculation of total settlement.	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Stress Distribution in Soils and Shear Strength of Soils: Stress distribution beneath loaded areas by Boussinesq and water gaurd's analysis. Newmark's influence chart. Contact pressure distribution. Mohr - Coulomb's theory of shear failure of soils, Mohr's stress circle, Measurement of shear strength, Shear box test, Triaxial compression test, unconfined compression test, Value shear test, Measurement of pore pressure, pore pressure parameters, critical void ratio, Liquefaction. Quick sand condition.	Lectures with problem based learning, experimental learning, case study, field trips	10
4	Slopes and stabilization of soil: Types of slope failures, Rotational slips. Stability number. Effect of ground water. Mechanism importance of compaction, Standard Proctor compaction test, Modified compaction test Factors affecting compaction, Effects of compaction on soil properties, Field compaction equipment and compaction quality control.	Lectures with problem based learning, experimental learning, case study, field trips	10
5	Stabilization of Soil: Introduction, Mechanical stabilization, Cement stabilization, Lime stabilization, Bituminous stabilization, Chemical stabilization, Thermal stabilization, Electrical	Lectures with problem based learning, experimental learning, case study, field trips	10

	stabilization, Stabilization by grouting, Use of geo-synthetic materials, Types, Functions and applications of geo-synthetics, Reinforced earth structures-components and construction. <u>Applications of AI:</u> AI models can predict soil behavior, Predictive Modeling, Prediction of Lateral Earth Pressure Using Machine Learning, Incorporating Geotechnical Data for Better Modeling.	
--	---	--

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To Determine the water content of soil solids by oven drying method	Experiments	BL3-Apply	2
2	To Determine the water content of soil solids by pycnometer method.	Experiments	BL3-Apply	2
3	To determine the particle size distribution by sieving (grain size analysis)	Experiments	BL3-Apply	2
4	To determine the liquid limit of fine soil	Experiments	BL3-Apply	2
5	To determine the plastic limit of the soil.	Experiments	BL3-Apply	2
6	To determine the specific gravity of soil solids by pycnometer method.	Experiments	BL3-Apply	2
7	To determine the Shrinkage limit of the soil.	Experiments	BL3-Apply	2
8	To determine the maximum dry density and optimum moisture content by Standard Proctor compaction method.	Experiments	BL3-Apply	2
9	Geotechnical Engineering: Soil Classification Students will analyze soil samples to classify them according to established systems and interpret their potential use in construction applications. The students will perform key laboratory tests such as sieve analysis, Atterberg limits, and specific gravity determination to determine the soil properties and classify the soil types based on the Unified Soil Classification System (USCS) and AASHTO classification system.	PBL	BL4-Analyze	10
10	Geotechnical Engineering: Soil Compaction and Its Importance in Construction To determine the maximum dry density (MDD) and optimum moisture content (OMC) of various soil samples. The project will include laboratory testing (e.g., Proctor test), data analysis, and a discussion on the importance of soil compaction in	PBL	BL4-Analyze	10

	construction, especially for foundation and roadwork projects.

Title of the Course	Elementary Design of Structures (Steel)
Course Code	CEL0432[T]

Part A

Year	2nd	Semester	4th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Core							
Pre-Requisite/s	Basics of Autocad, Limit State Design and Working Stress Method			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember basic types of loading and steel structures(BL1-Remember) CO2- To understand different types of connections in steel members(BL2-Understand) CO3- To implement the knowledge of IS Code for Structural Design of Steel members(BL3-Apply) CO4- To Design different members like flexural and compression(BL4-Analyze) CO5- To evaluate the different loading conditions according to different connections(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG9(Industry Innovation and Infrastructure) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Various loads and mechanisms of the load transfer, partial load factors, structural properties of steel, Introduction to design of structural connections- bolted, riveted, and welded connections. Introduction to Limit state design of steel structures Advantages and disadvantages of Steel structures, structural steel sections, loads and load combinations, Limit state design- Design considerations, Failure criteria for steel, codal specifications and section classifications as per IS 800-2007	Lectures with problem based learning, experimental learning, case study, field trips	8
2	Design of Bolted: Introduction, advantages, and disadvantages of bolted connections, Difference between unfinished bolts and High strength friction grip bolts (HSFG). The behavior of bolted joints, failure of bolted joints, Simple problems on finding shear strength, bearing strength, and tensile strength of bolts (bearing type only)	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Design of Welded Connections: Introduction, advantages of welding, types of joints, weld symbols, specifications, effective area of weld, design strength of fillet weld, Simple problems on welded joints (fillet weld only)	Lectures with problem based learning, experimental learning, case study, field trips	8
4	Design of Tension members and bracing systems. Introduction, types of tension members, slenderness ratio, net area, behavior of tension members, modes of failure, factors affecting the strength of tension member, design strength of tension member due to yielding of the gross section, due to rupture of critical sections, and block shear. Design of tension members	Lectures with problem based learning, experimental learning, case study, field trips	10
5	Design of Compression members. Columns –Classification, Boundary conditions, effective length, slenderness ratio. Design strength of Columns. Design of axially loaded Columns (Excluding Built up sections) <u>AI Applications in Steel Connections: AI-based optimization techniques (e.g., Genetic Algorithms, Particle Swarm Optimization) for cost, weight, and strength efficiency. Case</u>	Lectures with problem based learning, experimental learning, case study, field trips	8

	studies on optimizing bolted and welded connections		

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Analysis of different compressive strengths of columns for different sizes: Investigate how the compressive strength of columns varies with: Cross-sectional area: Small, medium, and large cross-sections. Height: Short, intermediate, and tall columns. Shape: Circular, square, and rectangular cross-sections	PBL	BL4-Analyze	3
2	Preparation of Tensegrity Structures: Design and build a scale model of a tensegrity structure capable of supporting a specified load. The model should demonstrate the principles of tensegrity, including the separation of compressive and tensile forces, structural stability, and efficient material use. Students must analyze, optimize, and test the structure for maximum load capacity while minimizing the weight of materials used.	PBL	BL6-Create	3
3	Quiz	Games	BL2-Understand	1
4	Poster Presentation	Games	BL2-Understand	1
5	Seminar/MS PowerPoint Presentation	Seminar	BL3-Apply	2

1	Students have to submit a report on training and give a presentation on his/her experience	Presentation	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-I	Industrial training has its own importance in a career of a student who is pursuing a professional degree. It is considered as a part of college curriculum. The objective of an industrial training is to provide us an insight regarding internal working of companies. We understand that theoretical knowledge is not enough for a successful professional career. With an aim to go beyond academics, industrial visit provides students a practical perspective of the work place. Industrial trainings provide an opportunity to learn practically through interaction, working methods and employment practices.	Field work	BL3-Apply	40 hrs
Module-II	It gives students an exposure to current work practices as opposed to possibly theoretical knowledge being taught at college. Industrial visits provide an excellent opportunity to interact with industries and know more about industrial environment. Industrial trainings are arranged by TAP cell with an objective of providing us an opportunity to explore different sectors like IT, Manufacturing services, finance and marketing. Industrial visit helps to combine theoretical knowledge with practical knowledge. Industrial realities are opened to the students through industrial visits/trainings.	Field work	BL4-Analyze	40 hrs

Part A

Year	3rd	Semester	5th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Students should have the knowledge of basic concepts of Fluid Mechanics			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- CO1: To remember the various concepts of fluid machines.(BL1-Remember) CO2- CO2: To understand & analyze the different fluid flow problems.(BL2-Understand) CO3- CO3: To implement the different designing concepts of fluid machines.(BL3-Apply) CO4- CO4: To provide experimental basis, and to enable the students to analyze the working of various machines and its different components.(BL4-Analyze) CO5- CO5: To evaluate the applications of fluids in various fields such as research & industries.(BL5-Evaluate) CO6- CO6: To apply the understanding of fluids in identifying the fluids and its different types.(BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Turbulent flow : Laminar and turbulent boundary layers and laminar sub layer, hydro dynamically smooth and rough boundaries, velocity distribution in turbulent flow, resistance of smooth and artificially roughened pipes. Forces on immersed bodies: Types of drag, drag on a sphere, a flat plate, a cylinder and an aerofoil development of lift, lifting vanes, magnus effect. types of drag, drag on a sphere, a flat plate	Lectures with problem based learning, experimental learning, case study, field trips	10
2	Pipe flow problems : Losses due to sudden expansion and contraction, losses in pipe fittings and valves, concepts of equivalent length, hydraulic and energy gradient lines, siphon, pipes in series, pipes in parallel, branching of pipes. Study of weir and notches (rectangular, triangular, trapezium section) Pipe Network : Water Hammer , transmission of power, Hardy Cross Method.	Lectures with problem based learning, experimental learning, case study, field trips	9
3	Uniform flow in open channels : Channel geometry and elements of channel section, velocity distribution, energy in open channel flow, specific energy, types of flow, critical flow and its computations, uniform flow and its computations, Chezy's and Manning's formulae, determination of normal depth and velocity, Normal and critical slopes, Economical sections.	Lectures with problem based learning, experimental learning, case study, field trips	9
4	Non uniform flow in open channels : Basic assumptions and dynamic equations of gradually varied flow, characteristics analysis and computations of flow profiles, rapidly varied flow hydraulic jump in rectangular channels and its basic characteristics, alternate depth in term of Froude's number surges in open channels & channel flow routing, <u>venturi flume</u> .	Lectures with problem based learning, experimental learning, case study, field trips	10
5	Turbines : Pelton turbine-their construction and settings, characteristic curves. Reaction turbines: construction & settings, draft tube theory, cavitation. Pumps: Centrifugal pumps : Various types and their important components, net positive suction head, specific speed, cavitation, principle of working and characteristic curves. Reciprocating pumps: Principle of working, Coefficient of discharge, slip, single acting and double acting pump, manometric head, acceleration head.	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Impact of Jets	Experiments	BL2-Understand	4
2	To study the characteristics of Hydraulic Jumps	Experiments	BL4-Analyze	4
3	To study the characteristics of Pelton Turbine	Experiments	BL5-Evaluate	4
4	To study the characteristics of Francis Turbine	Experiments	BL3-Apply	4
5	To study the characteristics of Kaplan Turbine	Experiments	BL4-Analyze	4

Part A

Year	3rd	Semester	5th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Students should have the basic knowledge of fundamentals of surveying			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- CO1: Students will revise the concept of Surveying with its Principles. (BL1-Remember) CO2- CO2: Students are able to understand the surveying with advance instrument like remote sensing, GPS and GIS, hydrographic survey and Arial Photogrammetry. (BL2-Understand) CO3- CO3: Students are able to Take the Data concerning different types of Surveying Instruments. (BL3-Apply) CO4- CO4:To analyze Indeterminate structures and towers according to dynamic loading (BL4-Analyze) CO5- CO5: Students will be able to Process the GIS and GPS and Hydrographic Data and evaluate the Different Dimensions of Image projections (BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Modern equipments for surveying: Digital levels and theodolites, Electronic Distance measurement (EDM), Total Station and Global Positioning Systems (GPS), Digital Planimeter.	Lectures with problem based learning, experimental learning, case study, field trips	10
2	Hydrographic Surveying: various type of survey for hydrographic, sounding, method of observation, equipment for sounding, computations and plotting, Area and Volume measurement Introduction to Marine Surveying, <u>Duties of Marine Surveyor</u>	Lectures with problem based learning, experimental learning, case study, field trips	8
3	GPS Surveying: Introduction & components of GPS, Space segment, control segment and user segment, Elements of Satellite based surveys-Map datum, GPS receivers, GPS observation methods and their advantages over conventional methods.	Lectures with problem based learning, experimental learning, case study, field trips	10
4	Photogrammetry: Principle, definitions and classifications of terrestrial and aerial photogrammetry, flight planning for aerial photography, scale and relief displacements of vertical aerial photographs, stereoscopic vision on vertical photographs, computation of position, length and elevations of objects using photographs and photo mosaic.	Lectures with problem based learning, experimental learning, case study, field trips	8
5	Remote Sensing: Principle, components, classification, remote sensing data acquisition process, different types of remote sensing satellite imagery with special relevance to Indian Remote Sensing Satellites (IRS) and applications. Geographic Information Systems (GIS): Definition, components and advantages.	Lectures with problem based learning, experimental learning, case study, field trips	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To study the intersection method of Plane Table Survey	Field work	BL2-Understand	4
2	To study the contouring for different levels	Field work	BL3-Apply	4
3	To study the Resection method by Plane Tabling	Field work	BL4-Analyze	4
4	To determine levels by Reciprocal Levelling	Field work	BL5-Evaluate	4
5	To determine the location by Global Positioning System	Field work	BL6-Create	4

(SOET)(BTech-CivilEngineering)

Title of the Course	Fundamentals of Structural design(RCC)
Course Code	CEL0512[T]

Part A

Year	3rd	Semester	5th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Student should have the basic knowledge of structures & drawing concepts			Co-Requisite/s	Students have to follow the concept of Structural drawing			
Course Outcomes & Bloom's Level	CO1- • CO1: To remember the various concepts in theory of Rcc structures(BL1-Remember) CO2- • CO2: To understand & analyze the different Rcc components along with the guidelines of Indian Standard Code IS 456-2000.(BL3-Apply) CO3- • CO3: To implement the different designing concepts of Rcc.(BL3-Apply) CO4- • CO4: To provide experimental basis, and to enable the students to analyze the behaviour of various Rcc structures and its Functional properties(BL2-Understand) CO5- • CO5: To evaluate the applications of different Rcc structural members in various fields such as research & industries.(BL3-Apply) CO6- • CO6: To apply the understanding of different Rcc problems in identifying the quality of Rcc and its different types(BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Basic Principles of Structural Design : Assumptions, Mechanism of load transfer, Various properties of concrete and reinforcing steel, Introduction to working stress method and limit state methods of design, partial safety factor for load and material.	Lectures with problem based learning, experimental learning, case study, field trips	9
2	Design of Beams: Singly & Doubly reinforced sections.	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Design of Slabs: Slabs spanning in one & two direction, Yield line theory	Lectures with problem based learning, experimental learning, case study, field trips	10
4	Columns & Footings: Design of column of various cross section, Design of various footings	Lectures with problem based learning, experimental learning, case study, field trips	9
5	Staircases: Introduction of staircases , Types of staircase, <u>Parts of Staircase</u> , Staircases with waist slab having equal and unequal flights with different support conditions, tread-riser staircase.	Lectures with problem based learning, experimental learning, case study, field trips	7

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Types of Bars	Field work	BL6-Create	4
2	Types of Column	PBL	BL6-Create	2
3	Beam Design	PBL	BL5-Evaluate	3
4	Staircase	PBL	BL6-Create	2
5	One Way lab	PBL	BL4-Analyze	4

Title of the Course	Advanced Methods of Structural Analysis
Course Code	CEL0514[T]

Part A

Year	3rd	Semester	5th	Credits	L	T	P	C
					3	1	0	4
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Students should have the basic knowledge in Engg. Mechanics, Strength of Materials, etc			Co-Requisite/s	Analyzing Reactions			
Course Outcomes & Bloom's Level	CO1- • CO1:Students will revise the concept of Conventional Methods of analysis of Determinate Structures(BL2-Understand) CO2- • CO2:To make the student familiar with latest computational techniques used for structural analysis.(BL4-Analyze) CO3- • CO3:Students are able to apply these methods for analyzing the indeterminate structures to evaluate the response of structures(BL3-Apply) CO4- • CO4:To analyze Indeterminate structures and towers according to dynamic loading(BL4-Analyze) CO5- • CO5:Students will be able to determine response of structures by classical, iterative and matrix methods(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Moment distribution and slope deflection methods in analysis of frames with sway, analysis of box frame, analysis of beams and frames by Kani's method.	Lectures with problem based learning, case study	8
2	Plastic Analysis: Plastic modulus, shear factor, plastic moment of resistance, Load factor, Plastic analysis of continuous beam and simple rectangular portals	Lectures with problem based learning, case study	10
3	Analysis of Fixed Arch, Analysis of tall frames, wind and earthquake loads, codal provisions, Approximate analysis of multistory frames for vertical and lateral loads	Lectures with problem based learning, case study	9
4	Matrix method of structural analysis: force method and displacement Method Types of skeletal structures, Internal forces and deformations. Introduction and applications of stiffness method to analyze beams, Trusses and plane frames by system approach Introduction and applications of Flexibility method to analyze beams, Trusses and plane frames by system approach	Lectures with problem based learning, case study	9
5	Influence lines for intermediate structures by using Muller Breslau Principle, steps for obtaining I.L for reaction and internal forces in propped cantilever and continuous beams, qualitative I.L for rigid jointed structures having higher degree of statically indeterminacy. <u>Structural Behavior Prediction</u> <u>AI models can predict: Displacements, stresses, and strains under various loading conditions, Nonlinear behaviors such as cracking, buckling, or yielding</u>	Lectures with problem based learning, case study	10

Part C

Title of the Course	Geotechnical Engineering-II (SWAYAM)
Course Code	CEL0515[T]

Part A

Year	3rd	Semester	5th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Foundation core							
Pre-Requisite/s	Students should have the knowledge of basics of Geo technical Engineering			Co-Requisite/s	Students will attain general practice of lab testing of soil.			
Course Outcomes & Bloom's Level	CO1- CO1: Students will revise the concept of mechanics of soil. (BL2-Understand) CO2- CO2: Students are able to understand the concept of excavation and different types of foundations. (BL2-Understand) CO3- CO3: Students are able to apply the knowledge of different foundations for construction practices. (BL3-Apply) CO4- CO4: To analyze different theories of bearing capacities and settlements regarding structures. (BL4-Analyze) CO5- CO5: Students will be able to conduct several tests and evaluate different parameters of foundation (BL6-Create) CO6- CO6: To complete foundation work at a construction site. (BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction; Shear Strength of soils, Direct Shear Box Test; Interpretation of Direct Shear Test Results; Kf line	Lectures with Videos on Swayam Portal	10
2	Selection of Parameter (SS); Shear Strength of Cohesive Soils, Triaxial Test; Interpretation of Triaxial test Results, Interpretation of Triaxial test Results(contd.); Pore Pressure Parameters	Lectures with Videos on Swayam Portal	9
3	Stress Paths; Plastic Equilibrium in Soils; Mechanisms of Development of Plastic Equilibrium in Soils, Earth Pressure Analysis (Trial Wedge) Analysis of Completely Submerged Retaining wall	Lectures with Videos on Swayam Portal	9
4	Gravity Walls Supporting Cohesive Soil Mass (Backfill); Sloping Backfill; Earth Pressure Analysis, Sheet Pile Wall Introduction; Analysis of Sheet Piles	Lectures with Videos on Swayam Portal	10
5	Anchored Bulkheads; Cantilever Sheet Piles; Lateral Earth Pressure Braced Sheet Pile Walls, slope stability; Slope Instability, Analysis of Finite Slopes; Finite Slopes Friction Circle Method; Slip Circle Method	Lectures with Videos on Swayam Portal	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To determine the consistency of soil by Casagrande'ss Appratus	Experiments	BL4-Analyze	4
2	To determine dry density by Standard Proctor Test	Experiments	BL5-Evaluate	4
3	To determine particle size distribution by sieve analysis method	Experiments	BL2-Understand	4
4	To determine specific gravity by Pycnometer	Experiments	BL4-Analyze	4
5	To apply permeabilty test	Experiments	BL6-Create	4

Title of the Course	Surface Water Hydrology(MOOC)
Course Code	CEE0601[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	Hydrology			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Recall and describe the fundamental concepts of the hydrological cycle, its components, and their importance in the context of Earth sciences and climate change.(BL1-Remember) CO2- To Explain the theoretical concepts behind hydrological processes such as precipitation, evaporation, runoff, and streamflow, and their interactions within the hydrological cycle.(BL2-Understand) CO3- To Use measurement techniques, hydrograph analysis, and statistical tools to analyze hydrological data and solve practical problems related to water resource management(BL3-Apply) CO4- To Evaluate hydrological processes and systems by interpreting data, identifying patterns in streamflow, and assessing the impact of abstractions and flood events on water systems(BL5-Evaluate) CO5- To Design hydrological systems and develop innovative solutions for water resource challenges, such as flood control and sustainable water management, by integrating hydrological principles and design methodologies(BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG6(Clean water and sanitation) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
I	Introduction to Hydrological Processes This unit provides a foundational understanding of surface water hydrology, beginning with an introduction to the hydrological cycle and its critical role in maintaining Earth's ecosystems. It emphasizes the importance of hydrological processes in Earth sciences and engineering, particularly in the context of climate change. The unit sets the stage for more advanced topics by highlighting the significance of studying hydrology and the interconnections between its various components.	Lectures with problem based learning, experimental learning, case study, field trips	10
II	Precipitation and Abstractions This unit focuses on the primary components of the hydrological cycle, starting with precipitation, its types, measurement techniques, and methods for hydrologic analysis. It further explores abstractions from precipitation, such as evaporation, evapotranspiration, and infiltration, which are critical for understanding water availability and movement within natural systems. Through theoretical concepts and real-world examples, this unit equips learners with the knowledge to analyze and quantify these processes.	Lectures with problem based learning, experimental learning, case study, field trips	9
unit III	Streamflow and Runoff Analysis In this unit, students delve into the analysis of streamflow and runoff, two crucial aspects of surface water hydrology. The unit covers techniques and tools used for streamflow measurement, along with the factors influencing runoff and methods for its analysis. By integrating theoretical and practical insights, learners gain the ability to evaluate water flow in streams and design systems to manage surface water effectively	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Hydrographs and Flood Analysis This unit explores hydrographs as essential tools for analyzing and visualizing hydrological data. Students learn to construct and interpret hydrographs, understand their components, and apply unit hydrograph theory. The unit also addresses flood events, their causes, risk assessment, and control measures, providing a comprehensive framework for flood management. These topics prepare learners to tackle challenges related to extreme weather events and water resource planning	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	Advanced Hydrological Applications The final unit focuses on advanced topics in hydrology, including flood routing methods, hydrologic frequency analysis, and their applications. Students engage with statistical techniques to evaluate hydrological data and explore real-world scenarios where these analyses inform decision-making. The unit concludes with hydrological design, equipping learners with the skills to develop practical solutions for engineering	Lectures with problem based learning, experimental learning, case study, field trips	8

	challenges related to water management and sustainability		
--	---	--	--

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	Water Quality Analysis in a Surface Water Body • Objective: Assess the water quality of a local river, lake, or pond. • Tasks: ◦ Collect water samples and test for parameters like pH, turbidity, dissolved oxygen, and nutrient levels. ◦ Analyze the impact of nearby land use (e.g., agriculture, urban areas) on water quality. ◦ Suggest measures to improve or maintain water quality.	PBL	BL4-Analyze	10
II	Estimation of Evaporation and Its Impact on Reservoir Storage • Objective: Quantify evaporation losses from a reservoir and evaluate its impact on water availability. • Tasks: ◦ Use meteorological data (temperature, humidity, wind speed) to estimate evaporation rates. ◦ Study seasonal variations in evaporation. ◦ Propose methods to reduce losses, such as floating covers or vegetation buffers.	PBL	BL5-Evaluate	10

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Introduction to Finite Element Analysis
Course Code	CEE0603[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Understand the fundamental concepts of finite element method to solve engineering problems(BL2-Understand) CO2- Formulate finite element models using appropriate element selection, development of stiffness & force matrices, and application of boundary conditions(BL3-Apply) CO3- Solve structural, thermal, and dynamic problems using the developed finite element formulations(BL4-Analyze) CO4- Demonstrate the ability to create models for structural, thermal, and fluid flow applications using commercial finite element packages(BL3-Apply) CO5- Interpret the analysis results to improve product and system design(BL4-Analyze)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction Basic Concepts of Finite Element Analysis, Introduction to Elasticity, Steps in Finite Element Analysis, Virtual Work and Variational Principle, Galerkin Method, Finite Element Method:, Displacement Approach, Stiffness Matrix and Boundary Conditions	Lectures with problem based learning, derivation based techniques, and software based simulations	10
2	Natural Coordinates, Triangular Elements, Rectangular Elements, Lagrange and Serendipity Elements, Solid Elements, Isoparametric Formulation, Stiffness Matrix of Isoparametric Elements, Numerical Integration: One Dimensional, Numerical Integration: Two and Three Dimensional	Lectures with problem based learning, derivation based techniques, and software based simulations	10
3	Stiffness of Truss Members, Analysis of Truss, Stiffness of Beam Members, Analysis of Continuous Beam, Plane Frame Analysis, Analysis of Grid and Space Frame	Lectures with problem based learning, derivation based techniques, and software based simulations	8
4	Constant Strain Triangle, Linear Strain Triangle, Rectangular Elements, Numerical Evaluation of Element Stiffness, Computation of Stresses, Geometric Nonlinearity and Static Condensation, Axisymmetric Element, Finite Element Formulation of Axisymmetric Element, Finite Element Formulation for 3 Dimensional Elements	Lectures with problem based learning, derivation based techniques, and software based simulations	10
5	Finite Elements for Elastic Stability, Finite Elements in Fluid Mechanics, Dynamic Analysis	Lectures with problem based learning, derivation based techniques, and software based simulations	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Students will use different materials for soil stabilization	PBL	BL3-Apply	15

Title of the Course	Smart Cities (SWAYAM)
Course Code	CEE0604[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will Acquaint knowledge on smart cities planning and development(BL2-Understand) CO2- Develop work break down structure, scheduling and project management of smart cities(BL3-Apply) CO3- Work out the most energy efficient technique for development of Smart Cities(BL4-Analyze) CO4- To understand the importance of different smart system(BL2-Understand) CO5- To understand latest technologies used in intelligent building(BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to Smart Cities: Smart City, Evolution of urban systems, Components of a smart city, Global smart city frameworks, Smart City Mission (India): Vision & Targets Smart Governance & Digital Infrastructure: E-Governance systems, ICT in public services, Command & Control Centres, Citizen participation & engagement, Data-driven governance	Lectures with Presentation, Seminars	10
2	Smart Mobility & Transport: Basics of urban mobility, Intelligent Transportation Systems (ITS), Public transit innovations, Electric & shared mobility, Non-motorized transport and walkability Smart Urban Infrastructure Smart water supply systems, Sewage and drainage monitoring, Urban solid waste systems, Smart metering and energy systems, Integration of urban services	Lectures with Presentation, Seminars	10
3	Smart Energy Systems & Sustainability: Renewable energy in cities, Smart grids: concepts & benefits, Distributed generation Energy storage & microgrids, Demand-side management Environmental Systems in Smart Cities Air quality & pollution sensors, Wastewater treatment & reuse, Decentralized solid waste models, Urban green spaces, Smart environmental monitoring	Lectures with Presentation, Seminars	6
4	Digital Technologies in Smart Cities IoT & sensor networks, GIS & digital twins, Urban data analytics, Cybersecurity for cities, Cloud and AI applications in city services Urban Planning & Land Use Smart urban form & density, Zoning & land-use strategies, Transit-oriented development (TOD), Mixed-use development, Urban redevelopment & retrofitting Green Buildings & Sustainable Urban Form Green building concepts, Energy-efficient architecture, GRIHA & LEED certification, Zero-carbon cities, Role of urban design in smart planning	Lectures with Presentation, Seminars	8
5	Resilient Cities & Disaster Management City resilient, Urban flood mitigation, Seismic planning & structural safety, Emergency services & early warning, Climate adaptation strategies	Lectures with Presentation, Seminars	6

	Case Studies & Global Best Practices Smart Pune & Surat, Barcelona: Urban Tech Singapore: Integrated mobility, Amsterdam: Sustainability focus, Key success factors & challenges Future Trends & Student Projects Urban AI & automation, Blockchain in city governance, 5G, drones & urban surveillance, Group project presentations, Review, discussion & wrap-up

(SOET)(BTech-CivilEngineering)

Title of the Course	Basic of Structural Design (Steel)
Course Code	CEL0617[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					3	1	2	6
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	basics of steel, strength of material			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in theory of steel structures(BL1-Remember) CO2- To understand & analyze the different steel structures problems.(BL2-Understand) CO3- To implement the different designing concepts of steel structures(BL3-Apply) CO4- To provide experimental basis, and to enable the students to analyze the behaviour of various steel structures and its properties.(BL4-Analyze) CO5- To evaluate the applications of different steel structural members in various fields such as research & industries.(BL5-Evaluate) CO6- To apply the understanding of steel structure problems in identifying the quality of steel and its different types.(BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
unit 1	Various loads and mechanism of the load transfer, partial load factors, structural properties of steel, design of structural connections- bolted, riveted and welded connections <u>AI application in dynamic analysis: AI evaluates the responses of the structure to dynamic load such as earthquakes, winds, vibrations.</u>	Lectures with problem based learning, experimental learning, case study, field trips	10
unitII	Design of basic structural elements-tension, compression, flexure. Provision of IS 800-2007 Stress and Strain prediction: <u>Machine learning model predicts stress and deformation under various load conditions, reducing reliance on complex simulations.</u>	Lectures with problem based learning, experimental learning, case study, field trips	10
unit III	Design of trusses-angular and tubular	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Design of Simple and Compound Column base grillage foundation	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	Introduction to flexural member, Design of beam-simple and built up, Laterally supported and laterally unsupported beam.	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	drawing of riveted connection	Experiments	BL2-Understand	3
II	drawing of bolted conecction	Experiments	BL2-Understand	2
III	drawing of wellded connection	Experiments	BL4-Analyze	2
IV	drawing of joints	Experiments	BL2-Understand	3

Course Code	CEL0619[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	basic knowledge of mechanics			Co-Requisite/s	basics of strength of materials			
Course Outcomes & Bloom's Level	CO1- Torememberthevarious concepts Steel Design.(BL1-Remember) CO2- Tounderstandthe concept of design of Multi-Storey Buildings.(BL2-Understand) CO3- To implementthe different designing concepts retaining of earth work with retaining walls.(BL3-Apply) CO4- Toprovidedifferent types of structural elements as per the requirement of structure(BL3-Apply) CO5- Todesignthe silos and bunkers(BL5-Evaluate) CO6- ToCreate different RCC Complex structures with designing(BL4-Analyze)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
unit 1	Design of Multistory Buildings - Sway and non sway buildings, portal and cantilever method. analysis, Shear walls and other bracing elements	Lectures with problem based learning, experimental learning, case study, field trips	10
unit II	Earth Retaining Structures: Cantilever and counter fort types retaining walls, retaining wall with surcharge design.	Lectures with problem based learning, experimental learning, case study, field trips	10
unit III	Water Tanks: Tanks on ground and underground tanks: Square, rectangular, circular tanks, Overhead tanks: square, rectangular, circular & intze tanks	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Silos and Bunkers types of silos and bunker.	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	T-beam & Slab bridges- for highway loading (IRC Loads). Prestressing concepts materials, systems of prestressing & losses Introduction to working & limit State Design. <u>all types of loading on bridges.</u>	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	component design of silos	Experiments	BL4-Analyze	3
II	component design of water tank	Experiments	BL4-Analyze	2
III	design of bunker	Experiments	BL3-Apply	2

Title of the Course	Quantity Surveying & Costing
Course Code	CEL0621[T]

Part A

Year	3rd	Semester	6th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	introduction of material			Co-Requisite/s	basic knowledge of materials			
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in theory of Specification(BL1-Remember) CO2- To understand & analyze the different Quantity Estimates(BL4-Analyze) CO3- : To implement the different designing concepts of Quantity Estimation.(BL5-Evaluate) CO4- To provide experimental basis, and to enable the students to analyze the quantity and cost estimates.(BL3-Apply) CO5- To evaluate the applications of different Estimation and Costing in various fields such as research & industries.(BL3-Apply) CO6- : To apply the understanding of Rate Analysis in solving problem of Estimation(BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
unit 1	Purpose and importance of estimates, principles of estimating methods of taking out Quantities of items of work. Mode of Measurement, Measurement sheet and abstract sheet; bills of quantities	Lectures with problem based learning, experimental learning, case study, field trips	10
unit II	Types of estimate, plinth area rate, cubical content rate, preliminary original, revised and supplementary estimates different projects preparing detailed estimates of various types of Building, RCC work earth work calculations for roads and estimating of culverts. Services for building such as water supply, drainage.	Lectures with problem based learning, experimental learning, case study, field trips	9
unit III	Rate Analysis: Task for average artisan, various factors involved in the rate of an item, material and labour requirement for various trades; preparation for rates of important items of work. Current schedule of rates (C.S.R), Specification.	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Cost works : Factors affecting cost of work, overhead charges Contingencies and work charge establishment, various percentage for different services in building.	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	Valuation : Purpose, depreciation, sinking fund. scrap value year's purchase, gross and net income, dual rates interest. Valuation, its types, Method of Valuation, rent fixation of buildings., Rules of rent fixation	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	module of bulding	PBL	BL4-Analyze	3
II	Estimating and Costing a Residential Building Project Students will be tasked with estimating the cost and quantities for a residential construction project, from initial design through to the preparation of a full Bill of Quantities (BoQ). The project involves real-world application, where students need to collaborate, solve practical problems, and make decisions based on cost estimation techniques.	PBL	BL3-Apply	10

Part B

Modules	Contents	Pedagogy	Hours
1	Estimation of ground and surface water resources. quality of water from different sources, demand & quantity of water, fire demand, water requirement for various uses, fluctuations in demand, forecast of population. <u>Ai applications used in population forecasting</u>	Lectures with Presentation, Site Visit to STP	8
2	Impurities of water and their significance, water-borne diseases, physical, chemical and bacteriological analysis of water, water standards for different uses. Intake structure, conveyance of water, pipe materials, pumps - operation & pumping stations	Lectures with Presentation, Seminar and experiments	8
3	Water Treatment methods-theory and design of sedimentation, coagulation, filtration, disinfection, aeration & water softening, modern trends in sedimentation & filtration, miscellaneous methods of treatment. Theory and design of preliminary treatment such as screens, grit chamber, sedimentation and chemical clarification, role of micro-organism in biological treatment.	Lectures with Presentation, Site Visit to STP	8
4	Sewerage schemes and their importance, collection & conveyance of sewage, storm water quantity, fluctuation in sewage flow, flow through sewer, design of sewer, construction & maintenance of sewer, sewer appurtenances, pumps & pumping stations	Lectures with Presentation, Seminar and experiments	8
5	Characteristics and analysis of waste water, recycles of decomposition, physical, chemical & biological parameters. Oxygen demand i.e. BOD & COD, TOC, TOD, Th OD, Relative Stability, population equivalent, instrumentation involved in analysis, natural methods of waste water disposal i.e. by land treatment & by dilution, self purification capacity of stream, Oxygen sag analysis. Methods of Biological Treatment (Theory & Design) –Trickling Filter, Activated Sludge process (ASP), Oxidation ditch, Septic tank & imhoff tank, theory of sludge	Lectures with Presentation, Seminar and experiments	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Physical examination of Sewage/Water: a. Total Solid b. Total dissolve solid c. Total suspended solid d. pH, color and odor	Experiments	BL4-Analyze	8
2	Chemical estimation of Sewage/Water and soil a. Determination of Chlorides b. Estimation of Chemical oxygen Demand	Experiments	BL4-Analyze	4
3	Microbial examination of Sewage/Water a. Confirmation of coliforms b. Biological oxygen demand	Experiments	BL4-Analyze	4
4	Determination of soil microbial biomass carbon	Experiments	BL4-Analyze	2
5	Examination of different bacteria, algae, fungi, plants and animals by microscopic or morphological examination	Experiments	BL4-Analyze	2
6	Rain Water Harvesting.	PBL	BL6-Create	20

Course Category	Projects and Internship							
Pre-Requisite/s	Basic Knowledge of Civil Engineering			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Understand the 'real' working environment and get acquainted with the organization structure, business operations and administrative functions(BL2-Understand) CO2- To have hands-on experience in the students' related field so that they can relate and reinforce what has been taught at the university(BL2-Understand) CO3- To promote cooperation and to develop synergetic collaboration between industry and the university in promoting a knowledgeable society(BL3-Apply) CO4- Develop the confidence require for group living and sharing of responsibilities of acquire leader ship qualities and democratic attitudes. (BL4-Analyze) CO5- Develop the capacity to meet emergencies and natural disasters and practice national integration and social harmony(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✓ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Students have to submit a report on training and give a presentation on his/her experience	Presentation	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
Module-I	Industrial training has its own importance in a career of a student who is pursuing a professional degree. It is considered as a part of college curriculum. The objective of an industrial training is to provide us an insight regarding internal working of companies. We understand that theoretical knowledge is not enough for a successful professional career. With an aim to go beyond academics, industrial visit provides students a practical perspective of the work place. Industrial trainings provide an opportunity to learn practically through interaction, working methods and employment practices.	Field work	BL3-Apply	40 hrs
Module-II	It gives students an exposure to current work practices as opposed to possibly theoretical knowledge being taught at college. Industrial visits provide an excellent opportunity to interact with industries and know more about industrial environment. Industrial trainings are arranged by TAP cell with an objective of providing us an opportunity to explore different sectors like IT, Manufacturing services, finance and marketing. Industrial visit helps to combine theoretical knowledge with practical knowledge. Industrial realities are opened to the students through industrial visits/trainings.	Field work	BL4-Analyze	40 hrs

Title of the Course	MATRIX ANALYSIS OF STRUCTURES
Course Code	CEE0701[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will understand the concept of Axial Force Elements (BL2-Understand) CO2- Students will learn about the Stress and Strain work energy (BL1-Remember) CO3- Students will be able to analyse Shape Functions for different elements(BL4-Analyze) CO4- Students will be able to apply the matrix analysis on 2D and 3D frames and Trusses(BL3-Apply) CO5- Students will be able to understand Buckling Analysis for linear and non linear elements(BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✕ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction - Review of Structures, Degrees of Freedom & Coordinate Systems, Axial Force Elements, Matrix Condensation, Matrix Condensation Example, Axial Force Elements - Global Equations, Direct Stiffness Method Mathcad Background, member truss	Lectures with problem based learning, experimental learning, case study,	8
2	Stress & Strain - Work & Energy, Axial Force & Torsional Elements, Beam Elements, Frame-Truss Example 3D Coordinate Transformations, Coord. Transformation, Space Truss, Member End Releases - Hinge Example, Virtual Displacements	Lectures with problem based learning, experimental learning, case study,	8
3	Displaced State of Elements - Shape Functions, Element Stiffness from Virtual Displacements, Stiffness Matrices from Virtual Work, Non-nodal Forces from Virtual Displacements, Thermal & Prestrain Loads by Virtual Work, Non uniform Elements, Tapered Element Example, Tapered Element/Log Shape Function	Lectures with problem based learning, experimental learning, case study,	8
4	Non uniform Torsion, Non uniform Torsion 2D vs, 3D comparison, Uniform Torsion, 8-Element Non uniform Torsion, Shear Deformations, Shear Deformation Example, Nonlinear Analysis Nonlinear Examples, Presentation Topic Proposal, Plastic Hinge Example, Matrix Non-linear Analysis, Geometric Stiffness Matrices for 2D, Geometric Stiffness Matrix Example, Geometric Stiffness Matrix Example, Presentation Outline, Nonlinear Material Behavior	Lectures with problem based learning, experimental learning, case study,	10
5	Nonlinear Material Example, Eigenvalue Buckling Analysis, Eigenvalue Buckling Example, Partially Restrained Joints, Presentation Progress Report, Member End Offsets, Restraint/Offset Example, Structural Optimization	Lectures with problem based learning, experimental learning, case study,	6

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	basic foundation knowledge			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will revise the concept of Exploration of soil.(BL1-Remember) CO2- Students are able to understand the concept of excavation and different types of foundations.(BL2-Understand) CO3- Students are able to apply the knowledge of different foundations for construction practices.(BL3-Apply) CO4- To analyze different theories of bearing capacities and settlements regarding structures.(BL4-Analyze) CO5- Students will be able to conduct several tests and evaluate different parameters of foundation(BL5-Evaluate) CO6- To complete foundation work at a construction site.(BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Different types of piles on the basis of casting, function, distribution of load various factors affecting load carrying capacity of piles, pile load test, static & kinematic analysis of pile groups in sand & clays, Cast in situ pile construction	lecture with experimental learning, interactive workshops, field trips	10
2	Settlement & safe load Carrying capacity of pile foundations, laterally loaded and battered piles, group action of piles, Foundation on expansive soils, drilled piers and caissons, Elements of well foundations, shapes, depth of scour, well sinking, tilts, shift and their prevention	lecture with experimental learning, interactive workshops, field trips	08
3	Basic design criteria for foundation, design of shallow foundation, allowable, total & differential settlement, Bearing capacity effect of water table as per IS code.	lecture with experimental learning, interactive workshops, field trips	10
4	Types of coffer dams, design of cellular coffer dams.	lecture with experimental learning, interactive workshops, field trips	08
5	Modes of vibration. Mass-spring analogy, Natural frequency. Effect of vibration on soils. Vibration isolation. Criteria for design. Design of block foundation for impact type of machine.	lecture with experimental learning, interactive workshops, field trips	09

Title of the Course	Pavement Design
Course Code	CEE0703[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Systematically generate and compile required data's for design of pavement (Highway & Airfield) (BL3-Apply) CO2- Analyze stress, strain and deflection by boussinesq's, bur mister's and westergaard's theory (BL4-Analyze) CO3- Design rigid pavement and flexible pavement conforming to IRC58-2002 and IRC37-2001. (BL4-Analyze) CO4- Evaluate the performance of the pavement and also develops maintenance statement based on site specific requirements (BL5-Evaluate) CO5- Understand the various causes leading to failure of pavement and remedies for the same (BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction: Desirable characteristics of pavement, Types and components, Difference between Highway pavement and Air field pavement, Design strategies of variables, Functions of subgrade, sub base, Base course, surface course, comparison between Rigid and flexible pavement Fundamentals of Design of Pavements: Stresses and deflections, Principle, Assumptions and Limitations of Boussinesq's theory, Burmister theory and problems	Lectures with Presentation, Site Visit to Highway Construction site	8
2	Design Factors: Design wheel load, contact pressure, Design life, Traffic factors, climatic factors, Road geometry, Subgrade strength and drainage, ESWL concept Determination of ESWL by equivalent deflection criteria, Stress criteria, EWL concept, and problems on above. Flexible pavement Design: Assumptions, Mcleod Method, Kansas method, CBR method, IRC Method (old), CSA method using IRC-37-2001	Lectures with Presentation, Site Visit to Highway Construction site	8
3	Flexible Pavement Failures, Maintenance and Evaluation: Types of failures, Causes, Remedial/Maintenance measures in flexible pavements, Functional Evaluation by Visual inspection and unevenness measurements, Structural evaluation by Benkleman beam deflection method, Falling weight deflecto meter, GPR method. Design factors for runway pavements, Design methods for Airfield pavement	Lectures with Presentation, Site Visit to Highway Construction site	8
4	Stresses in Rigid Pavement : Types of stress, Analysis of Stresses, Westergaard's Analysis, Modified Westergaard equations, Critical stresses, Wheel load stresses, Warping stress, Frictional stress, combined stresses (using chart / equations), problems on above. Design of Rigid Pavement: Design of CC pavement by IRC: 58-2002 for dual and Tandem axle load, Reinforcement in slabs, Design of Dowel bars, Design of Tie bars, Design factors for Runway pavements, Design methods for airfield pavements	Lectures with Presentation, Site Visit to Highway Construction site	8
5	Rigid Pavement Failures, Maintenance and Evaluation: Types of failures, causes, remedial/maintenance measures in rigid pavements, Functional evaluation by Visual inspection and unevenness measurements, wheel load and its repetition, properties of sub grade, properties of concrete. External conditions, joints, Reinforcement, Requirements of joints, Types of joints, Expansion joint, contraction joint, warping joint, construction joint, longitudinal joint, Design of joints	Lectures with Presentation, Site Visit to Highway Construction site	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Students will Collect the data from highway and develop best design	PBL	BL4-Analyze	15 hrs
2	Students will study different types of Pavements that are used in India	Case Study	BL3-Apply	15

Title of the Course	Seismic analysis of structures
Course Code	CEE0704[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	basic knowledge of Rcc and steel structure and its design provisions			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in theory of seismic structures.(BL1-Remember) CO2- : To understand & analyze the concept of soft storeys(BL2-Understand) CO3- To implement the different designing earthquake resistant structures(BL3-Apply) CO4- : To provide experimental basis, and to enable the students to analyze and test equivalent lateral force method(BL4-Analyze) CO5- To evaluate the applications of dynamic analysis(BL5-Evaluate) CO6- : To apply the understanding of retrofitting techniques(BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to Earthquake Resistant Design, 24 IIT Kanpur Tips. .	lecture with experimental learning, interactive workshops, field trips	10
2	Equivalent lateral force method. (Code based procedure for determination of design lateral force)	lecture with experimental learning, interactive workshops, field trips	10
3	Effects of torsion on the buildings.	lecture with experimental learning, interactive workshops, field trips	08
4	Dynamic analysis. (Code based procedure for determination of design lateral force) Determination of eigen-values and eigen –vectors, model participation factor, model mass, design lateral force, storey shear	lecture with experimental learning, interactive workshops, field trips	09
5	An introduction to seismic analysis of special structures, water tower dam, chimney, bridge, nuclear power plant etc.	lecture with experimental learning, interactive workshops, field trips	08

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	tune mass demper	PBL	BL4-Analyze	3
2	comparitve studey of base isolated bulding	PBL	BL5-Evaluate	4

Part B

Modules	Contents	Pedagogy	Hours
1	Basic Concepts and Fundamentals: Definition and properties of Fluids, Fluid as continuum, Lagrangian and Eulerian description, Velocity and stress field, Fluid statics, Fluid Kinematics Governing Equations of Fluid Motion: Reynolds transport theorem, Integral and differential forms of governing equations: mass, momentum and energy conservation equations, Navier-Stokes equations, Euler's equation, Bernoulli's Equation	Lectures with Presentation, Seminars	8
2	Exact solutions of Navier-Stokes Equations: Couette flows, Poiseuille flows, Fully developed flows in noncircular cross-sections, Unsteady flows, Creeping flows Potential Flows: Revisit of fluid kinematics, Stream and Velocity potential function, Circulation, Irrotational vortex, Basic plane potential flows: Uniform stream; Source and Sink; Vortex flow, Doublet, Superposition of basic plane potential flows, Flow past a circular cylinder, Magnus effect; Kutta-Joukowski lift theorem; Concept of lift and drag.	Lectures with Presentation, Seminars	8
3	Laminar Boundary Layers: Boundary layer equations, Boundary layer thickness, Boundary layer on a flat plate, similarity solutions, Integral form of boundary layer equations, Approximate Methods, Flow separation, Entry flow into a duct Elements of Stability Theory: Concept of small-disturbance stability, Orr-Sommerfeld equation, Inviscid stability theory, Boundary layer stability, Thermal instability, Transition to turbulence	Lectures with Presentation, Seminars	8
4	Turbulent Flow: Introduction, Fluctuations and time averaging, General equations of turbulent flow, Turbulent boundary layer equation, Flat plate turbulent boundary layer, Turbulent pipe flow, Prandtl mixing hypothesis, Turbulence modeling, Free turbulent flows	Lectures with Presentation, Seminars	7
5	Compressible Flows: Speed of sound and Mach number, Basic equations for one dimensional flows, Isentropic relations, Normal-shock wave, Rankine-Hugoniot relations, Fanno and Rayleigh curve, Mach waves, Oblique shock wave, Prandtl-Meyer expansion waves, Quasi-one dimensional flows, Compressible viscous flows, Compressible boundary layers Introduction to Computational Fluid Dynamics (CFD): Boundary conditions, Basic discretization – Finite difference method, Finite volume method and Finite element method	Lectures with Presentation, Seminars	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Performance of real nozzle	Case Study	BL4-Analyze	15
2	Measurements of boundary layer thickness using numerical & analytical solution	PBL	BL4-Analyze	15

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Wastewater Treatment and Recycling
Course Code	CEE0707[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Integrated waste management issues, collection, recovery, reuse, recycling, energy-from-waste, and landfilling(BL3-Apply) CO2- Analyze & compute the challenges of waste management for smart cities(BL4-Analyze) CO3- Understand the C&D Waste and E-Waste Management(BL2-Understand) CO4- Design the generation rates and waste composition material(BL5-Evaluate) CO5- Perform the role of MSW management within the various initiatives of the Govt. of India including: Swachh Bharat Mission, Smart Cities as well as Make in India(BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✓		SDG (Goals)	SDG4(Quality education) SDG6(Clean water and sanitation) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Important terminologies in waste water treatments systems: Sludge, aerobic treatments, anaerobic treatments, bioengineering, biosolids, clarifiers, sewers, wetland, retention time, disinfection, influent, effluent, scum, anaerobic digestion, trickling filter, root zone treatment technology	Lectures with problem based learning, experimental learning, case study,	8
2	Sewage and waste water treatments systems: A. Primary treatment methods B. Secondary treatment methods and C. Tertiary treatment methods	Lectures with problem based learning, experimental learning, case study,	8
3	Biotechnological application of hazardous waste management and management of Resources: Use of microbial systems, Waste water treatment using root zone treatment by plants. Reclamation of wasteland: biomass production for Biogas	Lectures with problem based learning, experimental learning, case study,	7
4	Sludge disposal: Sources and effects of sludge on the environment. Methods of sludge disposal	Lectures with problem based learning, experimental learning, case study,	8
5	Wastewater Recycling: Scope and demands; Types and stages of recycling; Recycling requirements; Designated reuse criteria; centralized vs decentralized recycling systems	Lectures with problem based learning, experimental learning, case study,	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Development of Natural Filters for clean water	PBL	BL5-Evaluate	15 hrs
2	Development of Biogas chamber model	PBL	BL5-Evaluate	15 hrs

Part D(Marks Distribution)

(SOET)(BTech-CivilEngineering)

Title of the Course	Sustainable Construction Methods
Course Code	CEE0708[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Student will be able to Classify the sustainable construction materials(BL2-Understand) CO2- Student will be able to Apply cutting-edge construction technologies(BL3-Apply) CO3- Student will be able to Evaluate different sustainable construction methods(BL5-Evaluate) CO4- Student will be able to Apply different rating systems of construction/buildings as a professional(BL3-Apply) CO5- Student will be able to Apply life cycle approach to optimize the performance of green construction materials (BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Types of foundations and construction methods. Basics of Formwork and Staging. Common building construction methods (conventional walls and slabs; conventional framed structure with blockwork walls). Modular construction methods for repetitive works	Lectures with problem based learning, experimental learning, case study, field trips	8
2	Precast concrete construction methods. Basics of Slip forming for tall structures. Basic construction methods for steel structures. Basics of construction methods for Bridges	Lectures with problem based learning, experimental learning, case study, field trips	8
3	Identification of cutting-edge sustainable construction materials, technologies, and project management strategies for use in the construction industry and evaluation of their potential to reduce the negative environmental impacts of construction activity	Lectures with problem based learning, experimental learning, case study, field trips	8
4	Study and evaluation of current LEED and GRIHA rating for construction system. Detailed case study and analysis of highly successful recent "green construction projects". Guidance to students for the LEED Green Associate professional licensing examination	Lectures with problem based learning, experimental learning, case study, field trips	8
5	Environmental impact of materials; life-cycle assessment; material selection to optimize performance; design, evaluation, and production of green construction materials	Lectures with problem based learning, experimental learning, case study, field trips	8

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Advanced Structural Design(Steel)
Course Code	CEL0723[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	must have the knowledge of steel structure and its component design			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- CO1: Students will revise the concept of Steel Design.(BL1-Remember) CO2- CO2:Students are able to understand the concept Plate Girders(BL2-Understand) CO3- CO3:Students are able to apply the knowledge of different types of truss loading(BL3-Apply) CO4- CO4:To analyze different loadings on Bunkers and Silos(BL4-Analyze) CO5- CO5: Students will be able to design several complex steel structures(BL5-Evaluate) CO6- CO6:To complete Design of Water Tank.							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Design of Plate girder bridges.	lecture with experimental learning, interactive workshops, field trips	
2	Design of truss girder bridges for railways and highway (IRC & IRS holding)	lecture with experimental learning, interactive workshops, field trips	
3	WATER TANKS: Pressed steel tanks, tanks with ordinary plates for different cross section.	lecture with experimental learning, interactive workshops, field trips	
4	Design of Chimneys.	lecture with experimental learning, interactive workshops, field trips	
5	Introduction of HT electric tower, Bunkers and Silos.	lecture with experimental learning, interactive workshops, field trips	

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	design of chimney	Experiments	BL2-Understand	3
2	design of water tank	Experiments	BL4-Analyze	3
3	design of plate girder	Experiments	BL4-Analyze	3
4	design of bunker	Experiments	BL4-Analyze	3
5	design of silos	Experiments	BL4-Analyze	3

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Principles of Construction Management (SWAYAM)
Course Code	CEL0725[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					3	0	0	3
Course Type	Theory only							
Course Category	Discipline Core							
Pre-Requisite/s	Students must have knowledge of the RCC Structure.			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will get knowledge different management techniques for construction. (BL1-Remember) CO2- To understand the resource of contract management (BL2-Understand) CO3- Students are able to Take the details of contracts & Tenders. (BL3-Apply) CO4- To adopt knowledge in construction & project management. (BL4-Analyze) CO5- To evaluate the behavior and strength of structural elements under the action of compound stresses and thus understand failure concepts (BL5-Evaluate) CO6- To Complete Determination of Organisational behaviour (BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to the course, Interdisciplinary nature of modern construction projects, Overview of steps in execution of a project, Illustrative examples for evaluation of bids based on different schemes, Resource management in construction projects, Estimating quantities, Description of items, Estimation of project cost	Lectures with Videos on Swayam Portal	10
2	Discussion on the case study of boundary wall, Running account bills, Economic decision making in construction projects, Depreciation of construction equipment	Lectures with Videos on Swayam Portal	08
3	Repayment of a loan, Introduction to planning and scheduling, Project scheduling, Uncertainties in duration of activities -Using PERT in scheduling, Project monitoring and control systems, Resource leveling and allocation, Crashing of networks	Lectures with Videos on Swayam Portal	09
4	Introduction to construction safety, Accidents in construction industry, Personal protective equipment, Implications of construction accidents, Safety organization and safety officer, Quality control in construction in welding, Epoxy coated bars, grouts in ducts of post-tensioned PC members, concrete	Lectures with Videos on Swayam Portal	10
5	Legal issues in construction management - An introduction, Essentials of a good contract, Dispute resolution in construction projects, Types of construction contracts - Definitions, Closing the discussion on legal aspects, Quality control - concrete sewer pipeline	Lectures with Videos on Swayam Portal	09

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Developing a Comprehensive Risk Management Plan for a Complex Construction Project	PBL	BL5-Evaluate	15
2	Optimizing Construction Scheduling and Logistics for a Specific Transportation Infrastructure Project	PBL	BL5-Evaluate	10

(SOET)(BTech-CivilEngineering)

Title of the Course	Railway Engineering
Course Code	CEL0731[T]

Part A

Year	4th	Semester	7th	Credits	L	T	P	C
					2	1	0	3
Course Type	Theory only							
Course Category	Discipline Core							
Pre-Requisite/s	have the knowledge of basic transportation			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will be able to distinguish different components of Railway Track, different Railway Gauges(BL1-Remember) CO2- Students will be able to Design track Gradients as per given requirements(BL4-Analyze) CO3- Students will be able to discuss various Types of Track Turnouts(BL2-Understand) CO4- Students will be able to describe purposes and facilities at Railway Stations(BL3-Apply) CO5- Students will be able to Explain Interlocking and modern signal system(BL3-Apply) CO6- Students will be able to Describe Surface Defects on Railway Track and Their Remedial Measures(BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	1.1 History of Indian Railways, 1.2 Importance of Railways For Environment 1.3 Recent Developments. 1.4 Role of Civil Engineers In Construction And Maintenance, 1.5 Components of Railway Track 1.6 Definition of Railway Gauges, Types, Uniformity of Gauge. 1.7 Different Gauges on Indian Railways, 1.8 Cross- Section of Permanent Way as Per IRS 1.9 Problems Caused By Change of Gauge. 1.10 Basic Requirements and selection of An Ideal Alignment 1.11 Functions and Types Of Rails 1.12 Standard Rail Sections, 1.13 Causes and Effects Of Creep, 1.14 Measures To Reduce Creep. 1.15 Fittings and Fastening and their requirements . 1.16 Forces Acting On Track, 1.17 Coning Of Wheels	lecture with experimental learning, interactive workshops, field trips	8
2	2.1 Functions & Requirements of sleepers 2.2 Types and Spacing of Sleepers, 2.3 Method Of Fixing Rails With Pre-stressed Concrete And Wooden Sleepers, 2.4 Function and Specifications of Track Ballast 2.5 Necessity and Details of geometric design of track 2.6 Design of track Gradients, 2.7 Grade compensation on curves. 2.8 Curves and Super elevation.	lecture with experimental learning, interactive workshops, field trips	8
3	3.1 Resistance to-friction, wave action, speed, track irregularity, wind, 3.2 Resistance to gradient, curvature, starting and accelerating. 3.3 Stress in rails, sleepers, ballast and formation 3.4 Necessity of Points & Crossing 3.5 Track Layouts And Sketches of Turn Out, 3.6 Types Of Crossing 3.7 Types of Track Turnouts	lecture with experimental learning, interactive workshops, field trips	8
4	4.1. Purposes 4.2. Facilities Required at Railway Stations. 4.3. Requirements Of Station Yard, 4.4. Classification Of Railway Stations, 4.5. Types Of Yards	lecture with experimental learning, interactive workshops, field trips	6
5	5.1 Objectives of signaling 5.2 Classification of signals 5.3 Types and working of Interlocking 5.4 Modern signal system	lecture with experimental learning, interactive workshops, field trips	6
6	6.1. Introduction of Maintenance Programme. 6.2. Monsoon, Pre-Monsoon & Post- Monsoon Maintenance. 6.3. Causes For Maintenance, 6.4. Routine Maintenance 6.5. Tools For Railway Track Maintenance & Their Functions. 6.6. Surface Defects And Their Remedial Measures	lecture with experimental learning, interactive workshops, field trips	6

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	The Student Shall Draw The Dimensional Sketches(Along with Brief Note)of Different gauges(as per IRC)	PBL	BL3-Apply	3
2	The Student Shall Draw The Dimensional Sketches(Along with Brief Note)of different rail sections, sleepers, track fittings, points and crossings	PBL	BL2-Understand	3
3	Students may be asked to collect photographs from internet which is related to field application of various topics	Field work	BL3-Apply

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Building Environment & Services
Course Code	CEE0808[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will learn the importance of durability of civil engineering structures (BL2-Understand) CO2- Students will be able to detect the defects in foundation, masonry, plastering, Painting, flooring, doors and windows (BL3-Apply) CO3- Students will be able to provide preventive and remedial measures for Defects (BL4-Analyze) CO4- Students will be able to locate and place different components like Lifts, electrical panels etc. (BL4-Analyze) CO5- Students will learn the importance of Need for retrofitting and restoration (BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG9(Industry Innovation and Infrastructure) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Durability of civil engineering structures: – Importance of durability – Factors affecting durability of buildings – life expectancy of different classes of buildings. Environmental factors that affect the durability of structures – Effect of natural agents (Air, sun, rain, frost and biological agents such as vegetation & insects) – Environmental pollution – Effect of pollution of air, water and soil – Location effect (Marine, Industrial area etc.) – Usage aspects (Structures subjected to dynamical loading & abrasive condition) - Preventive and remedial measures. Role of maintenance in durability and serviceability of buildings: – Necessity of maintenance – Economic aspects of maintenance. Different types of maintenance – Preventive maintenance – Remedial maintenance – Routine maintenance – Pre-monsoon maintenance - Special maintenance – Planning aspects of maintenance	Lectures with Presentation, Video Lectures	8
2	Cracks in buildings – Defects in foundation, masonry, plastering, Painting, flooring, doors and windows, concrete (RCC and PCC) and wooden roof - Corrosion of reinforcement and steel structures – structural damage due to fire - Causes – Preventive and remedial measures Cracks in buildings – Causes - Preventive and remedial measures	Lectures with Presentation, Practical visits to detect cracks and defects in a building	8
3	Causes - Preventive and remedial measures for Defects in foundation, masonry wooden roof concrete (RCC and PCC) Corrosion of reinforcement and steel structures flooring doors and Painting Defects due to fire, Stair case, water supply system, sewage and sullage system, in drainage system and electrical system Building Services Introduction to other building services	Lectures with Presentation, Practical visits to detect cracks and defects in a building	8
4	Lift – Location – RTT – Number of lifts – lift well and shaft – Machine room. Air conditioning system: Types of A/C – Capacity determination – Requirements for an A/C room. Electrical installations: Panel board & Buss bar, rising mains – distribution boards – MCB – ELCB – DP - TP and change over switch switches - Telephone and TV connectivity – Requirements of domestic gas pipeline	Lectures with Presentation, Case Study on different lift locations	8
5	Retrofitting and restoration of building – Need for retrofitting and restoration – Common retrofitting works carried out – Shoring and underpinning – Different methods of retrofitting and restoration – Challenges in retrofitting and restoration works. Deterioration of monumental and historical buildings – Common causes – Preventive measures – Restoration works – Conservation of world heritages	Lectures with Presentation, Practical visits to provide solutions for cracks and defects in a building	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Plan and draw in detail ventilation and air-conditioning for a given building	PBL	BL3-Apply	15
2	Plan movement facilities: Lifts, escalators, ramps etc. for a given public building	PBL	BL3-Apply	15

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Design of Pre stressed Concrete Structure
Course Code	CEE0809[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	basic properties of materials, and steel and Rcc design			Co-Requisite/s	basic knowledge of structures			
Course Outcomes & Bloom's Level	CO1- Students will remember the WSM Method for RCC and Pre-stressed Structures.(BL1-Remember) CO2- To understand different types and Methods of Pre-stressing.(BL2-Understand) CO3- Students will be able to apply the knowledge of Pre-stressing on different RCC Structures.(BL3-Apply) CO4- To analyze Beam for different Profiles of Tendons.(BL4-Analyze) CO5- To evaluate the stress distribution for different zones of beams(BL5-Evaluate) CO6- To Create and design a Pre-stressed beam and understand its advantages over RCC(BL6-Create)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG9(Industry Innovation and Infrastructure) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
unit 1	Introduction, Principles of prestressing, Different methods of prestressing – post tensioning and pre-tensioning. Prestressed concrete materials. Need for high strength concrete and High concrete tensile steel. Creep and shrinkage of concrete, relaxation of steel. Losses of prestress friction and anchorage of steel	Lectures with problem based learning, experimental learning, case study, field trips	10
unit II	Introduction , assumption in plastic analysis Safe moment ,yield moment , plastic moment, shape factor, load factor, moment curvature relationship , collapse load for standard cases, plastic hing length	Lectures with problem based learning, experimental learning, case study, field trips	9
unit III	Stress-pattern in anchorage zones. Transmission length. End zone reinforcement. Stress distribution in end block	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Plastic design of columns for different condition	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	Design of R.C.C structures concepts (W.S.M)	Lectures with problem based learning, experimental learning, case study, field trips	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	Durability Study of Prestressed Concrete in Aggressive Environments • Objective: Examine the durability of prestressed concrete exposed to corrosive or marine environments. • Tasks: ◦ Expose prestressed samples to saline or acidic conditions. ◦ Measure the impact on tendons and concrete strength over time. • Outcome: Recommend materials and methods to improve durability in harsh conditions	PBL	BL4-Analyze	3
II	Behavior of Prestressed Concrete in Seismic Zones • Objective: Evaluate the effectiveness of prestressed concrete in earthquake-resistant structures. • Tasks: ◦ Design a prestressed frame or column. ◦ Simulate seismic loading using shake tables or dynamic analysis software. • Outcome: Identify design strategies to enhance ductility and energy dissipation in prestressed structures.	PBL	BL5-Evaluate	2

(SOET)(BTech-CivilEngineering)

Title of the Course	Traffic Engineering
Course Code	CEE0810[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					4	2	0	6
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s	basic knowledge of traffic and highway engineering			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in traffic engineering.(BL1-Remember) CO2- To understand & analyze the traffic engineering problems(BL2-Understand) CO3- To implement car-following models, queuing theories, and design of traffic signals in traffic engineering.(BL3-Apply) CO4- To provide experimental basis, and to enable the students to suggest the car-following theory and traffic control measures that will best suit the Indian traffic condition.(BL4-Analyze) CO5- To evaluate the vehicle, highway and traffic factors that influences the movement of vehicles and design of traffic control measures(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✗		SDG (Goals)					

Part B

Modules	Contents	Pedagogy	Hours
unit 1	Introduction: Role of traffic Engineer, Vehicle, highway and traffic factors. Traffic characteristics, Vehicular Road users, Introduction to Traffic Noise and Air Pollution and remedial measures.	Lectures with problem based learning, experimental learning, case study, field trips	10
unit II	Traffic flow: Interrupted and Uninterrupted Traffic Flow, Highway capacity: Urban, rural and intersection, Capacity of transit system, Traffic flow theory: Car Following and Queuing Theory. <u>Evaluation of traffic flow with the help of AI</u>	Lectures with problem based learning, experimental learning, case study, field trips	9
unit III	Traffic Studies: Traffic volume studies, speeds studies, Speed and Delay Studies, Origin and Destination studies, Accident studies, capacity studies, parking studies.	Lectures with problem based learning, experimental learning, case study, field trips	8
unit IV	Traffic Control: regulations and other operational controls, Traffic Signal and marking, street lighting, Traffic Safety: Barricades, delineators.	Lectures with problem based learning, experimental learning, case study, field trips	10
unit V	Design of Intersections: Channelizing islands, Design of Rotaries, Intersection and terminal Design, Parking facilities.	Lectures with problem based learning, experimental learning, case study, field trips	9

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
I	model of traffic light	PBL	BL2-Understand	3
II	drawing of pavement marking	Experiments	BL4-Analyze	2
III	PBL on Peak hour factor	PBL	BL5-Evaluate	24

(SOET)(BTech-CivilEngineering)

Title of the Course	Energy Efficient and Green Building
Course Code	CEE0811[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Understand the concept of Green Buildings(BL2-Understand) CO2- Analyze & compute the energy flow in buildings(BL4-Analyze) CO3- Understand the energy efficient buildings(BL2-Understand) CO4- Design the building as per LEED India Rating System(BL4-Analyze) CO5- Design an Eco-friendly captive power generation(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG9(Industry Innovation and Infrastructure) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	What is Green Building, Why to go for Green Building, Benefits of Green Buildings, Green Building Materials and Equipment in India, What are key Requisites for Constructing a Green Building, Important Sustainable features for Green Building	Lectures with Presentation and Seminar	8
2	Indian Green Building Council, Green Building Moment in India, Benefits Experienced in Green Buildings, Launch of Green Building Rating Systems, Residential Sector, Market Transformation; Green Building Opportunities And Benefits: Opportunities of Green Building, Green Building Features, Material and Resources, Water Efficiency, Optimum Energy Efficiency, Typical Energy Saving Approach in Buildings, LEED India Rating System and Energy Efficiency	Lectures with Microsoft Presentation, Poster Presentations and Interactive Video Lectures	8
3	Introduction, Reduction in Energy Demand, Onsite Sources and Sinks, Maximise System Efficiency, Steps to Reduce Energy Demand and Use Onsite Sources and Sinks, Use of Renewable Energy Sources. Ecofriendly captive power generation for factory, Building requirement	Lectures with Microsoft Presentation, Poster Presentations and Interactive Video Lectures	8
4	Introduction, CII Godrej Green business centre, Design philosophy, Design interventions, Energy modeling, HVAC System design, Chiller selection, pump selection, Selection of cooling towers, Selection of air handling units, Precooling of fresh air, Interior lighting system, Key feature of the building. Eco-friendly captive power generation for factory, Building requirement	Lectures with Microsoft Presentation, Poster Presentations and Interactive Video Lectures	8
5	Handling of non process waste, waste reduction during construction, materials with recycled content, local materials, material reuse, certified wood, Rapidly renewable building materials and furniture; Indoor Environment Quality And Occupational Health: Air conditioning, Indoor air quality, Sick building syndrome, Tobacco smoke control, Minimum fresh air requirements avoid use of asbestos in the building, improved fresh air ventilation, Measure of IAQ, Reasons for poor IAQ, Measures to achieve Acceptable IAQ levels	Lectures with Microsoft Presentation, Poster Presentations and Interactive Video Lectures	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Eco-friendly captive power generation for ITM University any block	PBL	BL4-Analyze	20
2	Preparing Models of Green Buildings	PBL	BL3-Apply	15

Title of the Course	Airport Engineering
Course Code	CEE0812[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Describe the different components of airport and aircrafts(BL2-Understand) CO2- Analyse the requirements of an airport layout with respect to international regulations(BL4-Analyze) CO3- Explain the airport runway design(BL4-Analyze) CO4- Design Taxiways & Aprons.(BL3-Apply) CO5- Summarise the concepts of the terminal service facilities(BL3-Apply)							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG9(Industry Innovation and Infrastructure) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	AIR TRANSPORTATION Airport terminology, component parts of Aeroplane, Classification and size of airports; Aircraft characteristics. Air traffic control need for ATC, Air traffic control network, Air traffic control aids –enroute aids, landing aids. Airport site location and necessary surveys for site section, airport obstructions.	Lectures with Presentation, Site Visit to Airport	8
2	PLANNING: Airport master plan –FAA recommendations, Regional Planning, ICAO recommendations, Estimation of future airport traffic needs-layout of Air Port	Lectures with Presentation, Site Visit to Airport	8
3	RUNWAYS: Runway orientation – windrose diagram, basic runway length, corrections for elevation, temperature and gradient, runway geometric design, runway pavement design introduction	Lectures with Presentation, Site Visit to Airport	8
4	TAXIWAYS AND APRONS: Loading aprons –holding aprons –Geometric design standards, exit taxiways –optimal location, design, and fillet and separation clearance	Lectures with Presentation, Site Visit to Airport	8
5	OTHER FACILITIES: Lighting, visual airport marking, airport lighting aids. OPERATIONS AND SCHEDULING: Ground transportation facilities; Airport capacity, runway capacity and delays.	Lectures with Presentation, Site Visit to Airport	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Project On Airport Planning and Design	PBL	BL3-Apply	15

(SOET)(BTech-CivilEngineering)

Title of the Course	Solid Waste Management
Course Code	CEE0813[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will Understand the concept of solid waste management(BL2-Understand) CO2- Students will be able to explain handling and processing of solid waste(BL2-Understand) CO3- Students will be able to apply the concept of landfilling for disposal of solid waste(BL3-Apply) CO4- Students will be able to design composting and other solid waste conversion units(BL4-Analyze) CO5- Students will understand the various hazardous waste, risk assessment and legislation (BL2-Understand)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✓		SDG (Goals)	SDG6(Clean water and sanitation) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Solid waste: Public health and ecological impacts, Sources and types of solid wastes, material flow and waste generation, Functional elements: Waste generation, storage, collection, Transfer and transport, processing and recovery, disposal. Physical and chemical composition of municipal solid waste, integrated solid waste management, hierarchy of waste management options, different methods for generation rates. Storage: movable bins, fixed bins. Collection: home to home collection, community bin system. Theory and design of hauled container system, stationary container system	Lectures with problem based learning, experimental learning, case study, field trips	8
2	Transportation: handcart, tri-cycle, animal cart, tripper truck, dumper placer, bulk refuse carrier, railroad transport, water transport, conveyors, layout of routes. Engineering system for on-site handling and processing of solid waste: separators, size reduction equipments, screening equipments, densification, baling, cubing, pelleting equipments	Lectures with problem based learning, experimental learning, case study, field trips	8
3	Land filling: Site selection criteria, landfill layout, landfill sections, Occurrence of gases and leachate in landfills: composition and characteristics, generation factors, initial adjustment phase, transition phase, acid formation phase, methane formation phase, maturation phase of gases and leachate, Introduction to engineered landfills	Lectures with problem based learning, experimental learning, case study, field trips	8
4	Composting, types of composting, process description, design and operational consideration of aerobic composting, process description, design and operational consideration of anaerobic composting. Thermal conversion technologies: incineration and pyrolysis system, energy recovery, system. Overview of solid waste management practices in India	Lectures with problem based learning, experimental learning, case study, field trips	8
5	Introduction to Hazardous wastes, Definition of Hazardous waste, The magnitude of the problem; Hazardous waste: Risk assessment, Environmental legislation, Characterization and site assessment, Waste minimization and resource recovery, Transportation of hazardous waste, Disposal of hazardous waste. Introduction to Electronic waste and Biomedical waste and their disposal	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Urban Transportation Planning
Course Code	CEE0814[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Electives							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will be able to Understand the basic concepts of planning at urban and regional levels(BL2-Understand) CO2- Students will be able to Distinguish between the Conventional and current approaches for travel demand estimation(BL4-Analyze) CO3- Students will be able to Implement various types of models and trip generation(BL3-Apply) CO4- Students will be able to Analyze the urban travel markets(BL4-Analyze) CO5- Students will be able to Evaluate the transport planning proposals(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✗ Employability ✓ Professional Ethics ✗ Gender ✗ Human Values ✗ Environment ✓		SDG (Goals)	SDG8(Decent work and economic growth) SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction to transportation planning, planning concept, Goals, objectives, and Importance of transportation planning. Nature of traffic problems in cities. Present Scenario of road transport and rail transport assets. Role of transportation: Social, Political, Environmental. Transport and Socioeconomic Activities, Historical Development of Transport, Transportation in the Cities, Freight Transportation, Future Developments.	Lectures with problem based learning, experimental learning, case study, field trips	8
2	Urban form and Transport patterns, land use – transport cycle, concept of accessibility. Types of transport systems, evolution of transport modes, transport problems and mobility issues. Public Transport: Intermediate Public Transport (IPT) Rapid and mass transport system like MRTS & bus rapid transit. Transport Planning Process, Problem Definition, Solution Generation	Lectures with problem based learning, experimental learning, case study, field trips	8
3	Travel demand: Estimation and fore casting, trip classification, trip generation: factor and methods, multiple regression analysis. Trip distribution methods, modal split, trip assignment	Lectures with problem based learning, experimental learning, case study, field trips	8
4	Studying travel behavior. Analyzing urban travel markets. Traffic and transportation surveys and studies, traffic and travel characteristics, urban transport planning process – stages, study area, zoning, database	Lectures with problem based learning, experimental learning, case study, field trips	8
5	Evaluation of transport planning proposals: Land Use Transport Planning, Economic Evaluation methods like Net present Value methods, and Benefit Cost method. Transport system management: Long-term and short-term planning	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Traffic Survey of National Highways	PBL	BL4-Analyze	15
2	Parking Planning for given vehicles	PBL	BL4-Analyze	15

Part D(Marks Distribution)

Theory					
Total Marks	Minimum Passing Marks	External Evaluation	Min. External Evaluation	Internal Evaluation	Min. Internal Evaluation
100	40	40	12	60	0
Practical					
Total Marks	Minimum Passing Marks	External Evaluation	Min. External Evaluation	Internal Evaluation	Min. Internal Evaluation

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Design of Hydraulic Structures
Course Code	CEL0827[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					2	1	1	4
Course Type	Embedded theory and lab							
Course Category	Discipline Core							
Pre-Requisite/s	Basics of Structural Design and Analysis			Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- To remember the various concepts in theory of Dams(BL1-Remember) CO2- To understand & analyze the different Hydraulic strutures(BL2-Understand) CO3- To implement the different designing concepts of Spillways(BL3-Apply) CO4- To provide experimental basis, and to enable the students to analyze the design of gravity dams(BL4-Analyze) CO5- To evaluate the applications of different Energy dissipators in various fields such as research & industries(BL5-Evaluate)							
Coures Elements	Skill Development ✓ Entrepreneurship ✕ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✕		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Gravity dams: Design Criteria, forces acting on gravity dams, elementary profile, low and high gravity dams, stability analysis, evaluation of profile by method of zoning, practical profile, foundation treatment, construction joints, galleries in gravity dams.	Lectures with problem based learning, experimental learning, case study, field trips	8
2	Earth and Rock fill dams : Earth Dams: Types, causes of failure and design criteria, soils suitable for earth dam construction, construction methods, foundation requirements, typical earth dam sections, estimation of seepage through and below the dam, seepage control, stability of slopes by slip circle method of analysis, pore pressures, sudden draw down, steady seepage and construction pore pressure condition. Rock fill dams: Types, merits and demerits, conditions favourable for their adoption.	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Spillways : Ogee spillway and its design, details of syphon, shaft, chute and side channel spillways, emergency spillways. AI Application: <u>AI-based optimization algorithms for designing efficient dam profiles and stability analysis.</u> <u>Predictive maintenance using sensor data for early detection of issues.</u>	Lectures with problem based learning, experimental learning, case study, field trips	8
4	Energy dissipations and gates : Principles of energy dissipation Energy dissipators based on tail water rating curve and jump height curves Spillway crest gates - vertical lift and radial gates, their design principles and details. Design of canal regulating structures, Detaild design of Sarda Falls, design of cross drainage works, sphypson aquaduct	Lectures with problem based learning, experimental learning, case study, field trips	10
5	Hydropower Plants: Introduction of Hydropower development, assessment of power potential, types of hydropower plants, general features of hydro-electric schemes, selection of turbines, draft tubes, surge tanks, penstocks, power house dimensions, development of micro hydel stations, tidal plants, pumped storage plants and their details.	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	To find the coefficient of ogee weir	Experiments	BL3-Apply	2
2	To study flow characteristics and pressure distribution over ogee weir	Experiments	BL3-Apply	2
3	To study the effect of hydraulic jump for dissipation of energy of a spillway	Experiments	BL3-Apply	2
4	Study of different energy dissipators and their efficiencies	Experiments	BL4-Analyze	2
5	To study the flow characteristics through a siphon spillway	Experiments	BL4-Analyze	2
6	Design and Analysis of Water Distribution Systems Students will work in groups to design the network layout, analyze system hydraulics, calculate pressure requirements, select appropriate pipe materials and sizes, and integrate pumps and storage tanks into the system. The project will also involve evaluating maintenance strategies and system optimization for efficiency.	PBL	BL4-Analyze	10
7	Design and Analysis of Flood Control Systems The students will need to evaluate the hydrological conditions of the area, analyze flood risks, and design suitable flood control measures based on the region's geography, climate, and population. Students will perform hydrological calculations, design flood protection structures, and create a comprehensive plan that minimizes flood risks while considering environmental and socio-economic factors.	PBL	BL4-Analyze	10

Part D(Marks Distribution)

Syllabus-2025-2026

(SOET)(BTech-CivilEngineering)

Title of the Course	Retrofitting and Rehabilitation of Civil Infrastructure (SWAYAM)
Course Code	CEL0831[T]

Part A

Year	4th	Semester	8th	Credits	L	T	P	C
					3	1	0	4
Course Type	Theory only							
Course Category	Discipline Core							
Pre-Requisite/s				Co-Requisite/s				
Course Outcomes & Bloom's Level	CO1- Students will be able to learn various distress and damages to concrete and masonry structures(BL1-Remember) CO2- To understand the importance of maintenance of structures(BL2-Understand) CO3- To study the various types and properties of repair materials(BL2-Understand) CO4- To asses the damage to structures using various tests (BL4-Analyze) CO5- To learn the importance and methods of substrate preparation CO6- To learn various repair techniques of damaged structures, corroded structures							
Coures Elements	Skill Development ✓ Entrepreneurship ✓ Employability ✓ Professional Ethics ✕ Gender ✕ Human Values ✕ Environment ✓		SDG (Goals)	SDG11(Sustainable cities and economies)				

Part B

Modules	Contents	Pedagogy	Hours
1	Introduction Maintenance, rehabilitation, repair, retrofit and strengthening, need for rehabilitation of structures. Cracks in R.C. buildings Various cracks in R.C. buildings, causes and effects Maintenance Maintenance importance of maintenance, routine and preventive maintenance. Damages to masonry structures Various damages to masonry structures and causes, desing of sewer , <u>storm water quality</u> .	Lectures with problem based learning, experimental learning, case study, field trips	10
2	Repair materials Various repair materials, Criteria for material selection, Methodology of selection, Health and safety precautions for handling and applications of repair materials Special mortars and concretes Polymer Concrete and Mortar, Quick setting compounds Grouting materials Gas forming grouts, Salfoalumate grouts, Polymer grouts, Acrylate and Urethane grouts. Bonding agents Latex emulsions, Epoxy bonding agents. Protective coatings Protective coatings for Concrete and Steel FRP sheets,relative stability, <u>oxygen sag analysis</u>	Lectures with problem based learning, experimental learning, case study, field trips	10
3	Damage diagnosis and assessment Visual inspection, Non Destructive Testing using Rebound hammer, Ultra sonic pulse velocity, Semi destructive testing, Probe test, Pull out test, Chloride penetration test, Carbonation, Carbonation depth testing, Corrosion activity measurement Substrate preparation Importance of substrate/surface preparation, General surface preparation methods and procedure, Reinforcing steel cleaning, floating tank, sewage filtration- theory & design.	Lectures with problem based learning, experimental learning, case study, field trips	10
4	Crack repair Various methods of crack repair, Grouting, Routing and sealing, Stitching, Dry packing, Autogenous healing, Overlays, Repair to active cracks, Repair to dormant cracks. Corrosion of embedded steel in concrete Corrosion of embedded steel in concrete, Mechanism, Stages of corrosion damage, Repair of various corrosion damaged of structural elements (slab, beam and columns),stabilization ponds , sludge disposal, <u>oxidation ditch</u>	Lectures with problem based learning, experimental learning, case study, field trips	8
5	Jacketing Jacketing, Column jacketing, Beam jacketing, Beam Column joint jacketing, Reinforced concrete jacketing, Steel jacketing, FRP jacketing. Strengthening Strengthening, Beam shear strengthening, Flexural strengthening. adsorption by activated, <u>phosphorous removal, sullage & night soil</u> .	Lectures with problem based learning, experimental learning, case study, field trips	8

Part C

Modules	Title	Indicative-ABCA/PBL/ Experiments/Field work/ Internships	Bloom's Level	Hours
1	Inspection, Classification, and Remediation of Cracks in Concrete Structures Students will analyze the causes of these cracks (e.g., improper curing, overload, corrosion) and propose remediation or prevention strategies (e.g., epoxy injection, reinforcement placement, using admixtures). This project will help students understand crack patterns, their significance in structural integrity, and how to address and prevent them effectively.	Games	BL4-Analyze	8
